RECORDED IN U.S. AIR FORCE INTERVIEWER'S NOTEBOOK

There are 110 lights and objects have recently been sighted in the sky over Soviet territory as well as over the neutral waters. It is difficult to be exact about the number of objects because they are moving so rapidly. They are observed to the side, but they are flying in the same "area," which indicates, interestingly enough, that they are flying in the same direction past overhead, over 100,000 feet above their shoulders and consider the phenomena as just another "natural."

Our observers indicate no conjecture over the sightings believe that the objects are electrical in various kinds of electric boats and that some of the aircraft are, nor as far as over Soviet territory either by design or by chance (accident). In addition, it is believed, that cause one of the missiles to carry off their load.

However, there are some signs, indicating one in the military service, who are uncertain of the notion that at least one of the phenomena observed in the sky over Soviet territory, to observe some missile.

In our case, the recent period brings to the mind of Soviet - and may be different from the earlier period, during the years 1936 and 1937, when the entire area was covered with aircraft over "street flights." Lights were sighted into sky and over the surface of aircraft, mostly about in the sky above a section. It was ascertained that the Soviet Union was at that time engaged in war with Finland over "conducive to the Atlantic front." Subsequently, it was further ascertained that had been monitoring and guiding the flights. It is believed the was also systematically photographing the Soviet and Scandinavian defense systems and fire the air with the newly invented infra-red cameras.

Part II. Interviews (also collected privately):

October 6 (about 7 p.m.). Ten short parallel "cross stripes" were sighted in sky readily over the ancient harbor fortifications (unofficial) of Kronshtadt. There was the wife of a foreign power, her correspondent and her husband among the tourists until her husband was attending a race, time given as 215 (Kronstadt Information Center), 1936. To her the stripes looked stationary, for a while; then began to "move." She thought "something was wrong with my eyes." It is to be noted that she was the first to describe a similar phenomenon in the Soviet war against Finland. But he could see no motion of it in any sense, or that they were going to be "slowing down those stripes." He recovered.

October 10 (at 6 p.m.) an extremely bright, thin, narrow "line" was seen in the sky over Kronshtadt. It appeared to fall to earth near the sea fortifications. (It was noted in the press.)

October 11 (at 10 p.m.). Phenomenon was sighted over Leningrad, consisting of a series of points of light or "dots" appearing in the sky, appearing in pairs, appearing, disappearing, appearing again in the same order. (This is noted in the press.)

October 12 (at 10 p.m.). Phenomenon was observed over Leningrad, consisting of a series of points of light or "dots" appearing in the sky, appearing in pairs, appearing, disappearing, appearing again in the same order. (This is noted in the press.)

DA PITAL 100-18 EXP 00
For the benefit of government
and members of US Armed

1960-18000 03

All four observations recorded in this section, it is believed, are significant that the observers were:

December 19, 1957: A brilliant, elongated object, resembling a cigar - 6' long - was sighted by two farmers 10 km north east of Ventspils, in the province of Kurzeme. The object was later sighted from the visitors sky. Its flight was horizontal, i.e., parallel to the earth, and its altitude was unpredictable. The line of flight was almost due east. Its speed was not nearly that of a aircraft or a missile. The mysterious object was visible for approximately 15 minutes. (Report by the observer "Kalsmei Jansons," 15 Dec 57)

December 19, 1957 (between 8 and 9 PM): Observers in the village of Ventspils, in Kurzeme, saw a bright light in a distant horizon. The light rose slowly upward in a vertical line and then flew eastward at a fair greater speed. The performance was reported several times. The 11-20 also flew westward, parallel to the earth several times, then it descended to the ground. (Report by the "Ventspils Journal," 15 Dec 57) - Note: Similar observations have been made a number of times in previous years along the Soviet-German frontier, notably near Saline over the Arctic Circle.

December 19, 1957 (10:30 P.M.): The Soviets at 22nd Front, in the province of Latvija, sighted a brilliant object flying across the horizon in a direction from S. to N. The sky was overcast somewhat and moon was fulling slightly. The altitude of the object did not seem very high. (Report by the "Latvijas Avīces," 20 Dec 57)

December 19, 1957 (7:45 AM): A fiery object was sighted at Liepāja, in the province of Latvija (or not far from the locality of the preceding sighting). Flying through the eastern sky at a great altitude. The object appeared to be gradually descending northward and finally disappeared beyond the horizon. The line of flight was from the SW to the NE.

It is significant that the majority of the sightings have reported, as well as the majority of those reported in earlier months, were close to the Soviet frontier.

The possibility has been suggested to several military quarters that the Russians are conducting tests of their tests from a vessel or vessel in the Northern waters. The target area, it is opined, could be as far as the Arctic interior in the case of long-range missiles.

REPORT OF
SAC, BOSTON

CONT'D.

The investigation carried on by the Boston office in this case has been completed. The number of arrests made for the offense of mail fraud, treason, or espionage on the frontier and entitled to protection, the amount of mail stolen reported to within the United States, and the extent of our territory, it is impossible to estimate with exactness.

The Bureau has been in touch with the State and Federal authorities on the order violations committed during recent months in the State of Maine and along the northern coast. "The State of Maine is the only state which has no statute against mail robbery, and we are unable to determine the law enforcement of other states in this regard. In the U.S. there is no federal law against mail robbery, and the order of 1934, "to exclude entirely from the post offices and post roads all mail, money, and property of every kind, to the end that the same may not be taken,窃取, or destroyed," is still in effect, but does not apply to the post roads or to the mail, money, and property of the post offices. It is believed that the law enforcement of the post roads and post offices in the State of Maine is not as effective as it should be, and that the law enforcement of the post roads and post offices in the State of Maine is not as effective as it should be.

Observations Near Russian Border (5)		REF ID: A62446	REF ID: A62446

Transmitted herewith is a translation of a Finnish Border Guard report pertaining to observations of strange illuminated objects in the northern sky during the months of Oct and Nov 68, from the Kajaani Border Guard Post. Also included are many details and descriptions of the activities of the border guard.

COPYRIGHT. This is a special report made by Finland 215 pertaining to the subject above. This report is apparently prepared by special request of the Headquarters in Helsinki, as NSA has not given any special high priority to this type of observations and did not make request for same. Due to the isolated locations of these border guard posts it is not considered probable that these are sightings from established Russian test areas.

INVESTIGATOR REPORT	CLASSEUR	SEARCHED	INDEXED
1960-10-20		Book 1 B-601-68	OLMARIA FINLAND

ON OBSERVATIONS OF STRANGE ILLUMINATED OBJECTS IN THE
NORTHERN SKY DURING THE MONTHS OF OCTOBER
AND NOVEMBER 1960

10.10.1960 at 10.30 hours in the village of Rautio in the commune of Suomussalmi a sphere glowed with a reddish-yellow light was sighted rising over the treetops in the sky to the northeast. The sphere appeared to move slowly to and fro for a couple of minutes and thereafter to accelerate. The weather conditions were bright and there were almost no clouds.

Illuminated objects of the same kind have been sighted near the border for a number of years and they have been regarded as signals for night-flying aircraft. Ordinarily such spheres have been visible, however, for an extended period of time (several hours).

17.11.1960 after 22 hours a party of six persons sighted a remarkable light phenomenon in the southern sky above Säkämö. From a great altitude there fell earthward an orange-red sphere on the left margin of which was a gap (notch). The sphere fell to the height of the treetops, where it glowed for a couple of minutes as if suspended and then plunged into the forest. The sphere appeared larger than the moon. The phenomenon faded away in a southeasterly direction. No natural explanation for the phenomenon has been given.

17.11.1960 at 01.30 hours there was sighted in the village of Puras, in the commune of Suomussalmi a previously spiraling, later red or yellow ball in about 1 km west of the border marker 7231 a reddish-yellow, with the visible for some five minutes in direction of 50. The object was visible at an angle of about 30 degrees in relation to the ground and appeared to be red orange in color. The size kind of brilliant spherical object.... was visible for a short time on October 10th at this point over the village of Rautio... (estimated about 40 m northeast of the village of Puras).....

17.11.1960 at 22.00 hours five persons returning from Puhvelataloja, in the rural commune of Kajaani, to Rautio (a village about five kilometers northeast of the town of Kajaani) sighted a strange illuminated object to the east of the highway. Elongated (in shape 30-40 times as long as normal meters in length), it appeared to be traveling at high speed toward the south. (Faint noise). The observers on the eastern side of the road, simultaneously, the object illuminated the male vicinity like a flash of lightning, and a rather low sound accompanied its flight, resembling the hiss of a short-circuit in a high tension power line. The object was visible for at least a couple of minutes and gradually faded away by rising into the southern sky. The phenomenon was quite plain to see and the travelers halted their horses in order to watch the spectacle for as long as it lasted.

27.11.1960 at 07.30 hours, at the frontier in the commune of Suomussalmi near border marker 7231, situated about midway between the villages of Rautio and Puras, there was sighted in the northern sky, in direction 54-00, a sphere throwing off a reddish glow and at times three times the size of a star that slowly moved from west to east. It reached the edge of the forest after about five minutes. The distance from the atmosphere prior to the sphere was several dozen, perhaps several hundred kilometers. The light weighed the kind of a sputnik.

Local inhabitant

Traveler on Pan American Highway reports unidentified flying object in vicinity of Puntarenas.

UNCLASSIFIED

DISTRIBUTION BY ORIGINATOR: O-2, CHAMBERS, AIR, Guatemala

Mr. Alfred C. Bean, while traveling on the Pan American Highway in the vicinity of Puntarenas reported that he observed an unidentified flying object approximately six miles away or half way between his location on the highway and the port of Puntarenas. This occurred at 0010 hours the morning of Sunday, December 14, 1958. The object was globular in shape with a black body. It had two lights which were separated by a black band; around the middle of the object there was another black band. The object was about one-half the size of the full moon which was shining at that time.

That first observed it was moving very slowly in the sky and then increased speed and when last observed appeared to have landed. Was observed from the top of the jeep, in which he was riding. Mr. Bean said it first had a blue-white light turning to blue and then to yellow. The object appeared to be rotating on an axis and two streetlights, separated by the black band around the middle of the object, appeared in the middle of the object, as it turned these lights merged into one.

2. Report 2000, 25 Oct 59 (2 pg) (SECRET)
3. Report 2009, 24 Nov 59 (1 pg) (SECRET)

The two sources identify the time as "about 2000" (the time designation having
been again observed by one of the two sources in April 1959) and in "late September
2007" by the third source the estimated time of observation by the three sources
varied between 9-10 p.m. and "late in the evening". The sources described the object
as originating from the vicinity of Middle Georgia, having at some speed and height
in a northward direction over Middle Georgia, having a high-speed trailing wake, emitting
a sheet of flame, and having a plainly visible white vapor trail (about like a
smoke) which remained in the sky for at least half an hour. The second source
being located 20 km west of Middle Georgia, described an object as originating from the
southeast border and moving east into Middle Georgia, becoming on a course with
light in the sky (a horizontal trailing ball of vapor which disappeared after 2-3
minutes, having in its stead a light which consisted of a star and remained) but having
no sound. The third source described an object as a small bright, consisting a star,
circling periodically and very rapidly to the west of Middle Georgia, remaining visible
for 4-5 minutes, disappearing in a north-westerly direction, and ending as sound.

Attention is also invited to paragraph 1 of Report 2000 and paragraph 3 of
Report 2007. Report 2007 describes the descent of an orange orange globe (appar-
ently of large dimensions) to a great height over Middle Georgia, this was noted as having
occurred in October 1959. Report 2000 concerns a report in October 1959 by Ch-
airman authorities for a search of the Kankakee mountains area, 100-150 km to the

Dakhtari News Bulletin

FROM OUSA/IMA
PREPARED BY LTCOL JS SANDILAND
E-SERIES NO. R-483-59

SUMMARY

(U) The English language news bulletin "DAKHTARI" during November 59 published the two following items:
a. 9 Nov 59: Dateline, KANDAHAR (3135N 6745E): "On 8 November a huge luminous object was seen moving at great speed over the sky in Kandahar. The object which was flying in a North Westerly direction had a downward movement and soon after it was seen it blew up with a loud roar on SHURAB mountains, causing slight earth tremors in the area. No losses have been reported so far."
b. 29 Nov 59: Dateline, MAZAR-i-SHARIF (3642N 6706E): "A bright object was observed in Mazar-i-Sharif moving with high speed from North-East towards South-West. The object disappeared in three minutes in the clouds."

(U) COMMENT:

a. USAFIA has been unable to secure further information about either of these sightings.

b. Afghanistan, with grim determination, has decided to advance from the 13th to the 20th century as quickly as possible. If more advanced countries have sighted UFO - Well - So has Afghanistan.

Area (Station) - AIRFIELDS - AIR ACTIVITY

3 - Radio stations Four stateless residents of the KUDJA area, two men and a woman, noticed the wireless national radio stations bring a very poor judge of distance and incapable of providing even a vague description of KUDJA airfield or of any buildings or aircraft upon it. The observer of the flying objects described in para 3 was an illiterate peasant woman.

4 - Radio stations near KUDJA airfield

Two were radio stations on the outer wings of KUDJA airfield, one situated about two kilometres to the east and the other about two kilometres to the west of the airfield buildings. The latter was standing on a low plateau separated from the plateau on which the airfield lay by a narrow, marshy valley.

The two stations were identical and each consisted of a single-storyed rectangular building, with a flat roof and ground dimensions of about fifteen by fifteen metres. Flanking each building there was a pair of wooden masts about twenty-five metres apart. Each mast was about twenty metres high. In the direction of a casual observer the antenna at each station consisted of two wires kept apart from each other by four or five crosspieces or loops. At no time did the wires were interrupted in the middle.

2 - Radio stations
3 - Town
4 - Surface areas

Poor Original

5 - Radio station near KUDJA

SEARCHED

In October 1957, a radio station of the II band developed in KUDJA, which was installed in one number, in the form of two vertical bars. The cable had been of plastic or rubber, red and black, and had the inscription in black Latin letters. The radio station was built on a high, sandy bank, not far from the village.

6 - Flying objects over KUDJA

SEARCHED

On 26 October 1959, a man by the name of Abdurrahman, who was working in the KUDJA area, reported that over KUDJA, he saw two strange flying objects. The first was about 1.5 m. long and 0.5 m. wide, and was made of a dark, thin material. It had a small engine and a propeller which was not moving. The second was about 1.5 m. long and 0.5 m. wide, and was made of a dark, thin material. It had a small engine and a propeller which was not moving. The second object was not moving.

REPORT NO. 3969

CHINA (Sinkiang) - AIR ACTIVITY

Sources: The former residents of KULDJA

Map: World Aeronautical Chart (1:1,000,000) Sheet 329 (First Edition - May 45)

1. Mountain search for missing instruments

got 21
A resident of KULDJA had heard from the natives of YILI (43°47'N, 87°29'E) that in Oct 58 local Kirgiz tribesmen had been requested by the Chinese authorities to search the Karakorum mountain range some 150 or 160 kilometres northeast of KULDJA for an object containing instruments which supposedly had landed in that area. The YILI residents understood that some instruments had been found by the Kirgiz and handed over to the authorities at YILI.

2. Unidentified flying object west of KULDJA

got 22
A man was fishing in the Ili, about 20 kilometres west of KULDJA, between 9 and 10 pm on late September evening in 1958, and was startled by a sudden light in the sky. Upon looking up he had perceived a luminous whirling ball of vapour, wider in the air to the west of him, leaving a trail of white vapour behind. Although the cloud was luminous itself it did not light up the surrounding countryside. The cloud had remained visible for two or three minutes, after which it had disappeared, leaving, in its stead a light which resembled a star and which was pulsating. The light had then moved in an eastward direction into the interior of Sinkiang and had disappeared from view. The fisherman was quite certain that the "object" had risen from the south side of the border, which at this point lay about 30 kilometers to the west. He did not discuss this phenomenon with anyone and did not know whether anyone else had seen it.

object did not emit any sound, as far as he could judge.

CIA (Continued) - AIR DEFENCES

ANSWER : The few residents of KEDDA, one a young woman (part 1) and the
other a schoolboy in his mid teens (part 2)

1. Incident in the object north of KEDDA

Answer 1950

Several years ago, returning to KEDDA from work in JORDAN late one
evening in 1949, he noticed a small light, resembling a star, which
was moving rapidly to the north of KEDDA. The light had been visible
for about five minutes and had then disappeared. The light was a northward flight at the
rate of 1000 ft/min and he could not hear any noise.

In view of the lack of available knowledge, no such phenomenon had ever been
observed by him or any other before or since that time, at least in all the
recent years. In summary, it is only his 50.

2. Incident over city of Aqaba

Answer 1950

He has not been able to identify any object in the sky of a similar nature to that seen
in 1949. On several occasions in 1950, the population seen a very bright star,
approximately the size of the moon, suddenly out of the usual
position. It was at this time approximately 1000 ft above the ground, moving
at a rate of 1000 ft/min. After rapidly moving away,
it disappeared. He does not know what this was. In this connection, he
has heard of the legend of the city of gold, which has been
described as being located in the desert. In addition, he has observed
the same kind of objects in the sky, which had just disappeared.

He is unable to say definitely the nature of this object. On
several occasions, he has seen a very bright star, which had
been visible for a period of time, which had then disappeared.
In this connection, he has not been able to identify the object.

EXCERPT NO.

Postscript received in Feb. 1960. Intelligence Report No. 3100,
dated 24 April 1960, which describes a sighting of an unidentified flying object in
Inner Mongolia Province. Object observed from Hailar approaching from distant west
in an easterly direction at great speed and altitude; when over and somewhat north of
Hailar, the object changed course from horizontal to vertical and disappeared; object
visible for about five (5) minutes; tail of brilliant light yellow color changing to
bright orange and dull orange before fading.

Subject report also describes in detail a radio-wave appearance, with frequ-
ency unknown, found in the spring of 1959 approximately 40 kilometers northeast of
Hailar, Inner Mongolia. (CONT'D.)

Date : 16 Apr 60

CHINA (Sinkiang) - A : AIR

Source : A former resident of the KILOMA area who witnessed the spectacle
and found the object described below

1. Sighting from West Sinkiang of unidentified flying object

Spring 1955.

At about 11 o'clock one clear starry night in the spring of 1955 an unusual object had been seen in the sky from KILOMA flying from the distant west in an easterly direction at great speed and at a great altitude (at a much higher altitude than the normal one for aircraft in that part of the world). When over and somewhat north of KILOMA the object had abruptly changed its course from a horizontal one to a vertical one and, as if rotating on its own axis like a bullet, had shot upwards still higher and disappeared from sight. It had remained in view altogether five or more minutes. The object had the brilliant light yellow colour of a star and the size of one of the larger stars. In its course it had left a trail of light which had changed in colour from bright yellow to bright orange and then to a duller orange before fading away.

2. Landing in West Sinkiang of radio-sonde equipment

Spring 1955.

In the spring of 1955 a radio-sonde apparatus had been found by a hunter on the ground some forty kilometres north-west of KILOMA on the crest of a spur two or three kilometres south of the point where the spur branched off an east-west range of hills (i.e. at approximately 44°11' N, 80°55' E). The apparatus consisted of a closed white plastic or cardboard box, the dimensions of which were approximately 30 x 20 x 20 cm. Outside one end of the box were four square vanes, also of white plastic or cardboard, on the ends of two steel wires or thin rods that rotated a slightly sturdier rod which penetrated the box and in turn, by means of a small cog wheel, rotated a key over raised ribs of some bright metal on a claret coloured plastic dial. The dial, about six centimetres in diameter, was on a panel which was fixed to the side of the box and which also had on it what looked like a small radio valve and one or two other devices. Also fixed in the interior of the box to one of its sides, at the end where the rotating rod entered, was a container in which were two batteries, the dimensions of one being approximately 9 x 6 x 5 cm and of the other 9 x 5 x 2.5 cm (v. diagram on the annex to this report).

The larger battery was marked in Russian to the effect that it was good for six months use and the smaller one to the effect that it was good for twelve months use. Level with the battery container and facing it was a small metal panel fixed to the exterior side of the box. Lying loose in the box, obviously having been unfastened, were a thin wire coil wound round a metal rod about three and a half centimetres long and two hollow copper rings about five millimetres in diameter around a steel rod. There were several other devices and wires inside the box, diagonally across the exterior of one side of the box was a small metal plate inscribed in Russian "Radiozond - no need to return". An elderly man from the area had heard that several other radio-sondes of the same type had been found on the ground in the area at about the same time.

For serial record: [redacted] Intelligence Report No. 722.

Subject report relates the observations of a former resident of Urumia, Kansu, on two occasions between 1957 and 2200 hours during the month of October 1959, of an unidentified flying object with the following characteristics. A flash originating in the sky far to the west of Urumia fell identified flying object resembling the size of an ordinary star, but very bright, which had risen to a great height before finally disappearing in a short time of yellowish color and required about five (5) minutes from the instant to time of disappearance; object left a trail of dark smoke which lasted 2-3 minutes after passing of the object from visibility; no sound, barely visible when directly overhead; but grew larger as it descended; measured that UFO originated on Russian side of Sino-Soviet border base, conclusion that Chinese Communists had not the ability for launching any such objects in territories. Source claimed person living with his family was never in several other locations during September-October 1959 but source present during these particular observations. REGNAPLW 100X 470 1V 2-1

Act 50 May 60

CHINA (Kirin/Yenan) - A : AIR

SOURCE : A young Russian resident of BEIJING who spent two weeks in CHINA in Apr 60 while migrating to Hong Kong.

1. unidentified flying object over BEIJING

A week end of BEIJING had seen a strange object in the sky on two occasions in either December or Oct 59. Persons living within had also seen similar strange objects on several other occasions during those two months, but he had not been present. There had been about a month's interval between his own two sightings.

Between 7.30 and 10.00 pm on each of the two occasions he had seen a flash and thereafter a strange object, resembling a star but was much brighter, had appeared in the sky a long way to the west of BEIJING and had risen to a great height before finally disappearing in the east. It had been about the size of an ordinary star and of a yellowish colour, and had taken about five minutes from the time it was first seen until it disappeared. It had left a line of light across its path which could not be seen two or three minutes after the object had passed. There was no sound from it nor did it have a tail. When it was straight overhead it was only just visible, but then gradually grew larger as it descended.

He thought that it had originated on the Russian side of the Sino-Soviet border west of JILIN, but his only reason for thinking so was the consideration that the Chinese had not the ability for launching any such object from their side of the frontier.

2. Air activity over BEIJING

A military aviation, in the course of a fortnight's stay in BEIJING during Apr 60, had on several occasions seen aircraft flying over that city at very great speed and had subsequently recognised them as MiG 19s from illustrations he had seen in aircraft identification manuals. They had appeared to him to be travelling faster than the planes he had seen departing from flying over Hong Kong.

Geographic Specialist Team 2, under command of Major G. P. Benedict, 2nd USAFAC, upon return from field trip, reported sighting two or three lights moving SE to SW over Caspian Sea, 27 July 1960.

Distribution by Originator: US Embassy, Tehran

1. — Sighting by MIST-2

Date/Time: 27 July 1960, 1955 hours
Location: Confluence of QARA SU and AMAS Rivers
Coordinates: 39°37'N - 47°20'E
Object Sighted: Two or three green lights
Azimuth to Object: 15°
Angle of elevation to object: 15°
Direction of Movement: SE to SW
Climatic data at time of sighting: Temperature: 95° F
Wind: SE 5-10 mph
Cloud Cover: 0/10
A haze appeared on distant horizon

Personnel who made sighting: Maj C. P. Benedict
MIST Roland T. Kelley
MIST Frederick G. Rice
Lt. Basavi
2 Iranian Sergeants
Several Iranians

Individual Impressions: MIST Rice - Two lights initially; color - bright white with a trail; 2 seconds later, 3 lights, same color.
MIST Kelley - Two lights initially; became three; color - bright bluish green with trail.
Maj Benedict - Two or three lights; color - bright bluish green.

From: QURATX, Iran

2. Information obtained from personnel stationed at border post at village of ALI REZABAD. Border post is located 60km NE of the confluence of the QARA SU and ARAB Rivers. Personnel were debriefed on the afternoon of 18 July 1960.

Time of sighting: About 2000 hours, 17 July 1960
Azimuth to object: About 90°
Angle of Elevation: 30°
Direction of movement: SE to SW
Color of light: Blue-green

General remarks: Two lights were seen initially and then they became three. The lights were seen for over one minute. Flight was horizontal. Object did not appear to land, but disappeared behind the base on the horizon. No similar sighting had ever been made before.

3. Information obtained from personnel stationed at Gendarmerie Post at village of ARJAN, 160 km south and east of confluence of the QARA SU and ARAB Rivers. Personnel were debriefed on 19 July 1960.

Time of sighting: 2000 hours, 17 July 1960
Azimuth to object: 150°
Angle of elevation: 70°
Direction of movement: SE to SW
Color of light: Blue-green

General remarks: Two lights were seen initially in the SE sky. The lights appeared to explode into three lights. The flight was horizontal. Lights were seen for 1-5 minutes. Each light appeared to be 2-3 feet in diameter. (This size is five times larger than the lights appeared to MOST personnel and twice as large as they appeared to border personnel.) No similar sighting has ever been seen at this point.

Report No. 2007/AI - Unidentified Flying Object over Bellington

One day in September 2000 a resident of Bellington Settlement (approximately 40-45 N, 120-45 E) had heard from a friend of an object the latter had seen the previous evening in the sky over Bellington Settlement (approximately 40-35 N, 120-45 E). According to the friend, the object had been 2km to approximately 5 km tall and had appeared about ten minutes after sunset. He had first seen it, he said, rising from the northeast and it had described a trajectory across the sky, finally disappearing behind a range of mountains to the southwest.

The resident of Bellington had his doubts about the accuracy of the story and had decided to watch the sky in the evenings himself. For two days the sky was overcast, but on the third the clouds dispersed and in the evening, about ten minutes after sunset, he saw a glowing ball size fire behind mountains to the northeast. The observer called his brother to his attention, together, watched the phenomenon. It glowed with a bright reddish light and described a trajectory across the sky, disappearing behind a range of mountains to the northwest. At the zenith of its trajectory, the object had an elevation of about 85.6 degrees roughly west of the point of observation. It took about fifteen minutes to travel five kilometers to the horizon and made no sound audible to the two observers.

Classification

Report No. 1 - Incident Near Pixing, China, 20 Aug 1960.

At about 8 pm one evening at the beginning of August 1960, two hunters, on their journey back to Pixing from a hunting expedition, had their backs on the ground resting at a place twenty-five kilometers northeast of Pixing. While lying there, one hunter had noticed a small light, a little larger than a star and the brighter, also above the western horizon and pass directly overhead, finally vanishing behind the horizon in the east-northeast. The light had taken about ten minutes to travel from horizon to horizon. It had been motionless and had had no halo. It had left no trail behind it and the observer had heard no noise. He had noticed, however, that the stars surrounding it had been obscured for a moment by the glow, as though the light had been a small part of a much larger object.

Alt: 4,500 feet (1,370 m), observed 15 July 1961 (time unknown)

4. unidentified flying object over Tatnayak

See 60

One day in July 60 a resident of TATINAK, 20 miles east of Sand Rock, 45°23'30", 129°27'45", had heard first a sound of an object the brother had seen the previous evening in the sky near 44°20'30" S latitude and 129°45'30", 129°15'45". The brother had been watching the street and noticed like an orange-colored fireball had just entered the atmosphere after sunset. He had first seen it, he said, rising from the northeast and it had described a trajectory towards the southwest, passing behind a range of mountains in the north-east.

The resident of TATINAK had his brother down the corner of the house and had resolved to watch the sky in the evening 15 July. At 2100 hrs the sky was overcast, but on the third the clouds dispersed, and in the evening, about ten minutes after sunset, he saw a yellow ball rise from behind mountains in the north-west. The observer called his brother to him and they together watched the phenomenon. It moved with a bright yellow light and described a trajectory across the sky from east, passing behind a range of mountains in the south-east. At the zenith of its trajectory the object had an elevation of about fifteen degrees above the point of observation. It had about fifteen minutes to travel from horizon to horizon and made no sound similar to the two observers.

1.3 India:

1.3.1: Report Nos.: 2000/001, 2000/002, 2000/003, 2000/004, 2000/005, 2000/006, 2000/007, 2000/008, 2000/009, 2000/010 (3 esp on) (SECRET)

Report No. 2000/001 (Date of Information, September 2000); unidentified flying object over Nanking Province observed by source from Tientsin (43-35 N, 120-15 E); bright light, greenish tint, moving eastwardly direction; observed for three minutes before disappearing behind a range of mountains in the northeast; no light or vapor trail, no halo, no sound; between 1800 and 2000 every day for about two weeks. The source, who we believed to be the same object was observed moving from the location in the northeast to the location in the northwest, taking minimum (4.5) minutes each journey but, on each occasion, seemingly adding 100 degrees about 5.75 degrees unaccounted to be American satellite launched 1 May 2000.

Report No. 2000/002 (Date of Information, 2000/2000); unidentified flying objects over Northern Shandong Province. Between 2000 and 0000 one night during the summer of 2000, source, while in Anzi Town (43-35 N, 120-15 E), observed a ball of red and white light spinning in the sky; remained in the sky for about 30 minutes; travelled on a straight course from west to east, passing directly over Anzi Town; color, roughly that of full moon; surface divided in two, one half red, other white; reported the speed at which a bullet flies when broken; no sound; light not sufficient to illuminate the ground; at about 2000, on Beidaihe Coast near Tientsin of 2000, source, while at a point about 60 kilometers west of Anzi Town, noticed a red glow in the sky over the mountain west of him; glow developed quickly into a cone of intense red light, slightly smaller than full moon, followed by a trail of blue and yellow light; object rose to an elevation of about 30 degrees, continued on a course

Classification

initially parallel to the horizon north of the point of observation; after 5 minutes disappeared behind high mountains to northeast of the point of observation; disappeared from field of observation, the object remained roughly the same size; no sound.

Report No. 2017/61 (date of information, May 1940); unidentified flying object rising over Western Sinkiang Province; about 2000, in May 1940, source observed an object rising from a point due west of Kuldja; elongated, black, discharged small tracers of flame from four separate points; initially observed immediately above horizon; visible for one minute; no noise, no illumination of ground during period of observation.

Report No. 2023/61 (date of information, October 1940); unidentified flying object found in hills to Kuldja area, Sinkiang Province; two white on account twice larger of which attached by wire to a basket and rubber balloon, smaller attached by wire to larger box which had instrument measuring panel (not and four-bladed propeller attached); smaller box contained batteries joined in single circuit to larger box (each battery had 17 or 18 July 1938 painted in Russian); Over period of time, many such devices found in area.

The following reports all give similar details on unidentified flying objects observed over Western Sinkiang Province:

Report No. 2034/61 (date of information, Spring 1939); object sighted in evening for a period of six weeks disappearing about 2000 each evening, following same course; never varied in size.

Report No. 2025/61 (date of information, September 1940); object observed about 2000; size of star with tail; no visible smoke trail; no sound.

Report No. 2039/61 (date of information, Summer 1940); object about size of full moon with bright red tail observed between 2000 and 2100 on two occasions within ten weeks period.

Report No. 2033/61 (date of information, August 1940); object first observed in June 1940 and again in August 1940 between 2000 and 2100 on both occasions; had tail of yellowish-white flames and white smoke; no sound.

Report No. 2030/61 (date of information, Spring 1940); object sighted at 2200 on Russian Orthodox Easter Sunday in 1940; jet of flame about equal in length to diameter of moon, color same as that of lighted match. Total time of observation about 5 minutes.

Report No. 2041/61 (date of information, Spring 1940); About 1000 in Spring 1940, object resembling glowing red cloud and size of full moon observed west of Kuldja; remained visible for half an hour; no sound.

Report No. 2042/61 (date of information, Winter 1939); Twice in winter of 1936, once in winter of 1937 and once in winter of 1939, sphere of yellowish fire, twice the size of the full moon sighted by residents of Tashkent. Object visible for thirty seconds or a minute, no sound.

Report No. 2043/61 (date of information, September 1940); Once in June 1940 and again in September 1940, about 2000, light, red in color and little larger than a star, observed by a prisoner of a penal labor camp; visible for approximately half an hour.

Report No. 2045/61 (date of information, Summer 1940); Two objects sighted by residents of Kuldja; the first one evening in summer of 1939; round object the size of a small star glowing with a reddish light; remained in view for about twenty minutes. The second appeared about 2000, summer of 1940 which appeared to be a glowing sphere of white light about size of full moon and appeared to be spinning; visible for half an hour, no sound.

SUMMARY:

Documented Information *Intelligence Report #2067/61*
Cited 25 February 1967. A Chinese peasant in Hong Kong in the course of 1966 was told by friends that a unidentified, unknown light had passed over the mountain during the night. Several days later he was told by friends that a man had found an object like the hills which they believed had emitted the light over Australia and had handed it in at the local government office. The peasant visited the office and described the object which consisted of an open box, made of a metal similar to tin plate, about 40 centimeters long, 20 centimeters wide and 15 centimeters deep. A staff about 15 centimeters long protruded from one end of the box at the end of the staff was a extended propeller, each blade of which was 5 or 6 centimeters long. Hanging from one side of the box there had been a wire about 1 millimeter thick and a meter long. Some paper a confined impression of wings, tailfeathers and pieces of cloth scattered inside the box and was unable to remember the layout. (SECRET)

north-east of Kaidja, for an object containing instruments which apparently landed in that area. Some instruments reportedly were found and submitted to Chinese authorities.

COMINT: These reports are significant in that they lend substance to the possibility of Sino-Soviet missile/rocket testing in Sinkiang Province. While the ...
... objects bear jet aircraft is not discounted, it is noted that ...
to Reporting Officer's knowledge, interrogations reports of sources from the Kaidja area, or from contiguous areas to Sinkiang Province, have not made mention of the presence of jet aircraft.

While emanating from different sources, observing from different locations in the vicinity of Kaidja, the information summarized above is considerably consistent in date, time of day, and description. Collocation among the three sources prior to the interrogations is not evident.

There are discrepancies in the reporting on origin and duration of flights of the object(s) which makes the possibility that several, rather than one object, were seen.

One of the sources (Report #3097) noted that "in the best of one of the youth's knowledge, no such phenomena had been seen in that part of the world either before or since that time, at least up until the moment of his own departure in early March 1959". The other two sources know of no one else who had witnessed this phenomena. This may indicate that missile/rocket success.
in this area; i.e., within ~~the last~~ ~~year~~ ~~or~~ ~~a~~ ~~year~~ ~~and~~ ~~a~~ ~~half~~.

The launching of balloons in the general area of the object sightings may be related to upper atmosphere research in connection with missile/rocket testings.

CHINA (Muliang) - A : AIR

Source : A peasant, resident of ALBALAN Settlement, who had left there in 1958.

Map : 8808 4695 (1:1,000,000) Sheet 350 (Edition 1)

1. Recovery of an unusual object

Summer 1958

One day during the summer of 1958 a Russian peasant in ALBALAN Settlement ($43^{\circ}55'N$, $63^{\circ}32'E$) had been told by some friends that a strange light had passed over the settlement during the night. The light had been star-shaped and yellowish. Two or three days later the same peasant had been told by some friends that a Kazakh had found an object in the hills, which they believed had emitted the light seen over ALBALAN and had handed it in at the local government office (known to the Kazakhs as Ima; at ALBALAN,

His curiosity aroused, the peasant had devised a pretext to visit the government office and had there seen the object. It had consisted of an open box, made of a metal that looked like tin plate, about forty centimetres long, twenty centimetres wide and twenty centimetres deep. A shaft about fifteen centimetres long had protruded from one end of the box and at the end of the shaft there had been a four-bladed propeller. Each blade of the propeller had been five or six centimetres long. Hanging from one side of the box there had been a wire about five millimetres thick and a metre long. The peasant had gained a confused impression of wires, batteries, and pieces of thick cardboard inside the box, but was unable to remember the layout.

CHINA (Sinkiang) - A : AIRFIELDS AND AIR TRANSPORT

Source 1 : An educated young local Russian, temporarily visiting KULDA.

Map 1 : RAF 1:1,000,000 Aerobimetallic chart Series GNC, 4495 Sheet X7
(Edition 2 - 1953).

UV and aircraft spots in KULDA area Date of Information: Aug/Sept
Date 1962

1. A local Russian temporarily in KULDA from the end of August 62 till the beginning of October 62 observed at night throughout that period a shining object that moved slowly across the sky. The local Russian temporarily in KULDA did not remember any noise associated with the object, and could not recall the direction of its movement, nor the timings of its appearance, but thought that both these varied. The object was larger and brighter than surrounding stars, and local Russian residents of KULDA held the opinion that it was an "American sphere" ("AMERIKIY Sfera").
2. One afternoon at the end of September 1962 a local Russian temporarily in KULDA heard a loud noise, a combination of roar and whistle, that lasted for about a minute. The noise started suddenly, but died down before ending. At the time of the noise the sky was clear, but no object or aeroplane was seen. Local Russian's resident in KULDA told the local Russian temporarily in that place, i.e. they thought the noise was made by the Americans.

Sometime during February or March 1963, Scuroo witnessed what appeared to be two vertical take-offs of unidentified flying objects from the center of the Soviet airfield (Installatier 8323, EE 0231-C3373) at 512200N-15702E (08 065948) west of KELLEGUTI. The two take-offs occurred within a three day interval and both times at approximately 0200 hours. Since the house from which Scuroo made his observation was located about two kilometers from the take-off point, he was unable to recognize or describe the flying objects. The only positive identification was the exhaust flame, which was bright red and grayish white at the end and the noise which he described as being louder than a normal jet engine under full power. The object ascended vertically for approximately seven seconds emitting a very low pitch sound and a higher pitched sound after the object leveled off and disappeared in a westerly direction.

b. About one week later another strange object appeared for about 10 minutes between 2230 and 2300 local hours. This object however was white and bluish white in appearance and had 4 or 5 appendages (rays of light) which at various times traversed over a nearby lake and around a small mountain at speeds in excess of those which could be expected of an aircraft.

c. On 19 June there was a re-occurrence of b. for about 5 minutes between 2230 and 2300 hours local. NOTE THE 19 JUNE DATE.

2. The 4 July 1965 edition of Diario Ilustrado, Santiago newspaper contained the following:

"Nine members of the base Pedro Aguirre Cerda observed the apparition of a curious celestial body while doing routine meteorological observations for a period of 20 minutes. They followed its maneuvers noting its white luminosity at an angle of 45° seen in the southwest of Deception Island moving northeast-southeast at high speed on an oscillating course. The radiogram adds:

'On the 5th Chileans communicated with the English Base-British informed that the day before at 1945 five members of that base saw celestial object in the north moving on a zig-zag course and later stopping from 5-10 minutes, then disappearing at great altitude. It was red, then yellowish, then changing to a green color. The angle was estimated at 20° and of the size of a star of the first magnitude.'

"Communiqué from Argentine Detachment on Deception Island between 1942 and 2044 hours said that 16 persons, among them three Chileans, observed a celestial object in the north of the island going north-northeast at very slow speed with an oscillating course and of changing yellow, green and orange color, leaving a tail at an elevation of 30° of lenticular shape disappearing at altitude in cirrus clouds and whose trajectory was followed by theodolite and powerful field glasses. Corporal Uladislao Duran Martinez who was with the detachment took 10 dispositive pictures in color through the Theodolite and field glasses.

"Same day. Detachment Orcadas of Argentina at 1703 hours. Two meteorological observers saw a celestial object moving at very high speed during a period of 15 seconds with a parabolic trajectory moving from east to west with luminous white color which caused magnetic changes in their geo-magnetic instruments, registering changes notably out of the normal. Between the base mentioned no previous communication existed that could induce a group psychosis of that type of observation--which fact is estimated to be of great interest to interested scientific organizations."

3. The 7 July 1965 edition of El Mercurio, Santiago newspaper carried the following:

"Eighteen days ago, the base Pedro Aguirre Cerda announced that at 1600 hours on the 18th of June all the personnel of this base saw celestial body of intense luminosity--a star of the first magnitude. It appeared in the east of Deception Island at an elevation of 60° making a turn of 180° to the left and continued on an eastern course. The object previously made a turn to the right heading in a southerly direction. This phenomenon was seen for a period of 40 minutes--meteorological conditions clear, but dark. Strong winds prevented mounting photographic equipment. On Saturday a similar body was seen at a lower altitude of 45°. It passed at high velocity and was seen for 20 minutes. At this time it was seen by Chilean, Argentine and British bases in the Antarctic.

"The Commander of the Base (Pedro Aguirre Cerda) of the Chilean Air Force, Mario Jahn Barrera explained the phenomenon seen by the members of his base. They saw an object moving at tremendous speeds giving off a blue-green light which caused interference (electro-magnetic) in meteorological equipment

located in the Argentine base directly in front of our location.

(Leave Blank)

"This is the second time in less than a month that we have observed these celestial bodies. The first was on the 13th of June and the last this Saturday at 1920 hours. It was during this last observation when all our group saw this phenomenon while making atmospheric observations. The color of the body was red yellowish changing to green to yellow and to orange. It was at a short distance at an angle of 45° with respect to our position in the extreme north of the island. It later took a zig-zag course. During one of its maneuvers it maintained a stationary position. Rapidly with the apparatus at hand (theodolite and long range binoculars), we observed this body in a stationary position for a period of 20 minutes. During this period Corporal Uladislao Duran Martinez of our group quickly got his camera and took 10 photographs (more or less) which he believes to be perfect. He not only took the pictures directly but he also took them using the theodolite and the long range binoculars. Unluckily, we must wait until March of the coming year in order to develop these pictures. To corroborate my statement I later communicated with the English base. People from this base said that they had observed an object of star of the first magnitude. This communication was made at 2030 hours. The same thing happened with personnel of the Argentine base Oread. In this case, we were more certain that we were dealing with a strange solid object because their electro-magnetic equipment showed abnormal interference from the moment during which it appeared.

4. The 18 July edition of La Nacion, Santiago newspaper carried the following:

"On 17 July several people in Colonia, Uruguay observed the landing of a flying saucer on a beach. The report stated that the strange object remained on the beach close to two minutes and then continued silently on a vertical flight toward the River de la Plata where it remained suspended in space for several minutes at an altitude of 10 meters, later continuing in horizontal flight calculated at approximately 500 meters.

"The people who viewed the object stated no troops were observed; that it left an "X" on the beach similar to a retractable mechanical foot and that it was reddish in color and difficult to look at due to its lumonosity.

"A little later strange objects were sighted flying over Buenos Aires. One of the spectators took a photograph of the objects."

5. The 20 July edition of El Mercurio, Diario Ilustrado and La Nacion carried accounts of a strange object flying in the vicinity of Antofagasta for a period of approximately 25 minutes.

"On 19 July in the Provinces of Tarapaca and Antofagasta, Chile, a strange object was observed flying at a high speed ejecting explosions of great force and very loud. The object was first sighted at 1555 and was described to be in the form of a cone with the point to the rear. It was observed by six laborers at the Maria Elena Nitrate Mine."

6. On 23 July 1965 the Diario Ilustrado, Santiago newspaper contained the following:

"On the 20th of July at 0400 in the morning an occupant in a hotel at Chañaral was awakened by a loud noise. He looked out the window and saw an intense red object that had a diameter of approximately 10 to 12 meters land on the sand in the vicinity of the hotel and 4 to 5 minutes thereafter it left with a violent noise and was seen no longer."

Comments of reporting officer: There may be a connection between some of the sightings and the U. S. Space program, e.g. A check with NASA indicates that objects 1965 46D and 1965 46E which were part of the 1965 46A (COSMOS 68) series which was launched on 15 June had a decay date of 19 June 1965.

time and area of re-entry are unknown.

(Leave Blank)

A check with Chilean Air Force commanders at Antofagasta and Iquique reveals that none of the personnel of the Chilean Air Force at those places observed or heard the occurrence reported in that area on 19 July.

Some credence must be given to the existence or the occurrence of some type of phenomenon in as much as reports emanated from such widely reported locations as to rule out mass hysteria or collusion.

Amembassy, Santiago, Chile Joint Weeks 27 of 9 July carried item on initial report of sightings of unidentified flying objects.

SUMMARY: (Leave Blank)
Unidentified flying objects continue to be reported at irregular intervals. This report contains an eye witness account by one of the Chilean National Airlines pilots.

"Sensational declarations made by pilot Marcelo Cisternas, Chief of LAN flight operations. Strange experience lived by the five crew members of the DC-6B over the skies of Arica.

"It was something mechanical--zigzagging--its movements were not precise--suddenly it changed direction and came directly toward us--it gave me the impression that it had located us with radar..."

"These are the declarations made by Marcelo Cisternas, LAN pilot, who together with all the crew members saw a strange flying object in Arica on Monday, 6 September.

(Leave Blank)

"During 13 to 14 minutes this strange object followed us. It gave me the impression that when it located us it tried to identify us. At once we requested information from the Flight Control Tower in Arica and Iquique. We were informed that no other flights had been scheduled in that zone. Then I told them what we were watching."

"The pilot of the DC-6B LAN Flight #904 is Chief of Flight Operations. He has been a LAN pilot for eleven years.

"I have never had a similar experience. I didn't believe in "them". It was not an optical vision due to atmospheric reflections. I am sure it was a mechanical apparatus. The plane was flying at an altitude of 8,500 feet, at a speed of 500 Kms. The night was cloudy and without stars. I was not the only one who saw this strange object, the co-pilot, the engineer, hostess and steward also saw it. It emitted a light of an intense color, then changed and turned to radiant white. It was suspended at a distance of about 3 Kms. from us, in a straight line--it was more or less 2130 hours. Suddenly the same way it appeared it withdrew at an incredible speed, without leaving any track.

"Pilot Marcelo Cisternas was interviewed by La Nación when he arrived, and then called urgently to the LAN Vice President's Office."

Comments: Many sightings have been reported in the northern area of Chile. Personal conversation with the Chilean Air Force Wing Commander at Antofagasta reveals that none of the Chilean Air Force personnel in that area have been fortunate enough to catch sight of one.

5. SUMMARY:

(U) This report concerns information condensed from two news articles from the Surabaja press, one in English and the other translated into English from the original. Both news articles are on the same subject, namely, objects falling from aircraft performing acrobatics and efforts on the part of AURI to dispel apprehensions of Surabaja populace that enemy aircraft are being shot down.

(Leave Blank)

1. (U) Capt SUMAKNO, Deputy Commander of Squadron 3 at his ~~Yogyakarta~~ Headquarters in PERAK AFB, Surabaja, said during a press interview that Squadron 3 is training a number of young pilots in certain skills, including so-called acrobatic flying. During training flights over Surabaja, parts of the planes have fallen off and were found by people in the villages. This is not unusual, the Captain said, and people should not ~~worry~~ worry about it. Capt SUMAKNO and Capt UMAR, an officer from Operations Wing 002, both said there are aircraft training over Surabaja every day by pilots who have just graduated from the AURI Aviation Academy to become fighter pilots.

2. (U) Both captains said that on 1 Oct 64 the top fell from an aircraft during aerial acrobatics. This plane was not shot down. On Oct 2nd a crash helmet fell

FLYING SAUCERS OVER MONTEVIDEO

A group of people in Uruguay have taken charge of investigating and publicizing the problem raised by repeated observance in the atmosphere of our planet of some apparati that could not be identified and which are grouped under the international denomination of UFOS (Unidentified Flying Objects) or OVNI'S (Non-identified Flying Objects).

On 29 April 1958 several persons held a meeting to organize and join forces with other centers abroad for the purpose of learning more about and becoming acquainted with every aspect connected with the mysterious objects. Thus it is

that the Investigation Center for Unidentified Objects (ICUO) was established, which maintains that the UFO's exist, that they are machines, and that they are of extraterrestrial origin. Simultaneously another man - Raul Rincón Pareja - eight years ago devoted himself to astronomy and became concerned with the enigma of the flying saucers. In this capacity Rincón Pareja has certainly come to be the Uruguayan with the most information on the subject. Moreover, he owns two telescopes: one is an azimuthal reflector; the second one is 30 centimeters in diameter and 2.10 meters in focal distance, with a 760 enlargement.

CASES IN URUGUAY

Incidents recorded by ICUO for Uruguay from 1950 up to the present time amount to 200 observations. The following is obtained from a study made of 60 absolutely confirmed cases: 72.6% were made by civilian observers; 18.6% by technicians (astronomers, pilots, meteorologists), and 8.8% by military persons.

In a meticulous job by ICUO, numerous cases are recorded. One of them is very interesting because it refers to an official document of Carrasco National Airport. On 1 March 1954, the Tower Control Chief, Pedro V. Ocampo, reported to the Airport Chief that he had observed a "moving aerial body of an extraordinary shape and speed."

At approximately 1430, Ocampo and the ACC operator, Mrs. de Rizzardo, were observing the sky in a northeasterly direction when they were able to localize an oval-shaped object which, while remaining stationary, quickly changed shape. "With our attention concentrated, we located it at 30° azimuth and at a vertical angle of 15°," he said.

NO INFORMATION

Immediately following, they observed another similar form, but a smaller one, which was located below and then behind, quite close, both of them making a vertical oscillating ascent, only to disappear rapidly. After five minutes the ACC operator again observed it, with an azimuth from 120° to 130° and a vertical height of 20°, with an oval-like shape and a very fine extension, and two smaller discs on its extremities.

When she turned to take the binoculars, the object shifted position at high speed toward the west, and when she got it in focus, it was over the Minas mountain range, disappearing. Later, a radio broadcasting station called the Tower by telephone "asking for information as to whether we had observed anything in the sky. We didn't give any information".

The ICUO, after analyzing an infinite number of cases, concluded that the "shape, propulsion, the effects caused in its drive, the speed and performance recorded by the UFOS's provide the guide lines showing that behind the flying saucers there is an intelligence that creates and drives them."

PILOTS ALSO

From a large collection of portfolios in his possession, Rincón Pareja selected one example because of its documentary value. On 19 December 1960 the crew of a PLUMA plane - CX-AQJ - under command of Juan José Figueroa, reported an episode that had happened to him. The plane took off from Carrasco at 2230. Five minutes afterwards he received a message from the Control Tower asking him whether he had observed any strange object in his flight line.

The Tower asked that question after having received many telephone calls from Pocitos and Malvin stating that a flying saucer had been seen. At that time the plane was leaving the Uruguayan coast and was flying over the neighborhood of

the Cero. Underneath it appeared what crew members described as an oval object which seemed like an airship driven by a speed changing every few seconds.

The contrivance gave off sparks having a luminosity ranging between white and an intense red. Moments later it was no longer seen.

A CONCLUSION

From all these incidents Rincón Pareja draws the conclusion that the flying saucers are considerably more than a collective optical illusion, and that behind them powerful forces are being moved that he understands belong to more developed beings than the inhabitants of the earth.

"The stopping of motors, silencing of radios, radars, and the discharge of the platters are actions from an electromagnetic field created by the flying saucers. This same field would maintain an atmosphere around the airships by which they would be able to displace themselves in interstellar space, in the gaseous medium surrounding the earth, and even go inside the depth of our seas," Rincón Pareja says.

COMMENT: During the past several months there have been numerous reports of so-called "flying saucers".

SUMMARY:

Translation of four messages provided by the Chief, Argentine Navy Hydrographic Service concerning unidentified flying objects sighted recently in Antarctica is submitted. Message originators were Commander, Argentine Base at Deception Island (64 deg 59 min South 60 deg 32 min West), and Commander, Argentine Activity at Orcadas (Laurie Island, South Orkney Islands) (60 deg 45 min South 44 deg 43 min West). The messages summarize sightings by Argentine personnel, and reports that British and Chilean base personnel at Deception Island have also reported unidentified flying objects. Messages are quoted verbatim and have been provided without comment.

SUMMARY: This report forwards a translation of a Chinese Air Force special study of Unidentified Flying Objects over TAIWAN. The study reports and analyses seven sightings of unidentified flying objects over Taiwan and the Formosa Strait at 1800-2100 hours local time (1000 - 1110Z) 10 July 1966. Information contained in this study, such as times of sightings, physical location of observers, appearance of the objects and impact area of the one object that landed off the coast, should prove valuable to U.S. aerospace authorities in correlating re-entry data.

(Leave Blank)

General Situation:

- a. The time of discovery was approximately several minutes after 1900 hours 0 July. The time of discovery over Hsin-chu was probably misquoted.
- b. The points of discovery spread all over Taiwan.
- c. The colors of the light objects included red, blue and white.
- d. With the exception of Tung-yin, no altitude was indicated.
- e. With the exception of I-lan and Kuan Kuang, no direction was indicated.

Study:

- a. On the basis of their time of discovery over a wide area:

(1) The unknown flying objects discovered over Taiwan spread between east longitude 120.1 and 121.7 (between Tung-yin and I-lan), between north latitude 2 and 26.2 (between Heng-ch'un and Tung-yin). They covered an area 460 kilometers from north to south and 160 kilometers from east to west. It is felt that there must have been a greater number spread over a wide area on the nearby sea and ocean that were not seen. On the basis of the extent of the area over which these objects were discovered, they could not have come from any weapon that had been fired from the ground. Although they fell over a wide area, their time of descent was very short. Therefore, it is felt that they had descended from a common starting point at a very high altitude. They dispersed further and further apart as they descended. They could be seen with the naked eye as greater incandescence resulted from increased friction as they approached closer and closer to the earth through heavier atmospheric density.

- b. On the basis of the colors of these unknown flying objects:

(1) The illuminated object must be made up of more than one substance. The light generated as a result of heat from friction was different due to differences in the degree of heat resistance and conductivity, and the difference in the smoothness of the surfaces of the disintegrated bodies during their descent.

(2) On the basis of the above statement, these unidentified flying objects were probably bodies-fallen satellites or second and third stage rockets that had entered orbits then disintegrated in the earth's atmosphere after they had either encountered a malfunction or had performed their ultimate mission.

3. Conclusion:

- a. There are numerous unannounced American and Russian space satellites. It is possible that some of them may disintegrate in the earth's atmosphere.

b. On July 9, the Kung Shang Jih Pao, Hong Kong, published the following report on its second page: "Washington, July 7 (AFP) The United States announced today that the 29 ton satellite that went into orbit on Tuesday (July 5) had broken into pieces in space on the same day." Therefore, it seems possible that the unidentified flying objects discovered over Taiwan could be some of the broken pieces of the above mentioned 29 ton satellite."

COMMENT:
1. [REDACTED] The first four sightings list the observer as unknown. The last three sightings list officials (police, military) as observers. This is probably an indirect method to indicate source reliability of qualified vs unqualified rather than known vs unknown.

2. [REDACTED] The 1800 time of sighting at Kuan-hsi may possibly be an even one hour error made either by the observer or by the people who prepared the study. The sightings

ali into two groups; a south grouping from 1900 to 1905 and a north group from 908 to 1910. These groupings suggest a southeast to northwest path. There are two unaccountable discrepancies; the 1800 sighting being one hour off from the other six, and the mention of a north to south flight path at the I-lan sighting.

15. SUMMARY: On 8 April 1966, an unidentified object was reported over the city of Rivera, Uruguay. According to reports of the many citizens who viewed the object, it remained in the vicinity of Rivera for approximately 1 hour 40 minutes beginning at about 3:00 A.M. A radio announcer from International radio of Rivera by the name of Duarte, viewed the object, and reported his views over the radio. The object was spherical, changing color constantly, could hover in one spot for long periods of time, and when it moved left a brilliant glow in its wake.

COMMENT: This is just one of several reports of unidentified flying objects that occasionally appear in the press.

1. On 22 March 1967 the crew of a Brazilian Air Force C-47 and the crew of a Cruzeiro do Sul photomapping aircraft reported having seen a flying saucer in the vicinity of Porto Alegre, Rio Grande do Sul. The object was initially sighted by the BAF crew who described it as a reddish colored full moon that appeared to be flying in circles. The BAF C-47 advised Salgado Filho Tower of the sighting, and the tower asked the Cruzeiro do Sul aircraft to intercept and identify the object. The Cruzeiro do Sul aircraft made contact with the object and pursued it for 15 minutes before it finally disappeared. No pictures were taken of the object. In addition to the reported sightings by the aircraft crews, the object was also reportedly seen by ground observers in the Porto Alegre area.

2. A more recent reported sighting occurred on 30 March 1967 in Rio Comprido. However, this one was reported only by ground observers. The object was described as completely white, silent, flying at low altitude, and would disappear and re-appear at regular intervals. This particular sighting received very little publicity in the news media.

COMMENTS: As yet the Air Ministry has not issued any official comment on these sightings and is presently studying the statements of the aircraft crews and ground observers.

15. SUMMARY:

(Leave Blank)

1. This report forwards a narrative written and signed by J. R. CARLOS and concerns his sighting of UFO's 23 April 1967. It should be noted report is submitted as an IR since AFR 80-17 is not available this station.

COMMENTS OF REPORTING OFFICER: a. On query, Sr. Carlos described his portrayal of the zig-zag area (on attached drawing) as representing his conception of the total path of one object which changed direction in rapid succession, producing an explosion or brilliant flash at each change of direction. He thought also that the phenomenon he observed might have had some sort of connection with SOYUZ I which was reported to have crashed 24 April.

b. Source became visibly agitated and excited while recounting the story. He mentioned also that his children were pulling at his elbow to use the binoculars as the two objects he described approached one another. Therefore, he was unable to state whether an actual collision took place or what might have transpired. He knows of no one else besides himself and family who might have seen the objects.

c. This report has been delayed in submission to try to ascertain whether there were other observers. No other observers have been located and no local publicity has been generated on the subject. Source is a responsible citizen, a florist in MIXCO (1439N/090 36W), a small town about 5 miles West of Guatemala City near the Pan American highway. It should be noted Source came in of his own accord after requesting an appointment by phone. He first reported to the MILGP and was referred to DATT/AirA. He was firm about not wanting any publicity as he did not wish to appear foolish or overly imaginative. His desire was simply to report the incident. RO feels he seemed believable; there was no joking about the subject and there is not doubt in mind of RO that Source saw something which was to him unnatural or at the very least highly unusual.

TRANSLATION OF WRITTEN NARRATIVE BY J. R. CARLOS

Memorandum Concerning Phenomenon Observed Sunday, 23 April1967 At Approximately 8:00 P. M.

At approximately the hour indicated above, my wife was watering the flowers in the window boxes of our house; I was near a bedroom window which she had left open. She asked me to close the window and when I approached it I was surprised to see the sky so clear and full of stars. At this moment I noticed a star of surprising magnitude; my surprise was even greater when I observed it was moving from the Southwest to the Northeast. Its size was greater than Venus in its most visible periods. I called to my children and to my wife; they saw the star (as we will call the object) which was moving and had a very intense brilliance, with no change of color, giving off a clear yellow light with uniform rays. We ran out to the fields near our house and I carried binoculars (Zeiss) which are very powerful.

As I leaned on a fence to control my nerves, I called out to my children that I saw a star of a dull red color, without the rays which normally appear around a star; it was moving toward the star which had first interested us. At first I thought it was an optical illusion since the other star was also moving in the same direction, but, on training the binoculars on the red star, I noticed it was increasing in size and therefore must be moving. I called out to my children to look at the second star but found it was not visible to the eye and it was also being covered by a cloud. The two stars rapidly approached each other; both appeared to be at the same altitude or height on horizon but the red star was moving faster. On looking again at the area I could only see the large star which had somewhat changed its direction, moving more to the North. (Larger star is the yellow star.) I realized this change of direction later; I did not stop to think about it at the time but when I was reconstructing my observations I remembered it. I did note at the time that the larger star was moving more rapidly but without losing brilliance, and while I was observing it there was no change of color or any flashes.

The drawing attached shows the larger star at the moment I saw multiple red lines moving from one side to the other, making a kind of zig-zag and, at the end of some of these lines, what appeared to be small rays, completely rectilinear, forming small stars of enormous brilliance. The lines were red and the small stars formed at the end of the lines were of a very brilliant clear red color. At this moment the clouds lifted and my wife could see the multiple lights or stars that formed.

In summary, this phenomenon seemed to come from one object which moved rapidly from one place to another, leaving behind a red line which faded out with a sort of flash; it was not like the explosions of fireworks in which there are a number of rocket flashes at the same time.

I believe that the two objects crashed together but, unfortunately, I let my children use the binoculars and tried to direct their vision toward the two stars; also, the observation took place during some 80 seconds so there was no time. I do know that the larger star was already somewhat out of the zone where I saw the explosions when they appeared. It could be that there was some delay in finding the area when my children returned the binoculars, but when I again located it, it was difficult moving fast and had somewhat [redacted] to find as it was changed its trajectory. Signed:
J. R. CARLOS C.

8. SUMMARY: This report mentions a UFO sighting near KASHGAR, an oil field near BAI (4147N/8152E) and reported uranium mining at TALDY (4337N/8149E).

1515

COMMENT: There is a remote possibility that the UFO described in paragraph 1. of this report is in fact an eyewitness account of several Chinese Communist MREB nosecone re-entries in the vicinity of KASHGAR (3931N/7558E). To be sure, the description in the report is not convincing, and it is not known if the interviewer entertained the nosecone possibility when directing his questions to the Source. The time period given for the sightings as August through December 1965 is also earlier than most estimates for Chinese Communist MREB flight trials. However, the KASHGAR area is roughly in the vicinity of the furthest impact area (1,100 NM down range) of the test range facilities at SHUANG-CH'ENG-TZU (DIA SIS 106-65).

SUMMARY:
This report forwards translations of two articles which appeared in the Petit Marocain, 14 January 1967. Each article is separately identified as to source. Although the two articles are very contradictory, the page one coverage afforded this sighting demonstrates a high level of local interest in the subject of UFO's, and presages future reporting which could be valuable in pursuit of Project MOON JUST.

L39

AGADIR: 13 January (from our private correspondant): Science fiction or science? A luminous object goes across the sky and falls down into the sea. This phenomenon took place on Thursday evening. Complete disagreement among the witnesses: some say that there was a big explosion, others assert that they didn't hear anything.

On Thursday, around 1930 hours, the sky above Agadir was crossed by a very luminous object flying in the northeast - southwest direction.

The white trail left by the object turned into a rainbow. The object fell down into the sea with a deafening sound, according to some witnesses.

Is it one of those rockets which go out of control from time to time? It is possible but the idea that it might be a meteorite seems to be prevailing among the population.

AGADIR: 13 January (Maghreb Arab Press): There were a few clouds in the sky on last Wednesday and by mere luck, men, women and children had been watching for thirty minutes the coming out of the moon in order to know whether Ramadan was over and to celebrate Aid El Fitr. Suddenly, at 1743 hours, a round luminous object with a fantastic speed and an exceptional brightness like the beams of a powerful searchlight appeared in the space above Agadir.

First, people thought it was a meteorite, and then a Telstar-like satellite. Many thought it was a common shooting star but they had to change their mind as the sight was turning into real science fiction.

Mr. Juan Dias, a Spaniard and chief of the "Radio maritime of the port of Agadir" department asserts that "it cannot be a shooting star or a satellite which had left its orbit. The object had an impressive volume, four times bigger than that of a star. It was seen two or three seconds before the cannon shots which announced the end of Ramadan. Its course was absolutely fantastic. It lasted three or four seconds. Meanwhile, the luminosity of the mysterious object lighted the whole town in an extraordinary way and then suddenly and probably when it came in touch with the atmosphere it disintegrated more mysteriously. The luminosity which had turned blue became red and finally yellow."

Mr. Dias said that being an extremely interested witness he can assert the disintegration was not followed by any sound.

"The pieces, if there were any pieces, he added, have completely melted in the atmosphere even before reaching the sea."

SUMMARY:

1. This report forwards a translation of an article which appeared in the *Petit Marocain*, 2 April 1967. This item was not carried in the other daily newspapers, but is significant as it indicates continued local interest in the subject of UFO's.

387

37980-147

Petit Marocain, 2 April 1967: Flying saucers over Kasba Tadla.

Several persons are said to have seen on 28 March around 1915 hours a round object 2.5 meters in diameter land on the roof of a house in Ancien-Gue, then resume its flight and disappear in the sky.

According to the information given by a witness, a former pupil in the school and now student in Marrakech, the object was gliding in a circular movement and then stood 50 centimeters above their roof.

It looked to have a long shape with two distinct ends but it resumed its circular shape quickly by rotating on itself and transmitting a vivid red light. Neighbors, passers-by and children are said to have looked for a few seconds at this unusual sight.

objects since 1952. His first sighting was of an object on the ground near Auckland. In 1956 he observed two UFO's -; six witnesses were present on the first sighting and one on the second. In 1957 he saw one UFO. He saw two near Ohakea (4012S-17523E) in 1965.

3. Later Developments. In September 1963 the Deputy for Technology and Subsystems informed the Attache that Capt Cathie had no basis for his beliefs. (See enclosure #2). On 19 October 1965 Cathie telephoned from Auckland and stated that he could prove mathematically that an aerial (Antenna) was located at Santa Cruz, Lat 167 Long 12. He claimed that he could show a relationship between the 1908 Siberian explosion and the magnetic compass variations which existed at the Santa Cruz Islands in the South Pacific. Also, just prior to this contact, Cathie indicated his intention to publish the information he had collected. (See enclosure #3). In December 1965 the Air Attache, Wellington, forwarded additional information to AFSC (FTD). (See enclosure #4). Again on 23 February 1966, additional findings and calculations were forwarded to AFSC (FTD). (See enclosure #5). Finally, on 10 August 1966 the Attache dispatched more calculations provided by Capt Cathie. (See enclosure #6).

4. Recent Events. Capt Cathie again contacted the Air Attache office about a month after the writer had arrived for duty. This was in the second week of March 1967. He was advised that if he had additional information he could submit it for evaluation. On 14 April 1967, he sent a letter outlining some of his theories, including a diagram and certain mathematical computations. In addition he attached a penned note to report another UFO sighting by two pilots of the NAC organization, a Capt H. Findlater and First Officer Watts. (See enclosure #7). After some more conversation, Capt Cathie asked if the writer would meet him in the Office of a book publisher to discuss his contemplated book, "Harmonic-33". This meeting was held in the offices of A. H. & A. W. Reed, Publishers, 182 Wakefield Street, Wellington, N.Z. During this meeting, the publisher and Capt Cathie's editor, (a Mr. Smith) discussed the theory Cathie has developed. The book is now about 6 months short of publication. While in this meeting Cathie made the statement that he could predict the time of the French Atomic Tests at MURUROA Island, based on his mathematical calculations provided he could get reasonably accurate figures upon which to base his computations. The publisher, editor and the writer all expressed amazement but Cathie was firm in his statement. He was asked to present his comments in writing which he has done. (See enclosure #8).

COMMENT: This man is not a typical "UFO NUT". At one time his employer, NAC, apparently thought he was a little "off" on the subject, but now offers no objection to his work in the field. He has no ax to grind or special interests other than to prove his theories. When asked if he had placed any of his calculations into a computer for verification, he stated that he had only used an ordinary office calculator. The central theme of his book "Harmonic-33" will tend to show that some intelligent force from outer space is replotted a world grid which probably existed eons ago. He alleges that these "beings" are harmless but that they are following a pattern which he is only now beginning to prove. His theory that atomic explosions to be successful must follow a precise time and mathematical pattern is beyond comment. However if the forthcoming French tests fall into such a pattern then further investigation may be in order. During Cathie's several conversations with the writer he mentioned several times his belief that the strange object photographed by the USNS ELTANIN, 1965-1966 geodetic survey vessel, was actually an antenna placed on the sea floor by the outer space "beings". He further alleges that these antennas are located in other parts of the world, some of them several miles below the earth's surface. When "Harmonic-33" is published a copy will be forwarded with a reference to this report.

SUBJECT: UFO Sightings as Plotted by National Airways Transportation Corporation Captain

TO: AFSC (FTD)
Wright-Patterson AFB, Ohio 45433

1. Attached prints were given to me this date by Captain B. L. Cathie, National Airways Corporation of New Zealand Airline Captain.
2. Captain Cathie visited with me for about one half hour. I observed this New Zealander to be not only rational but intelligent and convinced that certain UFO's he and others have seen are from outer space - probably Venus. He hesitated in expressing his beliefs re the Venus origin explaining that it usually tended to convince people that he was a bit of a 'crackpot'.
3. The pictures and descriptions on reverse sides are self-explanatory and are forwarded for your information.
4. If you are interested, Capt Cathie can elaborate considerably on his findings in accordance with AFR 200-2. After further questioning, he explained that he could best portray his findings on a world globe at least three feet in diameter. It would be necessary for your office to furnish the globe - or funds to purchase one.

28 SHERWOOD AVE...
TE ATATU,
AUCKLAND.

28TH SEPTEMBER, 1965.

COLONEL J.J. BURNETT,
AIR ATTACHE,
UNITED STATES EMBASSY,
WELLINGTON.

DEAR SIR,

SINCE SHOWING YOU THE INFORMATION I HAD GATHERED ON U.F.O'S SOME WEEKS BACK, A FEW MORE INTERESTING FACTS HAVE COME TO MY NOTICE.

I HAVE A REPORT WHICH STATES THAT THE 'CANBERRA' U.F.O. WAS SIGHTED IN THE AREA JUST BEFORE THE SIGNALS FROM THE MARS SATELLITE WERE BEING RECEIVED, AND THAT IT LEFT SOON AFTERWARDS. IT WAS APPARENTLY HOVERING NEAR THE RECEIVING STATION DURING THE TIME THE GARBED SIGNALS WERE INTERCEPTED.

ALSO THE SATELLITE ITSELF WAS APPARENTLY $7\frac{1}{2}$ MINUTES LATE IN EMERGING FROM BEHIND MARS, CAUSING MUCH PUZZLEMENT TO THE SCIENTISTS.

THESE FACTS APPEAR MOST SIGNIFICANT TO ME, ESPECIALLY WHEN THERE IS ABSOLUTE SILENCE FROM THE PRESS AND PUBLICATIONS SUCH AS 'TIME' MAGAZINE.

ALSO TWO WEEKS AGO THREE U.F.O'S WERE OBSERVED IN THE DARGAVILLE AREA. SOME OF THE CREW OF A NAVAL COASTAL BOAT SAW THEM BESIDES SEVERAL CIVILIANS. I CHECKED MY MAPS AND SURE ENOUGH TWO OF MY PLOTTED TRACKS CROSS AT A POINT ON THE WEST OF DARGAVILLE TOWNSHIP. FROM A GENERAL INDICATION OF THE NEW ZEALAND SIGHTINGS I BELIEVE THAT THE GRID TO THE NORTH OF DARGAVILLE ON THE WESTERN COAST HAS YET TO BE COMPLETED. FURTHER SIGHTINGS IN THE NORTH MAY CONFIRM THIS.

I AM MOST CURIOUS TO KNOW WHAT RE-ACTION WAS RECEIVED FROM THE STATES TO THE INFORMATION I SUPPLIED.

IF THE RE-ACTION WAS NEGATIVE I FEEL THAT I AM COMPLETELY FREE TO PUBLISH ALL THE INFORMATION THAT I HAVE GATHERED. IN THIS WAY I AM SURE THAT FURTHER FACTS WILL FIND THEIR WAY TO ME SO THAT I MAY BE Hearer TO THE COMPLETE ANSWER.

I AM ON INDEFINITE LEAVE AT THIS TIME DUE TO AN EAR OPERATION AND DO NOT KNOW WHEN MY NEXT VISIT TO WELLINGTON WILL BE. I WOULD BE MOST INTERESTED TO HEAR OF ANY DEVELOPMENTS.

I REMAIN,
YOURS FAITHFULLY,

USAFA witness : No

circumstances exist.

CAPTAIN B.L. CATHIE.

14th April 1967

Colonel L.H.Walker,
Air-Attache,
American Embassy,
WELLINGTON.

Dear Sir,

During the last two years, I have made an intensive study of the "Saucer Phenomena", and sincerely believe that I now have sufficient mathematical and geometric proof to show that these "vehicles" are actively engaged in re-constructing a navigational type grid system over the surface of the whole world.

Up until now, I have passed on some pieces of information to the American Embassy, but realise that I cannot prove my case until all the data I have discovered, has been assessed as a unit. I am, at the moment, compiling all the evidence I have into book form and this will be published sometime late 1967.

I believe my theories to be correct because of the following reasons:

- (1) Once I had found the geometric pattern of the grid structure, I broke the polar sections down into mathematical co-ordinates and found that the values were directly connected with speed of light - mass - gravity acceleration.
- (2) The mathematical geometries of the grid structure can also be connected directly with atom bomb tests. I have found that the same geometries apply and that atomic explosions have to be carried out on geometric positions on the earth's surface. Also that due to the special geometric harmonics required to disrupt an atom, the sun has to be at certain latitudes in order for an explosion to take place. In fact, I now believe that the sun actually triggers the bomb when it passes through a certain geometric position in relation to earth.

To check my theory, I used the series of atomic tests carried out by the French at Mururoa Island in the Pacific.

At the time of each explosion, the sun was found to be at a particular distance, in minutes of arc, north of the latitude of Mururoa Island. These distances co-incided exactly with the co-ordinates I had derived from the U.F.C. grid system which to me, proves it must exist.

I also found that the distances in minutes of arc from Mururoa Island to both the American Scientific Base at Blenheim, N.Z., and also the aerial type object photographed by the "Eltanin" off the coast of South America, is 2640. This figure, I have found in the grid structure, to be the connecting harmonic

End 7 8680 1567

between speed of light and mass:

$$\begin{aligned} 1703 &= \text{mass harmonic (grid)} \\ -\frac{264}{1439} &= \text{grid harmonic as above (264 or 2640)} \\ 1439 &= \text{speed light harmonic (grid)} \end{aligned}$$

The grid co-ordinates which co-incided with the last series of French tests, are as follows :

$$\begin{array}{lll} 2695 &) & \\ 2569.5 &) & \text{Distance of the sun north} \\ 1580 &) & \\ \text{Between 1309 and 1310 } &) & \text{of Mururoa in minutes of arc.} \\ \text{Between 1062.3 and 1063 } &) & \end{array}$$

Possibly some of this series will be tried again in the next tests, but more than possibly, they will attempt to get results with different combinations of the formulae.

Some of the co-ordinate, as found from checking American and Chinese tests, could be as follows:

$$\begin{array}{lll} 3640 & \text{Nevada test } &) \\ 3930 & \text{Chinese " } &) \quad \text{Distance of sun} \\ 2966 & \text{Nagasaki } &) \quad \text{south of testing} \\ 1860 & \text{Russian " } &) \quad \text{grounds.} \end{array}$$

It appears also that atomic stations are constructed on geometric positions to produce breeder reactors.

Los Almos

Latitude $35^{\circ} 53'$

= 2153 minutes of arc

$$\begin{aligned} \log 2153 \\ = 3330 \end{aligned}$$

393 = A harmonic of sun-earth mass relationship of 933000 to 1.

Many other geometric combinations possibly exist which I have not been able to find as yet. It does appear, under these conditions, that an atomic war is illogical, unless one side has an impregnable defensive system.

Yours respectfully,

Sgt. B.L.Cathie
R.C. National Airways

2640 = 2nd Harmonic

2695 = 3rd Harmonic

Colonel L.H. Walker,
Air-Attache,
American Embassy,
WELLINGTON.

Dear Sir,

First of all, I would like to thank you for your offer of co-operation to help solve the puzzle of the U.F.C. activities. It's quite a change to find someone who will listen with an open mind, after two years of battling for a hearing.

You no doubt noticed the slight reticence on the part of the Publishers to let you know too much about my discoveries at this stage. This is probably quite natural for them, as they want to protect their investment in the book.

The main reason for writing this book, is so that I may let as many people as possible know of what I have discovered - the monetary side of the issue is purely secondary as far as I am concerned. Therefore, I am quite willing to show you anything I have found if you require further information at any time. I have rough copies of the maps the Publishers were so reluctant to show you, as with anything else I have discovered.

As to the further atomic tests to be conducted at Mururoa Island by the French, a newspaper report states that the tests will take place between 1st June and 15th July. A check of the Astro tables, will show that the declination of the Sun will be 22° north, between 1st and 2nd of June, which would give a co-ordinate of 2640 from Mururoa Island.

The declination will be 22° 55' about the 10th June and 4th July. This will give a co-ordinate from Mururoa of 2695. The declination is again at 22° north between the 15th and 13th of July, giving once more a 2640 co-ordinate. I have not a copy of the 1967 Ephemeris, so I can only give approximate times G.M.T. at this stage. If you could have the exact declination of the Sun calculated for me at the instant of each atomic test, I will check and see how it fits with grid figures. Naturally, a slight error of a mile or so has to be allowed for, as we do not know the exact latitude of the positioning of the bomb on the Island. At the moment, I'm fairly sure that each test is carried out at 22° south latitude.

As to the massive block of stone which still lies in the quarry at Baalbeck (northern end of the Syrian desert), I will quote a passage from a book by Mark Twain, then explain how I think these gigantic blocks of stone were moved.

"At eleven o'clock, our eyes fell upon the walls and columns of Baalbeck, a notable ruin, whose history is a sealed book. It has stood there for thousands of years, the wonder and admiration of travellers. Who built it, is a question that may never be answered. One thing is sure though, such grandeur of design and such grace of execution as one sees in the temples of Baalbeck, have not been equalled or even approached by any other work of man's hands that has ever been built within the last twenty centuries."

This great temple of the Sun, the temple of Jupiter, and the several smaller

6-18 IR 1967 APRIL 27

temples are clustered together in the midst of these Syrian villages miserably dirty. —— these temples are built upon massive substructures that might support a world almost. The material used is blocks of stone as large as an omnibus, very few of them are smaller than a carpenter's tool chest. These structures are traversed by tunnels of masonry through which a train of cars might pass. ——

The temple of the Sun is nearly 300 feet long and 160 feet wide. It has 54 columns around it, but only six are standing now —— these columns and their entablatures together are 90 feet high, a prodigious altitude for shafts of stone to reach —— the pillars are eight feet thick and with them lie beautiful capitals apparently as large as a small cottage, and also single slabs of stone superbly sculptured, that are four or five feet thick and would completely cover the floor of any ordinary parlor —— and yet these sculptured blocks are trifles in size compared with the rough-hewn stones that form the wide verandah, or platform which surrounds the great temple. One stretch of that platform composed of only three stones, is nearly 300 feet in length. They are thirteen feet square, two of them are each 64 feet, and a third, 69 feet long. They are built into the massive wall 70 feet above the ground.

We went to the quarry from whence these stones of Baalbeck were taken. It was a quarter of a mile off, downhill. In a pit, lay the mate of the largest stone. It lay there just as the giants of old forgotten time left it when they were called hence. —— this enormous block lies there square and ready for the builders' hands, a solid mass 14 feet by 17 feet wide and 70 feet long. "

As you see from that short extract, the buildings in some of these ancient cities are constructed from such massive blocks of stone that even with the help of modern science, it would be a difficult and costly operation to shift them even a few feet.

If we assume that this grid system was used in the past to create frequencies which would nullify normal gravity, then it could have been used both for transport and for lifting great weights.

Possibly any great weight to be moved, was first of all cut to certain dimensions. If the dimensions were harmonics of grid values, then the cubic mass of the weight to be moved, would resonate harmonically with the grid frequencies, if made to vibrate,

A possible clue to this, is in the block of stone left in the quarry at Baalbeck. It appears that whatever catastrophe occurred at the time, disrupted the grid before this block could be moved. This block is roughly 14 feet by 17 feet by 70 feet ——

Now in grid values

$$\begin{aligned} 1439 &= \text{speed of light harmonic} \\ 695 &= \text{speed of light harmonic reciprocal, or } \frac{1}{1439} \\ 1703 &= \text{grid mass harmonic} \end{aligned}$$

The block could then be cut to these grid values in harmonics, or values connected with them. So we will say the dimensions are ——

$$\begin{aligned} 14.39 \text{ grid feet} \\ 17.03 \text{ grid feet} \\ 69.5 \text{ grid feet} \\ \text{Cubic mass} &= 14.39 \times 17.03 \times 69.5 \end{aligned}$$

$$= \underline{17030} \text{ cubic grid feet, which equals the mass harmonic of 1703}$$

Page 3

by 10, the speed of light harmonics cancelling themselves out. If this theory was correct, then I'm positive that an experiment could be carried out at Baalbek and the stone in the quarry shifted with ease. All that is required, is a certain sonic frequency to be broadcast and the block will lose it's weight.

Would it be possible to obtain a free floating world globe as in the diagram, on loan from the Airforce. The larger the better. I could then construct the grid pattern on this more accurately than is possible on maps. I could also obtain more data on a globe such as this, than I can trying to plot positions on maps.

If you require further information, please contact me anytime.

Yours faithfully,

Cpt. B.L. Cathie

Are we being watched? Here is startling evidence that man's destiny may not be in his own hands...

— UFO sightings form global grid

A

New Zealand airline captain has calculated mathematically that Unidentified Flying Objects — "flying saucers" — are working to a definite pattern over the world's surface.

He has written a book using his calculations to support a startling theory that "saucers" are establishing an intricate grid system.

His complicated maths have been proved correct, a representative of the book's publishers said this week.

"We have had his calculations checked by a mathematician at Victoria University and the Victoria University says figures DO add up," the representative said.

Two-passenger commercial airline officer, Captain Bruce Cathie, of Auckland, said:

Captain Cathie believes the grids may have existed once before on the world's surface.

"It could be that they are being rebuilt.

"I'm led toward this idea because many of the world's notable geographic features lie on the intersections of the grids," he said.

A representative of A. H.

and A. W. Reed, the company publishing Captain

Cathie's book, said a Victoria University mathematician had thoroughly checked the statistics and calculations.

The mathematician had reported that Captain Cathie's figures were completely accurate.

"He also reported that Captain Cathie's deductions could be unwarranted," the representative said.

"But Captain Cathie is just as likely to be right as anyone else."

The representative said British publishing rights for the book had been arranged.

However, it would not be available in New Zealand before March next year.

"We expect it will cause quite a stir," he said.

HOW WOULD YOU LIKE TO SPEND YOUR NEXT SUMMER'S HOLIDAYS CRUISING THE PACIFIC ABOARD THE 'CANBERRA'?

YOU CAN YOU KNOW!

The 45,000-ton superliner "Canberra" will leave Auckland on two fabulous cruises of the Pacific this summer. The first leaving October 13th, will call at Sydney, Tokyo, Kobe, Nagasaki, Hong Kong and back to Sydney and Auckland. It will take 37 days and prices range from \$484 (£242).

The second, a 50-day tour leaves Auckland February 15th and calls at Tonga, Honolulu, Vancouver, San Francisco, Los Angeles, Honolulu, Yokohama, Tokyo, Kobe, Nagasaki, Hong Kong, Sydney and Auckland. Prices range from \$664 (£332).

For full details of these holidays of a lifetime, call at Newmans Travel Service, 6 Dominion Life Arcade, Wellington; or send in the coupon below for your free full colour brochure.

NEWMANS TRAVEL SERVICE,
P.O. Box 145, Wellington.

Please send me details of Oriental and Pacific Holidays on the "Canberra".

He said he realised his theory could be disputed by sceptics because he had begun his calculations after sighting an unidentified object himself.

"I saw over a cigar-shaped stationary object above Kaiapara Harbour, near Darfield, about three years ago."

"I was able to fix its position accurately, and that prompted me to collect other sightings which had been verified by much the same source, and which enabled the position of the objects to be fixed."

"Extending the line south gave an intersection over the D'Urville Island area — this time crossing the line of travel of an object which had been seen over the Wairarapa.

"Significantly, I found that other verified reports made at the same time as the Wairarapa sightings had placed an object exploding in mid-air over the same D'Urville Island area."

Captain Cathie said these intersections gave him the basis of his theory — by matching up other verified sightings he found that a grid pattern of precise measurement emerged.

Using these measurements he drew up a grid covering New Zealand.

Then, he says, he went back through records and gathered verified "saucer" reports dealing only with stationary, fixed-position objects.

He says these sightings placed the objects exactly over other intersections of the grid.

ago, for instance, indicated that they had all been sightings of the same object.

"I found that assumption I fixed its line of travel and extended the line south.

"I found it exactly intersected the point where I had made my Kaiapara Harbour observation a year later."

"This got me pretty excited, because it means that anyone using the grid coordinates would get mathematically accurate fixes on any predetermined position."

Beacons at joins

Captain Cathie says he thinks the "saucers" could be placing a type of beacon on the intersections, giving the grids physical proportions.

"I believe the intersections are being covered systematically," he said.

"At the moment, even though the world pattern seems to have begun in 1946, sightings relevant to the grids show that intersections over populated areas have been left largely clear."

"I think the 'saucers' could be leaving the built-up areas till last, perhaps to minimise the chances of observation."

Captain Cathie said he would not speculate about the purpose of the grids.

© CAPTAIN BRUCE CATHIE... "not interested in little green men, only mathematical proof."

"But M M gives a close to anyone else with better knowledge than mine, the mathematics of the grids relate accurately to the mathematics of the earth's mass, gravity acceleration and the speed of light."

Captain Cathie believes the grids may have existed once before on the world's surface.

"It could be that they are being rebuilt.

"I'm led toward this idea because many of the world's notable geographic features lie on the intersections of the grids," he said.

Figures

accurate

The geographic features included the Arizona Crater, the Chubb Crater in Quebec and the Wolf Creek Crater in Western Australia.

A representative of A. H. and A. W. Reed, the company publishing Captain Cathie's book, said a Victoria University mathematician had thoroughly checked the statistics and calculations.

The mathematician had reported that Captain Cathie's figures were completely accurate.

"He also reported that Captain Cathie's deductions could be unwarranted," the representative said.

"But Captain Cathie is just as likely to be right as anyone else."

The representative said British publishing rights for the book had been arranged. However, it would not be available in New Zealand before March next year.

"We expect it will cause quite a stir," he said.

Chance

discovery

"Many sightings since then — including several over the Tauranga area in the last six months — have conformed to the grid pattern," he said.

Captain Cathie said he applied his New Zealand calculations to a grid covering the world and once again found verified sightings placed "saucers" over intersections.

"I then stumbled on a chance mathematical discovery," he said.

"Several verified sightings did not match up with the grid pattern, and I discovered that the distance between these exactly equalled with my original figures.

"In fact, this gave me the pattern of a second,

Gracious gesture to your guests... serve

SIR ROBERT BURNETT'S WHITE SATIN GIN

In the eighteenth century, 1770 to be precise, a gin was created so smoothly, so delightfully dry, so pleasing to the palate, that it was spontaneously named "White satin". To this very day our unique taste remains unequalled. Why don't you join the happy band who toast Sir Robert Burnett's White Satin Gin. Available from selected wholesalers and bottle stores. 1. This report contains information pertinent to an u/i flying object observed near KOS-KUDUK (UL9Ø28) and an u/i construction site near SLAVJANKA (VL6ØØØ). Source, an ethnic German resettler, based his information on the u/i flying object on hearsay, vapor trails observed and detonations. He reported only that since Spring 1966 he heard detonations and observed vapor trails coming from the area near KOSKUDUK. An u/i construction site is located approx 2 km from SLAVJANKA at VK6Ø99. A new road was constructed and is used only by military vehicles. Construction began in early 1966. Hearsay indicated that it might be an underground missile installation.

2. (U) This information was furnished USI by West Germany. The NO FOREIGN DISSEM EXCEPT WEST GERMANY MARKING is necessary to prevent release of this information to a third country without permission of the originator.

RECON — Martes 2 de julio de 1968

Causó Impresión el Informe Secreto

LA causado viva impresión en nues-
tro medio el informe secreto de la
Aerial Phenomena Research Organiza-
tion (Organización para el Estudio de
los Fenómenos Aéreos), publicado ayer
por LA RAZÓN, acerca de las nuevas
apariciones de OVNI en el hemisferio
Sur, especialmente en Argentina y
Chile. Como se recordará, ese docu-
mento formula todo un proceso sobre
la actividad cumplida en Estados Uni-
dos en esta materia, si mismo tiempo
que revela detalles desconocidos del
tratamiento que esa novedad contem-
poránea ha merecido, no sólo en el
manejo científico del asunto, sino tam-
bién en la forma en que se ha venido
presentando la información al público
acerca de ellos, incluidas sus implican-
cias de tipo militar y aun diplomático.
El informe comienza por establecer
que, por lo menos a partir de 1947,
todo lo que se relacionara con OVNI
en Estados Unidos apenas fue conside-
rado como un amable pasatiempo de
soñadores. La generalidad de los cien-
tíficos no prestaba gran atención a
estos fenómenos y, al menos aparen-
temente, los militares tampoco. Sin
embargo, la situación habría de conmo-
verse hacia marzo de 1966, cuando el
secretario de Estado, Harold Brown, decidió apaciguar la opinión pública
alterada por observaciones de OVNI
invitando a los expertos que trabajan
en el proyecto Blue Book a con-
currir a una reunión del Senado. An-
tes el estadounidense, el profesor J.
Hector Hynek (consulor del mencio-
nado proyecto) proclamó allí su des-
acuerdo con el informe militar, afir-
mando que los comunicados de la fuer-
za aérea no reflejaban la realidad.
Agregaba que la cuestión no era ma-
teria que dependiera de militares, sino
que se trataba de una estricta cuestión
científica en la que su conciencia le
impedía aparecer como rechazando un
hecho nuevo de la mayor importancia
y en cuya investigación venía tra-
bajando desde hacía 18 años. Establecida
una áspera polémica entre el mayor
Héctor Quintanilla —que dirigía el Pro-
yecto— y el profesor Hynek, el asunto
desemboca en la creación de una co-

misión civil de Estudio de los OVNI, ordenada por el gobierno de Lyndon Johnson 8 meses después. Abiertos de esta manera los archivos secretos a todo científico deseoso de controlar lo realizado, poco más tarde presentóse el profesor James Mac Donald, de la universidad de Arizona, dispuesto a investigar los antecedentes recopilados. Así pudo descubrir y revelar que el famoso jurado Robertson, de 1953, presentado como compuesto por sabios, no había sido en realidad más que un instrumento de la CIA (servicio de inteligencia), orientado a servir una conclusión que Hynek se había negado a suscribir: "Los OVNI no existen y hay que educar al público, para que tenga la reflexión debida sólo para ver globos sondas, bólidos, etcétera". Un examen profundo de los casos estudiados por Mac Donald demostraron que el objetivo evidente del proyecto era no analizar las observaciones, sino convencer a los testigos de que no habían visto nada y persuadir al público que todo era una fantasía. Efectivamente ante este descubrimiento, Mac Donald (originalmente no interesado en los OVNI, puesto que era especialista en física atómica), realizó numerosos apuntes y solicitó fotocopias, que terminaron con una negativa y la prohibición futura del acceso a los documentos por otros científicos. Cerrada esta vía, la Fuerza Aérea intentó encaminar la tarea a alguna universidad, que no obtuvo a pesar del ofrecimiento de 500 mil dólares, centralizándose la expectativa general en la comisión civil, cuya dirección fue confiada al profesor Edward Condon. Este organismo, sin embargo, no fue integrado con especialistas sino con un equipo de psicólogos, a cuyo cargo estuvo la presentación de un informe a la Academia de Ciencias, en setiembre siguiente, y luego al Congreso de Estados Unidos. Obviamente, se considera que un documento elaborado sin meteorólogos, especialistas en radar, etc., puede insistir en que todo es consecuencia de un fenómeno psicológico en biología, conclusión que en medios científicos se ataca denunciando que jamás revela un investigador de la comisión real

en lugares donde se apreció la aparición de un OVNI, mientras que menudea en esos sitios la presencia de agentes de la CIA, el FBI o la Fuerza Aérea. Paradójicamente, y al margen del nivel mundial alcanzado por este problema, la cuestión de los OVNI obtuvo repercusiones singulares en la Unión Soviética. Un insólito artículo aparecido en la revista rusa "Joven Técnica" por el soviético Kazantsev y el francés Vallej comentó un caso de observación sobre una base norteamericana de cohetes, en el estado de Dakota del Norte. Esta publicación se ha interpretado como proveedora de la clave para entender la actitud de la CIA y de los servicios secretos de otros países, que negó durante 20 años la existencia pública de los OVNI. Esta clave estaría dada por la renuencia a reconocer la existencia de un fenómeno natural o no, cuyo control daría superioridad militar aplastante a quien lo poseyera. Concretamente, la observación a que se refiere la publicación se habría registrado el 25 de agosto de 1966, cuando un objeto luminoso fue detectado por los radares bajando y elevándose rápidamente sobre una base desde la cual, en cualquier momento, podrían dispararse cohetes atómicos intercontinentales sobre la Unión Soviética. El informe finaliza señalando que a comienzos de 1968, la situación de los OVNI se encaracterizaba por los hechos siguientes: los servicios secretos pugnaban por controlar el problema contra los científicos que deseaban intervenir decisivamente; existe interés en desarmar a los investigadores y mantener ignorante al público y aún al propio Congreso estadounidense; se quiere acallar testigos. En el frente espontáneamente abierto por los científicos particulares, se hace notar que muchos quedaron en el camino por innumerables inconvenientes, ocultaciones, simulaciones y sorprendentes desmentidas, pero va de suyo que muchos otros persisten y se empeñan por develar este misterio moderno que, por momentos, cobra magnitud y reúne testimonios en el mejor de los casos de ninguna manera deseable por la ciencia y la astronomía.

que los planetas rotan más lento que es la mayor velocidad de 200 mil millones de galaxias.

1. SUMMARY:
This report transmits translated summaries of press articles on Unidentified Flying Objects (UFO's). It covers a general cross section occurring during the past 60 days. It is significant to note that a state of concern exists about the population in many parts of Argentina.

Following is a chronological summary of 23 articles, with numbers corresponding to numbers on clippings attached, last article in report is dated 8 August 1968.

1. La Razon (Buenos Aires), 8 Jun 68 - (Photo) Describes how two experienced pilots, 22 and 13 years with Aerolineas Argentinas, saw a UFO while flying over Punta Arenas.

2. La Razon (Buenos Aires), 1 July 68 - Describes findings of the Aerial Phenomena Research Organization of Tucson, Arizona, with comments.

3. Los Principios (Cordoba), 5 July 68 - (Photo) Outlines details on the invention of a geomagnetic and light detector to warn of the presence of UFO's. Second article, same source, quotes Argentine Commander in Chief of Navy as suggesting that Argentine Armed Forces are participating in an investigation of UFO's.

4. Tribuna (San Juan), 9 July 68 - (Photo) Substantiates reality of UFO's and questions why, where and what for of their presence.

5. Diario del Pueblo (Tandil) 13 July 68 - Describes landing of a UFO at the Air Base at Tandil.

6. La Nacion (Buenos Aires) 15 July 68 - (Photo) Describes viewing a UFO on 23 June 68 at Mar del Plata.

7. La Prensa (Buenos Aires) 17 July 68 - Gives details of a speech by a Mr. Federico B. Kirbus, position unknown, which discounts UFO's.

8. La Cronica (Buenos Aires) 17 July 68 - Describes UFO sighting near Mendoza.

9. La Nacion (Buenos Aires) 17 July 68 - Cites two sightings - one in Tres Arroyos by a rancher and the other in Bolucato, Brazil. Latter gives good description of landing gear and mounting platform.

10. La Gente (Buenos Aires) 18 July 68 - (Photo) Explains Comision Abservadora de Objetos Voladores No Identificados (CODOVNI). Describes area of most common sightings.
11. La Nacion (Buenos Aires) 18 July 68 - Describes landing of UFO in Chos Malal on 16 July with forces emanating.
12. La Nacion, (Buenos Aires) 19 July 68 - Relates sightings by tower operator at Mendoza and pilot flying between Mendoza and Santiago, Chile. Also same source recounts sighting at Balboa, Spain.
13. La Razon (Buenos Aires) 26 July 68 - Describes attempt by five policeman in Olavarría to capture and later shoot three crewmembers of UFO.
14. La Cronica (Buenos Aires) 26 July 68 - Relates sightings of UFO's at San Carlos de Bariloche, Cordoba, and Coquimbo, Chile.
15. La Nacion (Buenos Aires) 27 July 68 - Describes sighting by persons in Laguna Paiva.
16. La Razon (Buenos Aires) 27 July 68 - (Photo) Relates new sightings near La Pastora, General Alvear, and Tapalque. The latter describes the crew and inability of machine-gun bullets to affect them.
17. Cronica (Buenos Aires) 30 July 68 - Reports testimony of Dr. James McDonald of the U. S. House of Representatives, sighting at Puntal del Este force from which caused motor of car to stall, near Cauquenes, Chile.
18. Clarin (Buenos Aires) 31 July 68 - (Photo) Describes and gives photos of a sighting in Lanus.
19. La Nacion (Buenos Aires) 1 Aug 68 - From Madrid, Fernando Sesma, president of the Association of Friends of the Visitors from Space, theorized that these visitors have picked Argentina as the place to begin the conquest of earth.
20. La Nacion (Buenos Aires) 2 August 68 - Describes a minute sighting near Rosario.
21. Asi (Buenos Aires) 3 Aug 68 - (Photo) Describes a sighting with photos near Trelew on 13 July 68.
22. La Razon (3 Aug 68) - Relates argument by a Professor Alexander Erú supporting theory of flying saucers.
23. Buenos Aires Herald (Buenos Aires) 8 Aug 68 - Describes in-space rendezvous between two UFO's between Indio Rico and Tres Arroyos, Argentina.

COMMENTS: This report describes the rash of sightings of Unidentified Flying Objects (UFO's) presently occurring in Argentina and how this subject is the item of primary interest to the local populace. This report supplements IR 1 804 0121 68

UN RELATO INCREÍBLE

Dos avezados pilotos de Aerolíneas Argentinas observaron un OVNI en Punta Arenas, al lado del estrecho de Magallanes. Los veteranos del aire, que volaban con la máquina a 900 metros de altura, vieron un cilindro rojizo y brillante, que se movía correctamente. No tienen dudas de que se trataba de un plato volador, y algunos de los 18 pasajeros que viajaban, también

corroboraron la experiencia. Tras la humorada de "deben ser platos voladores", que lanzó el piloto a su acompañante, se les abrió un mundo fantástico durante cinco minutos. Eran las 21.17 del último martes y la oscuridad les impidió apreciar la distancia que los separaba. Enviarán el testimonio a Estados Unidos "para buscar comunicación con el otro mundo".

La gente que no cree, que supone que son todas pavadas o inventos, debe leer las declaraciones de estos dos hombres serios y responsables y luego ponerse a meditar sobre lo que está ocurriendo.

LOS comandantes Raúl Guardabassi y Ulises Tiviroli de Aerolíneas Argentinas llegaron anoche al aeroparque con una nueva carga de experiencia y ganas de hablar de su espectacular observación en Punta Arenas, el aeropuerto más austral del continente. Sus habituales compañeros de trabajo también querían saber de qué se trataba, y cuando Guardabassi (40 años, soltero, cordobés, 13 años en la empresa) y Tiviroli (54 años, casado, una hija, mendocino, 22 años en Aerolíneas) se pudieron desprender de los interrogadores, se acercaron a conversar con LA RAZÓN. El diálogo se desarrolló de la siguiente forma:

LA RAZÓN — ¿Qué observaron en el cielo?

Tiviroli — Yo, por ser copiloto, fui en realidad el que prestó más atención a lo que ocurría. Eran las 21.17 del último martes cuando estábamos sobre la enorme pista de Punta Arenas, prácticamente sobrevolando el Estrecho de Magallanes, cuando advertí un objeto luminoso, de forma redonda y alargada que realizaba movimientos

de nuestra presencia, no se pueden efectuar sin comandos correctos. Ahora que no vengan con la historia de algún globo zonda, porque el viento no puede cambiar de dirección en tantas oportunidades durante cinco minutos.

LA RAZÓN — ¿Pudieron establecer a la distancia que se hallaba y a qué altura se movía?

Tiviroli — Mire, la distancia fue imposible de establecer, porque no había puntos de referencia. A esa hora la Cordillera de los Andes no se apreciaba, porque de lo contrario hubiéramos tenido algún punto de referencia. Pueden ser 2 ó 100 kilómetros los que nos separaban. La altura de vuelo era de mil ochocientos a dos mil metros, ya que estaban algo encima de nuestra máquina y en ese instante volábamos a novecientos metros. Lo que más me llamó la atención fue la poderosa luminosidad del OVNI, pero no pude divisar otros detalles, por la oscuridad.

LA RAZÓN — ¿Ustedes lo perdieron de vista, con tantos movimientos?

cielo pocos nos pueden enseñar, porque llevamos años volando. Lo del martes fue una cosa excepcional y habrá que deponer algunos prejuicios para comprender que los OVNI son una realidad.

LA RAZÓN — ¿Usted cree en la existencia de los platos voladores?

Guardabassi — Claro que sí. Los terráqueos debemos ir comprendiendo que nos visitarán seres de otro mundo, y toda esa imagen de invasión, tras lo que se los disfraza es fruto de una mentalidad de prejuicio. Sería muy interesante un acercamiento.

LA RAZÓN — ¿Ustedes estaban bien descansados?

Tiviroli — Al tomar la máquina en Río Gallegos, en las clásicas postas que realizamos en la empresa, habíamos dormido muchas horas, almorcamos lo de siempre y no bebimos. Esa nave de color rojizo luminoso no es fruto de la imaginación, sino una realidad con la que chocamos. Inclusive creo que los observadores de Puerto Natales deben haber registrado su paso, es imposible que haya pasado inadvertida para ellos.

La gente que no cree, que supone que son todas pavadas o inventos, debe leer las declaraciones de estos dos hombres serios y responsables y luego ponerse a meditar sobre lo que está ocurriendo

LOS comandantes Raúl Guardabassi y Ulises Tiviroli de Aerolíneas Argentinas llegaron anoche al aeroparque con una nueva carga de experiencia y ganas de hablar de su espectacular observación en Punta Arenas, el aeropuerto más austral del continente. Sus habituales compañeros de trabajo también querían saber de qué se trataba y cuando Guardabassi (40 años, soltero, cordobés, 13 años en la empresa) y Tiviroli (54 años, casado, una hija, intendocino, 22 años en Aerolíneas) se pudieron desprender de los interrogadores, se acercaron a conversar con LA RAZÓN. El diálogo se desarrolló de la siguiente forma:

LA RAZÓN — ¿Qué observaron en el cielo?

Tiviroli — Yo, por ser copiloto, fui en realidad el que prestó más atención a lo que ocurría. Eran las 21.17 del último martes cuando estábamos sobre la enorme pista de Punta Arenas, prácticamente sobrevolando el Estrecho de Magallanes, cuando advirtí un objeto luminoso, de forma redonda y atargada que realizaba movimientos por encima del horizonte. En ese momento se lo dije a Guardabassi y a Bartou, el despachante de la empresa en Río Gallegos que viajaba en la cabina con nosotros.

LA RAZÓN — Era una noche con visibilidad normal?

Guardabassi — La visibilidad era de unos 200 kilómetros, con lo cual le estoy diciendo del muy buen tiempo reinante. Yo venía al comando del Avro 748 que habitualmente utilizamos, y estaba en comunicación con el aeropuerto para comenzar la tarea de descenso. Cuando Tiviroli dijo que había un objeto, le respondí con algo de ironía: "De ser un plato volador". Y no me equivoqué; porque eso que teníamos delante era un objeto que poseía una conducción inteligente. Primero se movió de Sur a Oeste, después viró en noventa grados, más tarde volvió a doblar otros noventa grados y quedó en dirección inversa a la que venía al comienzo. Tantas maniobras, posiblemente en antecedentes

de nuestra presencia, no se pueden efectuar sin comandos correctos. Ahora que no vengan con la historia de algún globo zonda, porque el viento no puede cambiar de dirección en tantas oportunidades durante cinco minutos.

LA RAZÓN — ¿Pudieron establecer a la distancia que se hallaba y a qué altura se movía?

Tiviroli — Mire, la distancia fue imposible de establecer, porque no había puntos de referencia. A esa hora la Cordillera de los Andes no se apreciaba, porque de lo contrario hubiéramos tenido algún punto de referencia. Pueden ser 2 ó 100 kilómetros los que nos separaban. La altura de vuelo era de mil ochocientos a dos mil metros, ya que estaban algo encima de nuestra máquina y en ese instante volábamos a novecientos metros. Lo que más me llamó la atención fue la poderosa luminosidad del OVNI, pero no pude divisar otros detalles, por la oscuridad.

LA RAZÓN — ¿Ustedes lo perdieron de vista, con tantos movimientos?

Tiviroli — No, lo que pasó es que debí dejar de mirar cuando mi intervención en el aterrizaje se hacia imprescindible. Teníamos 18 pasajeros en la nave y algunos de ellos alcanzaron a divisarlo algunos segundos. Hay que ver que la cabina era el sitio ideal para seguirlo con la mirada. Cuando carreteamos y dimos vuelta para acercarnos a la base, ya no tuvimos más contactos. Al bajar fue imposible insistir en las observaciones porque hacía mucho frío, y ahí escuché que la esposa de uno de los cónsules chilenos en el sur argentino le decía a su marido que había visto un plato volador.

LA RAZÓN — ¿No se pudieron confundir con algún fenómeno celeste?

Guardabassi — De ninguna forma. El OVNI estaba en la zona baja, donde no hay estrellas, cometas o cualquiera de los fenómenos corrientes. Además en materia de observar el

cielo pocos nos pueden enseñar, porque llevamos años volando. Lo del martes fue una cosa excepcional y habrá que deponer algunos prejuicios para comprender que los OVNI son una realidad.

LA RAZÓN — ¿Usted cree en la existencia de los platillos voladores?

Guardabassi — Claro que sí. Los terráqueos debemos ir comprendiendo que nos visitarán seres del universo, y toda esa imagen de terrorismo, tras lo que se los disfraza es fruto de una mentalidad de prejuicio. Sería muy interesante un acercamiento.

LA RAZÓN — ¿Ustedes estaban bien descansados?

Tiviroli — Al tomar la máquina en Río Gallegos, en las clásicas postas que realizamos en la empresa, habíamos dormido muchas horas, almorcamos lo de siempre y no bebimos. Esta nave de color rojizo luminoso no es fruto de la imaginación, sino una realidad con la que chocamos. Incluso creo que los observadores de Puerto Natales deben haber registrado su paso, es imposible que haya pasado inadvertida para ellos.

LA RAZÓN — ¿Realizarán un informe sobre el fenómeno?

Guardabassi — Tenemos en el avión las planillas que entrega una entidad estadounidense para registrar todos los fenómenos relacionados con los OVNI. Aportaremos los detalles de esta experiencia para ver si pueden ayudar en algo. Creo que hay que desentrañar ese mundo, y nada mejor que colaboremos. Soy un enamorado de estas cosas, inclusive leo literatura al respecto, y al bajar del avión tuve la sensación de que nos había llegado la hora de confirmar tantos interrogantes. Esto era un OVNI, y que ahora no vengan con otras cosas. Al igual que el caso de esa pareja que fue llevada con su auto a México. No me caben dudas de que eso puede ser cierto, e incluso que se hayan registrado fenómenos similares. Pero hay muchos intereses que se oponen a la divulgación de estos casos.

(INFORMACION PAGS. 8 Y 9)

UN INFORME SECRETO Y PRUEBA COMO SE E

Estudios

LA Aerial Phenomena Research Organization para el Estudio de los Fenómenos Aéreos es una institución privada e independiente, con sede en Tucson, Arizona, con representantes honorarios en las principales ciudades del mundo. LA RAZÓN acaba de obtener un informe reservado enviado al delegado en la Argentina, cuyo valor resulta innegable en estos momentos en que en nuestros países y Chile se acaban de hacer nuevas observaciones de OVNI en el cielo del hemisferio sur. El documento es extenso y prolífico. Su seriedad emerge del hecho de que en el mismo se hace no solamente una especie de proceso de todo lo ocurrido en los Estados Unidos en relación con los platillos voladores, sino que refleja, como una simbólica "radiografía" detallada, inéditos para la mayoría de la opinión pública nacional. Antes de reproducir sus demás capítulos debemos anotar que en una de sus partes se señala: "En Argentina, donde tantos fenómenos insólitos y observaciones se han realizado, la secretaría de Estado de Marina tuvo desde hace tiempo la exacta visión de la magnitud del problema, al punto de designar al capitán de navío ingeniero Omar A. Pagani, con quien colaboran en el medio civil el escritor Eduardo Azcur, y el señor Guillermo J. Gainza Paz (delegado del APRO), para que estudiaran todo lo relacionado con los OVNI. La documentación y archivos reunidos luego de largos años de innuova tarea, le dan a la Marina argentina una posición de excepción para procurar la interpretación de este problema que está llamado a modificar en un futuro no lejano nuestra posición frente al Universo".

Complot contra los OVNI

ORME SECRETO REVELABA COMO SE ENGAÑA A Estados Unidos y R

LA Aerial Phenomena Research Organization (Organización para el Estudio de los Fenómenos Aéreos) es una institución privada e independiente, con sede en Tucson, Arizona, con representantes honorarios en las principales ciudades del mundo. LA RAZÓN acaba de obtener un informe reservado enviado al delegado en la Argentina, cuyo valor resulta innegable en estos momentos en que en nuestro país y Chile se acaban de hacer nuevas observaciones de OVNI en el cielo del hemisferio sur. El documento es extenso y prolífico. Su seriedad emerge del hecho de que en el mismo se hace no solamente una especie de proceso de todo lo ocurrido en los Estados Unidos en relación con los platillos voladores, sino que refleja como una simbólica "radiografía" detalles, indicios para la mayoría de la opinión pública nacional. Antes de reproducir sus densos capítulos debemos anotar que en una de sus partes se señala: "En Argentina, donde tantos fenómenos insólitos y observaciones se han realizado, la secretaría de Estado de Marina tuvo desde hace tiempo la exacta visión de la magnitud del problema, al punto de designar al capitán de navío ingeniero Omar A. Págani, con quien colaboran en el medio civil el escritor Eduardo Azcuy, y el señor Guillermo J. Gainza Paz (delegado del APRO), para que estudiaran todo lo relacionado con los OVNI. La documentación y archivos reunidos luego de largos años de improba tarea, le dan a la Marina argentina una posición de excepción para procurar la interpretación de este problema que está llamado a modificar en un futuro no lejano nuestra posición frente al Universo".

Complot contra los OVNI

El informe comienza así: "Hasta la primavera de 1966 el OVNI puede ser considerado como amable pasatiempo de algunos soñadores. Los científicos, en su mayoría no tenían gran in-

OVNI procedían de la ignorancia de testigos incapaces de reconocer un globo sonde o un bólido, y que el restante 2 por ciento no presentaba ningún interés. El cambio imprevisto se produjo en noviembre de 1966: el gobierno de Lyndon Johnson creó una Comisión Civil de Estudio de los OVNI, dirigida por un eminentemente científico y presidente del Departamento de Física de la Universidad de Colorado, profesor Edward Condon. Un año después, la URSS anunciaría la creación de un instituto para el estudio de los OVNI, dotado de importantes medios y dirigido por el general Anatoly Skolyarov. Sea cual fuere la naturaleza de los OVNI, se han convertido, lamentablemente, y por una razón todavía desconocida, en uno de los principales motivos en juego de la guerra secreta.

Un servicio investiga

En marzo de 1966, como corolario de observaciones hechas sobre territorio norteamericano, Harold Brown, secretario de Estado de la Fuerza Aérea, decide apaciguar a la opinión pública e invita a los expertos del Proyecto BLUE BOOK, a concurrir ante la comisión senatorial del arma. El proyecto instalado en Dayton

dependía de la Fuerza Aérea y lo dirigía el mayor Héctor Quintanilla. Ante el estupor general el profesor J. Allen Hynek, presidente de la Junta Astrofísica de la Northwestern University y consultor del proyecto, proclama su desacuerdo con el militar afirmando que los comunicados de la Fuerza Aérea no reflejan la realidad. Afade que los casos no explicados se acumulan y que nunca fueron estudiados seriamente. Termina diciendo que no es materia que dependa de militares, puesto que se trata de una estricta investigación científica. Hynek declara haber procedido de tal forma ante el Senado para dejar a salvo su conciencia de científico

que rechaza frente a la historia ser el hombre que aceptó descartar un hecho científico nuevo, y afirma que el problema de los OVNI es de gran importancia, y que ha llegado a dicha conclusión luego de 16 años de estudios. Quintanilla y Hynek se enfrentan abiertamente delante los senadores, y finalmente los delegados de la Fuerza Aérea terminan admitiendo que con el objeto de tranquilizar a la opinión se podrá crear una comisión civil. Los diarios anuncian que Brown propondrá al presidente Johnson dicha solución. Es la primera derrota de la Fuerza Aérea en ese dominio desde diciembre de 1947. Pasa el

verano de 1966 y los que siguen la cuestión preguntan por qué, si el presidente quiere crear una comisión civil, no es Hynek, experto mundial competente en la materia y conocedor a fondo de todos los archivos secretos de la Fuerza Aérea, el encargado de organizarla. Cuando Hynek declaró ante el Congreso que el trabajo de la Fuerza Aérea no era serio, el secretario de Estado, Harold Brown, molesto, le replicó que todo científico deseoso de controlar lo realizado podría hacerlo libremente presentándose en las oficinas en Dayton. Pensó que nadie aceptaría ese desafío. Fue un gran error: semanas más tarde el cién-

tífico James Mac Donald, del Instituto de Física Atmosférica de la Universidad de Arizona, se presentaba en la ciudad de Dayton.

"Los OVNI no existen"

Ninguna disposición había sido prevista para hacer desaparecer los archivos comprometedores y Mac Donald estudió todo, detalladamente. Descubrió que el famoso Jury Robertson de 1953, presentado como compuesto por sabios, no había sido en realidad más que un instrumento de la CIA, reunido a su pedido y dirigido por ella. Que las conclusiones a que llegaron ("Los OVNI no existen y hay que educar al público para que tenga la reflexión debida

sólo para ver globos, etc., etc., han sido aprobadas, quien se negarían. Para corriente intento imprime Hynek y al mismo para poner en el falso asunto sobre los jo control de la Cblema quedaba más colocado bajo secreto militar. Al fin, un exaendo de los casos Mac Donald que vidente del pro o estudiar las ob siano convencer a

los testigos de que no habían visto nada y persuadir al público de que todo era una fantasía. Mac Donald, que al principio no se interesaba sobre los OVNI, estupefacto ante estos descubrimientos consideró que su deber científico era hablar. La sola curiosidad que lo llevó a estudiar los archivos de la Fuerza Aérea era la de un especialista de física atmosférica interesado en una documentación inédita en la materia. Lo encontrado era bien diferente. Pero sin mostrar sus intenciones tomó abundantes notas, y luego pidió fotocopias. La Fuerza Aérea le respondió que para eso hacia falta autorización de la CIA. Le solicitó a Quintanilla que la pidiera,

pero fue rechazada por la CIA, que, además, anuló el ofrecimiento hecho a los científicos, y resolvió prohibir de nuevo el acceso a los archivos del arma aérea.

"Entre la declaración del mayor Quintanilla y el doctor Hynek delante del Señor Condón y la creación del comité Condón en noviembre de 1966, pasaron ocho meses. La Fuerza Aérea encontraba dificultades para hallar una universidad dispuesta a hacer lo que se le pedía, pese al ofrecimiento de 500 mil dólares por la tarea. La verdadera razón del rechazo de las universidades consultadas era bien simple: la Fuerza Aérea exigía continuar controlando el asunto y dirigirlo por intermedio de la CIA. Al fin asignado al comité sería el mismo que en 1963 o sea conveniente al público de que no había nada, apagar definitivamente la curiosidad de los científicos de manera que el tema OVNI quedara como asunto de los servicios de informaciones. Para alcanzar esta doble meta, el hombre de ciencia que dirigiría el comité debería tener dos cualidades: un gran prestigio científico y una gran comprensión en relación a las necesidades militares. Fue esta última exigencia la que enfrió a muchos científicos consultados. Pero en octubre la Fuerza Aérea encontró su hombre. Era Edward Condón, miembro de la Academia Nacional de Ciencias y eminente físico que había sido uno de los directivos del proyecto Manhattan: (primera bomba atómica). Actualmente el comité Condón ha logrado una primera meta importante: ha conquistado la confianza del público y de los científicos. El mayor Keyhoe, fundador de la NICAP, y Lorenzen, del APRO, han puesto sus organismos de investigación nacionales a disposición del comité Condón, aguardando del mismo un informe final conforme a las disposiciones científicas y no militares.

El Congreso espera

Sin embargo, es fácil ver que el comité Condón no es, ni mucho menos, un organismo encargado de estudiar los OVNI. Un primer

caso fue creado para estudiar los casos de observación bien reconocidos como verdaderos y que hubieran resistido toda explicación. Se esperaba pues encontrar en él a meteorólogos astrónomos, especialistas en radar, etc., pero el comité Condón se resume a un equipo de psicólogos bajo la dirección del más eminentemente representante de esta disciplina, el doctor Wertheimer. En otros términos no existe en el mundo un equipo de psicólogos más calificados para afirmar que el OVNI es una estructura psicológica explicable en bloques por ciertas particularidades de la percepción. Debido a ello el informe que debe ser presentado a la Academia de Ciencias en setiembre próximo, y luego al Congreso de Estados Unidos en octubre, está prácticamente preparado. Es suficiente pensar el efecto que un informe tal, si es tomado en serio, tendrá sobre los políticos y científicos para comprender su meta: desestimarlo para luego volver el problema a manos de los servicios secretos. Cuando un fenómeno OVNI es señalado en algún lugar, no se ve jamás un investigador del comité, prueba de que el fenómeno por sí mismo no les interesa o, más precisamente, que la tarea del comité no es su estudio. Lo que en cambio parece interesarse es la versión del fenómeno tal como es vertido por los investigadores de OVNI. Mientras tanto los servicios de inteligencia no descansan y si el comité no acude a los sitios de observaciones, siempre se verá a los señores de CIA o del FBI o de la Fuerza Aérea, prueba de que lo serio del asunto, su aspecto físico y objetivo son más que nunca seguidos de cerca.

Rusia detrás de la realidad

El OVNI, cualquiera sea su naturaleza, se ha convertido, después del Jury Robertson de 1953, en un asunto a nivel mundial y de primera magnitud. El número ocho de la publicación rusa a nivel popular "Joven Técnica" publicó en otoño de 1967 un artículo insólito escrito en colaboración por el ruso Kazantsev y el francés

caso de observación sobre una base norteamericana de cohetes intercontinentales. La base identificada se encuentra en las vecindades de Minota, estado de Dakota del Norte. Aquí, quizá, en la publicación de una revista rusa sobre una observación hecha por militares norteamericanos responsables de una instalación secreta, vamos a encontrar la clave de todo lo relativo a los OVNI. Quizás entendremos, por fin, por qué después de 20 años los servicios de informaciones de todos los países ocultan al público y a los científicos este hecho increíble: la existencia de un fenómeno natural o no, cuyo control daría superioridad militar aplastante. En efecto, la observación de la revista rusa, confirmada por otras y por el mismo Hynek, indica que el fenómeno se había manifestado en forma de un objeto luminoso elevándose y bajando de altura, detectado simultáneamente por varios radares y aterrizando en la proximidad de una de esas bases de lanzamiento, donde los cohetes atómicos intercontinentales, pueden en cualquier momento ser lanzados rumbo a la Unión Soviética. Esta observación tuvo lugar el 25 de agosto de 1966. A principios de este año 1968 la situación de los OVNI se caracterizaba por los hechos siguientes: los servicios secretos se esforzaban en mantener el control sobre el problema que un conjunto de científicos procuraba arrebatarles. Todo es efectuado por los servicios secretos para desanimar a los científicos y engañar al público, incluido el Congreso de los Estados Unidos. Se procura devolver a las manos de la CIA, responsable de esto, el problema OVNI. Se acallan testigos. Entre los investigadores particulares que trataron de penetrar la barrera del silencio que rodea a cada caso observado, superando toda clase de inconvenientes, ocultamientos, simulaciones y sorprendentes desmentidas de testigos o protagonistas, son muchos los que han quedado por el camino, habiendo afirmado otros que los hechos descubiertos por ellos eran de-

BUENOS AIRES, 4. (UPI).— El Comité de Observaciones de Objeto Voladores no Identificados (CODOVNI) informó en torno a la creación de un detector de perturbaciones magnéticas que permitirá localizar la presencia de OVNIS en el espacio, según afirmó.

El inventor, Ariel Ciro Rietti, que es el presidente del comité, expuso el detector explicando que consiste en una "T" invertida, con el brazo más corto en forma horizontal y el más largo vertical. Cuenta con un tubo de material plástico cerrado y del brazo más largo pende un hilo del que cuelga una varilla de metal imantado.

Añadió que "en el centro de esa varilla se halla fijo un espejo solidario con ella sobre el que incide un haz de luz que se refleja en una célula fotoceléctrica. El aparato funciona cuando una perturbación magnética, que atribuye a los OVNIS mueve la varilla y el haz de luz reflejado deja a oscuras la célula fotoceléctrica y suena una alarma", dijo.

Cuando ello se produce — señaló — el observador podrá buscar la causa de la perturbación magnética y fotografiarla. "La construcción del aparato detector es sencilla y su manejo muy simple", subrayó. Comentó que "la idea había nacido a raíz del suceso registrado en 1965 en la Antártida, cuando en las bases navales argentinas se habían registrado variaciones magnéticas anormales que dieron a un tiempo los relojes magnéticos allí instalados, observándose simultáneamente la presencia de objetos luminosos no identificados".

"De esas observaciones de que los OVNIS producen una perturbación geomagnética, es que pensamos lanzar la operación 'Magnet', que consistirá en que todos los que tengan nuestras inquietudes de observación posean un detector de estas perturbaciones, inculcando para despertar interés por la difusión del invento.

OVNI: Incredulidad o Alucinación

¿LAS VISPERAS DE LA INVASIÓN?

Los testimonios sobre la existencia, y frecuentación de nuestra atmósfera por los llamados platos voladores son de antigua data. Los primeros surgen de grabados cuya antigüedad se remonta al siglo XVIII, los más recientes vienen ocupando las planas de nuestros diarios, en particular, en nuestro país, de hace pocas semanas. Son numerosas las personas que dicen haber avistado a los misteriosos OVNI'S; y pocos días ha, el diario "La Razón" de Buenos Aires denunciaba el caso extraordinario del joven Iríart que habría dialogado con los tripulantes del vehículo, y que habría recibido una invitación en castellano para llevárselo a conocer el mundo. Tan singular y relevante afirmación, estaría avalada por el testimonio de varios vecinos, entre ellos un funcionario oficial, que también habrían visto al vehículo aunque no recibido la gentil invitación.

La existencia real de los OVNI'S parece ser un hecho indiscutible. Ha quedado atrás en el tiempo la peripécia que le costara la vida al piloto Mantell, de la Fuerza Aérea Estadounidense. Las fotos obtenidas por aviones a reacción de la Fuerza Aérea Italiana y la denuncia oficial del paso de ellos por encima de bases navales, produciendo trastornos en los instrumentos, efectuada por la Armada Nacional. Personalidades de tanta gravedad como el Gral. Mac Arthur, y el experto en cohetería Von Braun, han afirmado oficialmente, en círculos técnicos-militares, la inminencia del contacto con "siniestras fuerzas extraterráqueas", o "con razas más adelantadas e intelligentes que las nuestras". Las características de los OVNI'S, elevada velocidad e insólita maniobrabilidad, permiten atribuirles origen extraterrestre; desde que la posesión de un vehículo semejante por cualquiera de las grandes potencias mundiales le permitiría asumir el liderazgo rompiendo el equilibrio de fuerzas actual, y convirtiendo en obsoletas la mayor parte de las armas de disuasión.

INCOGNITAS

Ahora bien, la existencia de vida semejante a la humana en otros mundos plantea una serie de interrogantes de contenido polémico; y vinculados a la psicosociología, a las religiones, a la ciencia, a la economía, a la antropología, etc. La sola afirmación de tal existencia trastoca el sistema de valores aceptado por nuestra civilización. ¿Por qué suponer que el mayor desarrollo técnico de tales seres, no trae aparejado un mayor desarrollo moral? ¿Por qué atribuirles nuestras debilidades y ambiciones? Y si

● Informe de la
Armada

ROSARIO, 4. (UPI).— En conferencias de prensa, el comandante en jefe de la armada, almirante Benigno I. Varela aludió a la participación de la marina de guerra en la investigación de los OVNI.

Informó que la fuerza armada registra estadísticamente "las denuncias serias", sobre la aparición de tales objetos y recordó que "la armada argentina informó en su oportunidad, e igualmente lo hicieron las bases chilena e inglesa, que en la Antártida se vieron 5 luces que avanzaban en la misma dirección".

"Ese es un fenómeno", agregó, "que hasta ahora no ha tenido explicación lo cual no significa que necesariamente sean platillos voladores. Existen muchísimos fenómenos que hasta ahora no tienen explicación", previno.

3a.

¿LAS VISPERAS DE LA INVASIÓN?

Algunos testimonios datan de muy antiguo. El de la presente nota gráfica pertenece al libro de Ezequiel en la biblia, donde se mencionan estas raras apariciones.

Los testimonios sobre la existencia, y frecuentación de nuestra atmósfera por los llamados platos volados con antigüedad se remontan al siglo XVIII, los más recientes vienen ocupando las planas de nuestros diarios, en particular, en nuestro país, de hace pocas semanas. Son numerosas las personas que dicen haber avisado a los misteriosos OVNI'S; y pocas días ha, el diario "La Razón" de Buenos Aires denunciaba el caso extraordinario del joven Inlart que habría dialogado con los tripulantes del vehículo, y que habría recibido una invitación en castellano para llevarle a conocer el mundo. Tan singular y relevante información, estaría avalada por el testimonio de varios vecinos, entre ellos un funcionario policial, que también habrían visto al vehículo aunque no recibido la gentil invitación.

La existencia real de los OVNI'S parece ser un hecho indiscutible. Ha quedado atrás en el tiempo la perspectiva que le costara la vida al piloto Mantell, de la Fuerza Aérea Estadounidense. Las fotos obtenidas por aviones a reacción de la Fuerza Aérea Italiana y la denuncia oficial del paso de ellos por encima de bases navales, producidos trastornos en los instrumentos, efectuada por la Armada Nacional. Personalidades de tanta gravedad como el Gral. Mac Arthur, y el experto en ciencias Von Braun, han afirmado oficialmente, en círculos técnicos militares, la inminencia del contacto con "siniestras fuerzas extraterrestres", o "con razas más adelantadas e intelligentes que las nuestras". Las características de los OVNI'S, elevada velocidad e insólita maniobrabilidad, permiten atribuirles origen extraterrestre: desde que la posesión de un vehículo semejante por cualquiera de las grandes potencias mundiales le permitiría asumir el liderazgo rompiendo el equilibrio de fuerzas actual, y convirtiendo en obsoletas la mayor parte de las armas de disuasión.

INCOGNITAS

Ahora bien, la existencia de vida semejante a la humana en otros mundos plantea una serie de interrogantes de contenido polémico; y vinculados a la psicosociología, a las religiones, a la ciencia, a la economía, a la antropología, etc. La sola afirmación de tal existencia trastoca el sistema de valores aceptado por nuestra civilización. ¿Por qué suponer que el mayor desarrollo técnico de tales seres, no trae aparejado un mayor desarrollo moral? ¿Por qué atribuirles nuestras debilidades y ambiciones? Y si el Redentor vino a nuestro mundo, ¿también redimió con su augusto sacrificio a tales seres? ¿Cómo es para ellos el pecado? ¿Cuál es el propósito que los anima en su acercamiento a nuestro planeta? ¿Podremos con nuestras débiles fuerzas resistir una invasión guiada por propósitos de conquista? ¿Cómo encararán los ministros de nuestra Iglesia la labor de adocenamiento y evangelización con seres indudablemente superiores? ¿Cuál es el Dios hecho a la imagen y semejanza de ellos? ¿Qué podremos intercambiar con ellos? ¿Cómo es su naturaleza humanoide? LA INVASION?

Los testimonios sobre la existencia, y frecuentación de nuestra atmósfera por los llamados platos volados son de antigua data. Los primeros surgen de grabados cuya antigüedad se remonta al siglo XVIII, los más recientes vienen ocupando las páginas de nuestros diarios, en particular, en nuestro país, de hace pocas semanas. Son numerosas las personas que dicen haber avistado a los misteriosos OVNIS; y pocos días ha, el diario "La Razón" de Buenos Aires denunciaba el caso extraordinario del joven Iriart que habría dialogado con los tripulantes del vehículo, y que habría recibido una invitación en castellano para llevarle a conocer el mundo. Tan singular y relevante atracción, encantó avalada por el testimonio de varios vecinos, entre ellos un funcionario policial, que también habían visto al vehículo aunque no recibido la gentil invitación.

La existencia real de los OVNIS parece ser un hecho indiscutible. Ha quedado atrás en el tiempo la perspectiva que le costara la vida al piloto Mantell, de la Fuerza Aérea Estadounidense. Las fotos obtenidas por aviones a reacción de la Fuerza Aérea Italiana y la denuncia oficial del paso de ellos por encima de bases navales, produciendo trastornos en los instrumentos, efectuada por la Armada Nacional. Personalidades de tanta gravedad como el Gral. Mac Arthur, y el experto en cohete, la Von Braun, han afirmado oficialmente, en círculos técnicos-militares, la inminencia del contacto con "siniestras fuerzas extraterráqueas", o "con razas más adelantadas e inteligentes que las nuestras". Las características de los OVNIS, elevada velocidad e insólita maniobrabilidad, permiten atribuirles origen extraterrestre; desde que la posesión de un vehículo semejante por cualquiera de las grandes potencias mundiales le permitiría asumir el liderazgo rompiendo el equilibrio de fuerzas actual, y convirtiendo en obsoletas la mayor parte de las armas de disuasión.

INCOGNITAS

Ahora bien, la existencia de vida semejante a la humana en otros mundos plantea una serie de interrogantes de contenido polémico y vinculados a la psicosociología, a las religiones, a la ciencia, a la economía, a la antropología, etc. La sola afirmación de tal existencia trastoca el sistema de valores aceptado por nuestra civilización. ¿Por qué suponer que el mayor desarrollo técnico de tales seres, no trae aparejado un mejor desarrollo moral? ¿Por qué atribuirles nuestras debilidades y ambiciones? Y si

I Gral. Mac Arthur, y el experto en concreto von Graff, han afirmado oficialmente, en círculos técnicos, la inminencia del contacto con "siniestras fuerzas extraterráqueas", o "con razas más adelantadas e interesantes que las nuestras". Las características de los IS, elevada velocidad e insólita maniobrabilidad, permiten atribuirles origen extraterrestre; desde que la posesión de un vehículo semejante por cualquiera de las grandes potencias mundiales le permitiría asumir el liderazgo dando el equilibrio de fuerzas actual, y convirtiendo las balaletas la mayor parte de las armas de disuasión.

CONOCIMIENTOS

Por otra parte, la existencia de vida semejante a la humana bien, la existencia de vida semejante a la humana en otros mundos plantea una serie de interrogantes de contenido polémico; y vinculados a la psicosociología, religiones, a la ciencia, a la economía, a la antropología, etc. La sola afirmación de tal existencia trastoca el mundo de valores aceptados por nuestra civilización. ¿Por suponer que el mayor desarrollo técnico de tales seres no trae aparejado un mayor desarrollo moral? ¿Por atribuirles nuestras debilidades y ambiciones? Y si sucedió esto a nuestro mundo, ¿también redimió con su agusto sacrificio a tales seres? ¿Cómo es para ellos el amor? ¿Cuál es el propósito que los anima en su acercamiento a nuestro planeta? ¿Podremos con nuestras débiles fuerzas resistir una invasión guiada por propósitos conquistadores? ¿Cómo encararán los ministros de nuestra cultura la labor de adoctrinamiento y evangelización contra las indudablemente superiores? ¿Cuál es el Dios hecho imagen y semejanza de ellos? ¿Qué podremos intercambiar con ellos? ¿Cómo es su naturaleza humanoides? La última instancia. ¿Son siquiera humanoides???

Esta foto pertenece al archivo de la USAF y fue tomada por George Stock en Nueva Jersey, Estados Unidos, en julio de 1952 siendo una de las pruebas más contundentes de la existencia de los OVNI.

OTRAS GALAXIAS

Sentado que tales seres pertenezcan a otro planeta que el nuestro, la posibilidad de que provengan de otro sistema que el solar, está en función directa de su capacidad de transportarse a velocidades cercanas a las de la luz. Esto trae aparejada la necesidad de reconocer que "su" materia difiere fundamentalmente de la nuestra, o que, por lo menos, pueden convertirse en energía y viceversa. Entonces sus medios de comunicación no pueden, en modo alguno, asemejarse a los nuestros; probablemente sean "telépatas", y seguramente su sistema de visualización goce de las ventajas de un radar-laser. ¿Cómo podremos entonces establecer una comunicación eficiente con ellos?

La construcción y manejo de un vehículo de transporte como el "plato volador", implica la posesión de conocimientos técnicos muy superiores a los nuestros, y el control de fuentes generadoras de energía para nosotros desconocidas. ¿Podrán trasmirnos algo de su ciencia, atento la sutil diferencia de conocimientos y la diificultosa comunicación? Es probable que sucede, conforme lo avanza la teoría de Agnew, y habría acontecido millones de años ha: la pobreza intelectual nuestra impide la absorción de conocimientos de los extraterrestres, unos pocos logran memorizar algunos de ellos y constituyen una casta privilegiada sacerdotal que usufructúa el mando en su provecho, y se capa de ser destinatarios de una verdad divina revelada, excluyendo de ellas a la mayoría, manteniéndola en su ignorancia, hasta que los conocimientos se pierden en la tradición oral y el secreto.

Si sus sentidos son presumiblemente distintos de los nuestros, sus sensaciones deben necesariamente diferir. Para una vista con propiedades del radar-laser. ¿Cuál es la plástica adecuada? ¿Cuál la literatura admisible para un telépata? ¿Y qué decir de la música? Pero esto nos trae otra problemática: ¿Cómo y cuál es la voluntadidad de tales sentidos y de tales sensaciones? ¿Cuál su gula? ¿Cuál su soberbia? ¿Cuál su "pecado original"? Y si son seriamente diferenciados: ¿Cuál y cómo su pecado de lujuria, a lo que tenemos que aprender; más aún tratar de com-

Nuestra estrella, la Tierra, se ve visitada cada 28 meses por los extraños vehículos que hemos denominado OVNI. Estas coincidencias, avalada, por razones técnicas, excluyen la posibilidad de una mera alucisión colectiva.

prender; pero esencialmente, y si podemos "amarlos como a nosotros mismos", ¿que camino de salvación podemos indicarles?

"El Pueblo", 15 Jul

OVNI en Mar del Plata 6

"Diario del Pueblo" (TAN016) 13 July 68

En la Base de Tandil aterrizó un Plato Volador 5

Informaciones procedentes de la ciudad de Tandil, dan cuenta que un O. V. N. I. aterrizó en la noche del 8 de julio, en la Base Aérea con asiento en esta ciudad.

Dada la reserva que sobre el particular guardan las autoridades de la Base, recién ahora, merced a diversos medios, se pudo establecer la veracidad de lo que decímos.

Dicha información, fue recogida en fuente responsable, informándose que a las 22 del día 8, desde la torre de control se apreció la existencia de un aparato desconocido que sobrevolaba la Base Aérea y momentos después pasó dentro del perímetro de la Unidad.

Agrega la información que después de breves instantes, el "plato volador" se elevó en forma vertiginosa con sus destellos de luz rojiza y cambiantes tonos azulados.

Se asegura también que la desconocida "nave" de-

jó sus huellas sobre el pasto y que en la Base Aérea, se trata este hecho con total reserva ya que no se trata de una ilusión óptica colectiva, a los efectos de evitar los comentarios sensacionistas.

Esta fotografía, obtenida por el Sr. Norberto Gallardo, reportero gráfico de "La Capital", de Mar del Plata, registra el paso de un OVNI, alrededor de las 23 del viernes último, sobre un sector de playa de la ciudad balnearia

MAR DEL PLATA. — La existencia de objetos voladores no identificados (OVNI) ha desatado desde hace mucho la polémica entre quienes tienen la certeza de que se trata de visitantes extraterrestres y aquellos que desechan la verosimilitud de esa afirmación y dan una serie de explicaciones para justificar la presencia de esos artefactos.

Esta ciudad, luego de una serie de denuncias sobre visiones misteriosas, reincidentes en los últimos tiempos, en forma coincidente con lo ocurrido en diversos lugares del país, ha logrado testimonios gráficos de un OVNI, aunque, por supuesto, ello, por sí solo, no contribuya en nada aclarar el problema hasta tanto puedan expedirse al respecto expertos en la materia.

El hecho concreto es el siguiente. A las 23 del viernes último se encontraban en avenida Luro y el bulevar Marítimo los señores Juan Mario Duhalde y Norberto Gallardo, redactor y fotógrafo, respectivamente, del diario "La Capital", quienes habían concurrido al lugar a pedido de tres jóvenes domiciliados en las inmediaciones que aseguraban haber observado desplazamientos de esos artefactos en varias oportunidades.

Mientras caminaban por la

escollera junto con Jorge D. Acuña y Hugo Santaella, al llegar junto a la pileta de Punta Iglesias vieron un punto luminoso hacia el Sur, que a gran velocidad fue a desvanecerse en dirección al Torreón. La rauda pasada, no obstante, pudo ser captada por el señor Gallardo.

El testimonio gráfico es gentileza de "La Capital".

A la 1.30 del sábado, además, otro testimonio fue logrado por el señor Francisco Carlos Sartorio quien regresaba a su domicilio con su esposa e hijos.

Al advertir un reflejo en el mar y mirar hacia arriba vio un objeto extraño que realizaba evoluciones. Tomó su filmadora y durante 30 segundos captó el paso de aquél sobre el mar y un sector de la ciudad. Asimismo, un cronista de otro diario local recogió la impresión de varias personas que afirmaron haber presenciado la aparición del OVNI sobre la playa Bristol a la misma hora en que el señor Sartorio realizó su filmación.

Disertóse acerca de los objetos no identificados

(7)

En el Centro Argentino de Ingenieros, invitado por el Centro de Ingenieros Alemanes, en la Argentina, el señor Federico B. Kirbus pronunció una conferencia sobre el tema "Realidad y mito de los platos voladores".

Dijo que desde la primera observación de un "Objeto Volador No Identificado" -OVNI-, en 1947, hasta fines de 1965, las autoridades de los Estados Unidos habían examinado 10.147 observaciones de esta índole, para las cuales 9.501, o sea un 93 por ciento, hallaron una explicación por demás simple: trataba de globos sonda, aviones, helicópteros, la aurora boreal, fuegos artificiales, rayos estéricos, meteoritos, formaciones de nubes, ilusiones ópticas, fallas de la vista, estrellas, planetas y hasta la misma Luna.

Los satélites

A las apariciones de este tipo —dijo luego— se agregaron, a partir de 1957, los satélites artificiales ya que desde octubre de ese año, hasta el 15 de febrero de 1968, se lanzaron 780 satélites, y entraron en órbita, además, 2.225 cohetes portadores o fragmentos de éstos. La mayor parte de estas piezas, denominadas "basura espacial", ha vuelto a caer a tierra, produciendo, a su reintegro en la atmósfera un espectáculo muy llamativo y a veces desconcertante para los observadores circunstanciales.

Tráfico aéreo

Más adelante dijo el señor Kirbus que tampoco se suele tener debidamente en cuenta la alta densidad del tráfico aéreo. En el Aeroparque de Buenos Aires, por ejemplo —expresó— aterriza y levanta vuelo un aparato a un intervalo promedio de 3 minutos 23 segundos, durante la temporada estival. Tan alta frecuencia de la actividad aeronáutica hace que gran parte del total de las observaciones de presuntos OVNI'S deban imputarse a aeronaves civiles o militares.

Seres de otros planetas

Más adelante examinó el orador la probabilidad de visitas de otros planetas del sistema solar explicando que la gran mayoría de estos son inhabitables, y que solamente Marte y Ganimedes, uno de los cuatro grandes satélites de Júpiter, poseen vestigios de una atmósfera cuya composición parece ser similar a la terrestre.

Dijo que si los presuntos vi-

sitantes proviniesen de tales cuerpos celestes, sólo podrían moverse, respirar y hablar con extrema dificultad en la tierra, debido a que nuestro planeta posee una gravitación mayor y también una atmósfera mucho más densa; y si los extraños viajeros procediesen de un cuerpo con una atracción gravitacional mayor que la terrestre, deberían poder realizar grandes saltos debido a su musculatura altamente desarrollada, detalles que jamás se mencionaron por presuntos observadores.

La forma de los OVNI'S

Dijo luego que debido a que Marte o Ganimedes casi no poseen atmósfera, no se explica tampoco la forma aerodinámica perfecta que se les asigna a dichos artefactos, ya que en tal caso, su curiosa conformación, parecida a un cigarrillo, un plato o una esfera, no se justifica en absoluto.

Con respecto a la supuesta velocidad de los OVNI'S, de has-

ta 10.000 km/h, el orador —afirmó— debe tenerse presente que en un radio de 16 años luz alrededor del Sol, existen 55 estrellas, de las cuales solamente dos podrían permitir el desarrollo de una vida similar a la terrestre, si es que estos dos astros poseen planetas. Aún así, si partiendo de Alfa Centauri, que es la más próxima al Sol, alguien quisiera hacer impacto justamente en nuestro planeta, las probabilidades que así sea serían iguales a 1: 5.220%.

La existencia

Finalmente expresó, como conclusión, que "tales platos voladores nunca han existido ni existen como tales y que cuando una observación ha sido fundada y real, halló y hallará siempre una explicación sensata y racional, aunque por cierto jamás sensacional".

Armas secretas

Agregó que el control de radar, establecido por los Estados Unidos y la Unión Soviética, para prevenirse de posibles ataques por sorpresa, establece que ni siquiera puede tratarse a los OVNI'S como armas secretas y que el mito se derrumba aparatósamente para dar lugar a una comprobación terminante y real: la de que tales artefactos no existen ni de una forma, ni de otra, salvo en la imaginación de la gente.

⑧ Los OVNI Incursionan Ahora Sobre Mendoza

MENDOZA, 16 (De nuestro corresponsal). — Fueron avistados platillos voladores en cielo mendocino. Los circunstanciales observadores fueron, entre otros, la señora Martha D. Georgelli de Ferrari, argentina, de 34 años, casada, madre de dos hijos que vive en Videla Castillo 2657. Según declaraciones de la señora de Ferrari, el jueves pasado, a las 19, hallándose en compañía de su suegra, en el patio de su casa, pudo observar la presencia de un objeto extraño en el cielo. Ante el asombro de ambas mujeres, el extraño objeto volador, de gran tamaño y luminosidad, se mantuvo inmóvil, a unos 10 metros del suelo. Luego de unos minutos comenzó a evolucionar y envuelto en vapores rojizo-verdosos cobró altura a gran velocidad hasta desaparecer.

— CRONICA A.M. 17 July 68

La Nación 19 July 68 Más apariciones de ⑨ objetos voladores

TRES ARROYOS. — Un vecino del partido de Juárez asegura haber visto un plato volador, hecho que habría sido corroborado por otras personas de la zona. La información difundida aquí expresa que el señor Tomás Galarza, de 37 años, soltero, integrante de la firma propietaria de la cabaña Laura Leofú dedicada a la cría de la raza Lincoln, aproximadamente a las 22.15 del 9 del actual, observó un objeto volador no identificado.

El nombrado ganadero regresaba a su establecimiento de campo y a esa hora se hallaba guardando una camioneta en el garaje del mismo, distante 7 kilómetros de la localidad de Coronel Rodolfo Bunge. Entonces vio que un objeto, de forma redonda, de unos dos metros de diámetro y que despedía una luz anaranjada, se dirigía hacia la casa, en un recorrido de Sur a Norte.

En ese instante —afirma— se apagaron los faros de la camioneta y se detuvo el motor, en tanto todo el vehículo vibraba. El señor Galarza tuvo la impresión de que el OVNI iba a aterrizar, pero siguió finalmente viaje a toda velocidad, sin poder apreciarse por ello otros detalles.

Otro OVNI en Botucato

BOTUCATO, Brasil, 16 (Reuter). — Un objeto volador no identificado (OVNI) aterrizó a unos 200 metros del hospital de Clínicas en esta ciudad, a la vista de docenas de personas, informó el diario "Correio de Botucato".

El periódico publica una fotografía sumamente detallada, de las marcas dejadas en el suelo al posarse el aparato.

Testigos del hecho manifestaron que el objeto tenía forma de plátano, con una serie de orificios que semejaban ventanillas, de color grisado. Se posó sobre su tren de aterrizaje con forma de trípode. Desde el centro de su base se vio aparecer una escalerilla que fue descendiendo hasta el suelo, pero

cuando un grupo de niños corrió hacia el plátano, la escalerilla fue lentamente retirada y el aparato levantó vuelo veloz pero absolutamente silencioso.

Una maestra de escuela, la señorita Nair de Melo Rodrigues, dijo que el OVNI voló sobre su casa, a baja altura, antes de aterrizar. Expresó que se resistía a dar crédito a lo que sus ojos veían. Llamó a su hermana Nazaria, diciendo: "Si no estoy loca, creo que he visto un plátano volador".

"Nazaria salió corriendo al patio, justo a tiempo para ver al plátano bajando a tierra", agrega el diario.

"GENTE" 18 July 68

EN SERIO: ¿EXISTEN LOS

Le aseguro que me sobresalté cuando dijó:

—En realidad resulta inminente un contacto extraterrestre.

Menos mal que era pleno mediodía y estábamos en el muy temícola barrio de Almagro, que si no no me hubiese resultado fácil acertar con la pregunta que se imponía.

—¿Con qué fundamenta ese vaticinio?

—Con un ejemplo muy simple. El hombre viaja hacia el espacio, ¿no es cierto? Es decir, marcha en cierta dirección. Pues bien, si alguien viaja de Primera Junta a Plaza de Mayo, ¿usted no cree que habrá ofrecido pautas para que otro individuo tan inteligente como él invierta el trayecto? Es sólo una cuestión de lógica, amigo.

—Entonces hay vida en otros mundos?

—¡Y por qué hemos de creer que siendo el cosmos tan extenso sólo nosotros gocemos de ese privilegio! . .

Estábamos en la sede de CODOVNI, una institución científica dedicada al estudio de objetos voladores no identificados (OVNI), conversando con su presidente, don Ariel Rietti. Un hombre inquieto, con 45 años de vida y un profundo amor por todo lo que hace.

—¿Cómo y cuándo se formó CODOVNI?

—CODOVNI, cuyas siglas equivalen a Comisión Observadora de Objetos Voladores No Identificados, nació de la inquietud de va-

rias personas, entre las cuales me cuenta, interesadas en averiguar la verdad de este fenómeno. Establecidos los contactos imprescindibles, decidimos crear una organización mediante la cual todos nuestros esfuerzos individuales no se desperdigaran. Es decir, crear un punto de contacto para cotejar información y así ir desmenuzando la cosa para llegar a conclusiones definitivas. Esa intención se plasmó hace 12 años, y desde ese entonces nuestro esfuerzo no admite treguas, toda vez que no sólo investigamos por nuestra cuenta, sino que además mantenemos un estrecho contacto con otras 250 organizaciones que desarrollan un programa similar en distintas partes del mundo.

—Y cómo se concreta ese intercambio de información?

Básicamente por intermedio de revistas especializadas que cada una de estas organizaciones edita. Aquí usted puede ver algunas de ellas.

El señor Rietti colocó sobre el escritorio varias carpetas rotuladas, Japón, Italia, Inglaterra, etc., en cuyo interior se apilaban las revistas mencionadas. En rápido hojeo, en una de ellas pude apreciar la reproducción de una cartografía área de 5000 años de antigüedad.

Al margen de este sistema de comunicación habitual, si alguna situación especial lo determina recurrimos a otros métodos más veloces para trasmisir la información.

—¿Qué hay de cierto en la existencia de los OVNI's?

—Esa es una cuestión descartada para nosotros. Los OVNI's existen incuestionablemente. Lo que tenemos que averiguar ahora es cómo se impulsan y de dónde vienen.

—Hay Indicios en ese sentido?

—No, todas son conjeturas y eso nos obliga a intensificar esfuerzos para llegar a la verdad cuanto antes. De acuerdo con esta premisa hemos elaborado el proyecto Magnet, un programa de investigación en el que intervienen 1000 personas, que en alerta vigilia se disponen a obtener testimonios gráficos sobre OVNI's que sobrevuelen nuestro país. De allí, del cotejo de las pruebas, a obtenerse, surgirán las deducciones lógicas.

—Usted habló de alerta vigilia. ¿Es que no existen medios más eficaces que la paciencia humana para detectar los OVNI's?

—Macarudo, me alegro de su inquietud, porque aquí en CODOVNI hasta hace poco tiempo nos hacíamos la misma pregunta. Por eso es que nos abocamos a encontrar una solución, que llegó después de mucho menear la cosa. Venga, que te haré una demostración práctica.

Siguiendo los pasos del señor Rietti, llegué frente a una mesa sobre la que se encontraban varios objetos extraños a la vista de legos en la materia. Un cerebro electrónico, una lupa, un tubo hueco de vidrio, un dispositivo de alarma, todo muy quietecito,

todo muy silencioso en los prólogos de la prueba. Pero en cuanto el señor Rietti comenzó a manipular un OVNI estímulo (un plato volador en miniatura) la escena cambió fundamentalmente. Una larga aguja ubicada en el interior del tubo de vidrio comenzó a oscilar acusando el estímulo. En el centro de la aguja un pequeño espejo que emitía luz sobre el cerebro electrónico, al moverse, se fue de foco y entonces automáticamente el cerebro, encargado de captar cualquier anomalía, se comunicó con la alarma, que comenzó a sonar estrepitosamente, al mismo tiempo que la aguja de una brújula ubicada sobre la mesa giraba locamente acusando la interferencia.

—¿Qué le parece? —dijo el señor Rietti, evidentemente satisfecho de la demostración. Este aparato es único en el mundo y lo inventamos nosotros. Mediante el mecanismo que usted acaba de ver (describirlo en detalle es imposible, de allí que haya intentado una explicación elemental) y usando otros elementos de tamaño adecuado se puede detectar perfectamente la presencia de OVNI's en grandes espacios.

A esta altura de la charla la imaginación corría en tiempo lúz y me sorprendí viajando en un gran vehículo espacial. Pero mi interlocutor, ajeno a estas divagaciones, me seguía ilustrando.

Existe la hipótesis de que ya hemos sido visitado por seres

Estábamos en la sede de CODOVNI, una institución científica dedicada al estudio de objetos voladores no identificados (OVNIs), conversando con su presidente, don Ariel Rietti. Un hombre inquieto, con 45 años de vida y un profundo amor por todo lo que hace.

—¿Cómo y cuándo se formó CODOVNI?

—CODOVNI, cuyas siglas equivalen a Comisión Observadora de Objetos Voladores No Identificados, nació de la inquietud de va-

escritorio varias carpetas rotuladas, Japón, Italia, Inglaterra, etc., en cuyo interior se apilaban las revistas mencionadas. En rápido hojeo, en una de ellas pude apreciar la reproducción de una cartografía área de 5000 años de antigüedad.

—Al margen de este sistema de comunicación habitual, si alguna situación especial lo determina recurrimos a otros métodos más veloces para trasmisir la información.

OVNIs: Varios de ellos cruzan el cielo. Hasta ahora aún no han aterrizado. Esto es lo que muchos llaman platos voladores. La ciencia no los descarta.

6

Ni hasta hace poco tiempo nos hacíamos la misma pregunta. Por eso es que nos abocamos a encontrar una solución, que llegó después de mucho menear la cosa. Venga, que te haré una demostración práctica.

Siguiendo los pasos del señor Rietti, llegué frente a una mesa sobre la que se encontraban varios objetos extraños a la vista de legos: en la materia. Un cerebro electrónico, una lupa, un tubo hueco de vidrio, un dispositivo de alarma, todo muy quietecito,

imposible, de allí que haya intentado una explicación elemental) y usando otros elementos de tamaño adecuado se puede detectar perfectamente la presencia de OVNIs en grandes espacios.

A esta altura de la charla la imaginación corría en tiempo luz y me sorprendí viajando en un gran vehículo espacial. Pero mi interlocutor, ajeno a estas divagaciones, me seguía ilustrando.

Existe la hipótesis de que ya hemos sido visitado por seres

Para la mayoría del público el problema de los platos voladores ya no representa ningún tipo de mistificación. Encuestas oficiales, ritmos de aparición y grupos de científicos sostienen de que los OVNIs son realidad.

PLATOS VOLADORES?

En su taller, Angel Rietti y dos de sus ayudantes. Los platos voladores son el motivo de una constante investigación en CODOVNI. Para ello la organización dispone de todos los elementos necesarios a su apasionante labor.

extraterrestres en épocas pretéritas. Según esa hipótesis, que yo considero perfectamente factible, esos seres habrían testimoniado su presencia a través de las pirámides de Egipto, las ruinas mayas y las incáicas, en las que se aprecia un sorprendente conocimiento de astronomía y matemáticas para esa época.

—¿Qué otros testimonios podrían convalidar esa hipótesis?

—Bueno, hay algo que resulta por demás sugerente. Fíjese que las ruinas mayas y las incáicas están ubicadas en una misma línea geográfica. En nuestro país esa línea se continúa en Salta, Córdoba y Bahía Blanca, y vendría a culminar geográficamente en el Polo Sur. ¿No le parece demasiada coincidencia que las frecuentes apariciones de OVNIs se produzcan sobre esa línea?

—Y qué deduce usted de ello?

—Pues que los tripulantes de esas naves conocen muy bien el terreno que pisan, por haberlo visitado antes. Algo así como cuando usted navega habitualmente cierto río y termina por conocer perfectamente cuáles son los sitios más indicados para amarrar. Tenga en cuenta, además, que a lo largo de esa línea la banda radiactiva de Van Hallen es menos nociva, y eso vendría a explicar el porqué de esa preferencia en sus visitas.

—Considera necesario crear un estado de conciencia colectiva sobre este problema, o estima más

inteligente manejarse dentro de la investigación científica?

—Soy decidido partidario de un movimiento de apertura hacia el gran público, y esto, fundamentalmente, porque en tanto se agotan etapas de investigación todos están en condiciones de aportar algo de interés. Cualquier persona, y esto destaque, puede obtener fotos de OVNIs si la circunstancia lo favorece. Con esas fotos detallando fecha y hora nosotros podemos sacar conclusiones de interés, por lo que desde ya recabamos esa colaboración.

La seriedad con que se había tratado el tema. El conocimiento evidente del señor Rietti, sobre esta cuestión, tan sobre el tapete, me llevaron a estimar oportuna una última pregunta.

—Se puede creer en esas personas que afirman haber visto OVNIs, seres extraterrestres, etcétera?

—Para mí esa es exclusivamente una cuestión de fe. Si usted me conoce a mí y sabe que soy serio debe creer lo que le diga, si no me conoce tiene usted derecho a pensar lo que quiera.

Me fui rumiando todo lo que había visto y escuchado, y mientras me alejaba de CODOVNI pensé que muchas verdades universalmente aceptadas habían sido en un tiempo meras teorías, resistidas y negadas. Que Copérnico, Galileo Galilei y Colón supieron mucho de eso. Y que para ellos también había sido exclusivamente una cuestión de fe.

Informó la Gendarmería sobre la visión de un objeto no identificado

NEUQUEN. — En el Comando de la XII Agrupación de Gendarmería Nacional se informó sobre la aparición de un OVNI en territorio de esta provincia. El anuncio oficial en tal sentido lo hizo el comando del Escuadrón 30, con asiento en Chos Malal, el que decía que un oficial y cuatro suboficiales observaron un objeto volador no identificado a los 15 minutos del día 16 de julio, mientras avanzaban por la ruta provincial 101 en dirección a la localidad de Andacollo, cabecera del departamento Minas. La visión del objeto se produjo en un lugar situado a cinco kilómetros del paraje La Primavera. Volaba en dirección Este-Noreste y Oeste-Sudoeste a baja altura; su desplazamiento era lento y velocidad constante. El tamaño era aparentemente de dos metros de diámetro, color celeste luminoso cristalino, percibiéndose como un irradiante de luz pura, sin variaciones ni estela aurea. Su forma era alargada, achatada y horizontal, con mayor grosor en la parte delantera. Se observó que, aparentemente, realizó un

descenso vertical en un lugar cercano, oculto parcialmente por los accidentes del terreno.

El fenómeno fue percibido aproximadamente durante cinco minutos, lapso en el que el "jeep" en que viajaba el personal de Gendarmería experimentó una pérdida de potencia.

Varios OVNI en el cielo de Mendoza

MENDOZA. — Objetos voladores no identificados fueron observados desde la torre de control del aeropuerto El Plumerillo. Según la descripción del personal de turno, estos objetos se encontraban en dirección sudoeste, aproximadamente a 30 grados de altura sobre el horizonte, "despedían efectos luminosos de color verde en la parte superior y de color rojo en la parte inferior". La distancia aparente a que se hallaban, del lugar de observación, impidió determinar su tamaño.

Uno de los pilotos del avión Caravelle, de Aerolineas Argentinas, matrícula HGZ, efectuaba el vuelo 216, entre Mendoza y Santiago de Chile, e informó a la torre de control que mientras volaba a 11.000 pies observó en dirección al Oeste "un efecto luminoso no identificado". El piloto no descartó la posibilidad de que se tratara de una estrella. No obstante, manifestó su sorpresa por el extraordinario brillo que despedía.

Mientras tanto, un fotógrafo aficionado de Mendoza, Oscar Eduardo Heinze, de 25 años, en momentos en que se disponía a

tomar una imagen de la Luna, captó también en el cielo mencionó un objeto volador no identificado. Según su descripción, se trata de "una forma esférica luminosa, primero, seguida de varios cuerpos menores de forma vagamente parecida a trémpos".

La fotografía fue registrada con una máquina Petri 7-S, y luego puesta a disposición de las autoridades de Aeronáutica.

OVNI en España

BILBAO, 18 (AFP). — El diario "Correo Español" publicó el miércoles la fotografía de "un platillo volador", tomada el 20 de octubre sobre la playa Algorta de esta ciudad.

La fotografía —indica el diario bilbaíno— fue tomada por los miembros del Centro de Investigaciones de Fenómenos Aéreos.

El objeto desconocido habría volado sobre esa playa durante cuatro días consecutivos, entre las 3 y las 6 de la mañana, y la información señala que numerosas personas percibieron el 2 de julio otro objeto no identificado.

EXTRAÑO SUceso CON ESPECTACULAR INTERVENCION POLICI

MAR DEL PLATA (De nuestra agencia) — Olavarría vuelve a estar conmocionada por otro alucinante relato —publicado por el diario "El Popular"—, con la aparición de un plato volador del que bajaron tres tripulantes y fueron recibidos a balazos por un policía. Era poco después de las 2 de la madrugada y un amplio sector, que cruza el arroyo Tapalqué, fue ilumina-

do por un fuerte resplandor, acompañado de un extraño zumbido cada vez más intenso. Un cabo de policía —del cual se reserva el nombre—, quien en ese instante procedía a relevar a un compañero en la guardia, advirtió, asombrado, el raro fenómeno. Apresurado y con cuatro testigos más, informaron a un oficial de servicio, quien los autorizó a efectuar una recorrida de investigación.

Armados con ametralladoras y en un descubierto jeep, se dirigieron al lugar del hecho. Una vez allí, comprobaron con sorpresa y a pocos metros de altura, las evoluciones de un objeto ovalado, plano y con unas cortas patas en los bordes, que emitía destellos multicolores a su paso. De pronto, con movimientos inteligentes y a una vertiginosa velocidad, giró en forma vertical, para lue-

go posarse cerca de unos arbustos detrás de la pista de aterrizaje de aviones que utiliza la fuerza militar, en ocasiones de emergencia. La potente luz pareció disminuir y al lado del disco volador, ahora más silencioso, estaban parados tres extraños seres que median más de dos metros y llevaban puestos plateados uniformes. Armando con ametralladoras y en un descubierto jeep, se dirigieron al lugar del hecho. Una vez allí, comprobaron con sorpresa y a pocos metros de altura, las evoluciones de un objeto ovalado, plano y con unas cortas patas en los bordes, que emitía destellos multicolores a su paso. De pronto, con movimientos inteligentes y a una vertiginosa velocidad, giró en forma vertical, para lue-

go posarse cerca de unos arbustos detrás de la pista de aterrizaje de aviones que utiliza la fuerza militar, en ocasiones de emergencia. La potente luz pareció disminuir y al lado del disco volador, ahora más silencioso, estaban parados tres extraños seres que median más de dos metros y llevaban puestos plateados uniformes. Estos, con pasos lentos, dando la impresión de po-

ca estabilidad, hicieron ademanes de avanzar hacia la guarnición militar. El cabo de policía, sorprendido y temeroso, trató de detener a los tres tripulantes del OVNI, disparándole una ráfaga de ametralladora sin dar, afortunadamente, en el blanco. Luego, mientras los desconocidos personajes alzaron la mano, en un mismo momento, mostrando una pequeña bola iluminada, todos los tes-

tigos se sintieron invadidos por una sensación de desgano y cansancio, incapacitados de utilizar las armas. Por último —agrega el periódico—, los ocupantes de la nave subieron a la misma y a gran velocidad, en zigzag, se alejaron y recién entonces los presentes recuperaron sus facultades. Inmediatamente, la comisión policial retornó a Olavarría donde dio cuenta del insólito suceso.

"PLATOS" EN BARILOCHE Y CORDOBA; VIERON UNO INCENDIADO EN CHILE

BAHIA BLANCA, 25 (De nuestro corresponsal). — En el aeropuerto del centro cívico de San Carlos de Bariloche, observóse el lunes pasado a las 14 horas, un aparato excesivamente largo que comenzó a evolucionar sobre su perímetro como si buscase un lugar para aterrizar. La presencia del extraño aparato fue advertida por numerosos espectadores, entre ellos aviadores y personal de tierra de varias compañías de avión, así como también los pasajeros de tres máquinas que se disponían a emprender vuelo y oficiales de Gendarmería.

El aparato, de proporciones inusitadas —repetimos—, volaba a baja altura, a unos 70 metros, sobre las pistas de carreteo. Según uno de los testigos, el artefacto era más bien como un avión desmesuradamente largo, con alas en delta. Hacia circuitos sobre el aeródromo, llegando hasta el extremo de la pista 28. Entonces dio un giro de 360 grados sobre su eje, utilizando muy poco espacio para completar la maniobra y partió disparado con rumbo al surdiente.

El avión parecía un Canberra de reacción, con las alas en delta, largo, más grande, que un Constellation. Este espectador no observó en él ventanillas. Sobre uno de los planos tenía pintado en negro cuatro cuadros, uno más gran-

de que los otros tres. Semejaba un U-2 de los que utiliza Estados Unidos para vuelos de observación a grandes alturas. Pero el testigo afirma que no era ni un U-2 ni un Canberra.

Otro, dijo que la penca de la máquina estaba pintada de rojo y, un tercero, que volaba suave y fácilmente, como los pájaros, planeaba con ligereza y no se oía el ruido de turbinas. Estas, de acuerdo con un miembro de la Gendarmería, eran dos y estaban situadas en la parte inferior del avión, que tenía forma de cigarrillo.

En todos quedó ahora la duda sobre si se trató de un OVNI o de un avión supermoderno que no quiso identificarse.

● En Córdoba

CORDOBA, 25 (De nuestro corresponsal). — Causó alarma entre los muchos vecinos de Matienzo que lo vieron y el personal de la fábrica Kaiser, la presencia en el espacio de un objeto esférico no identificado, que desprendía destellos de distintos colores. Para los informante se trató de un "plato volador" que permaneció en la zona por espacio de una hora y media y después desapareció en dirección Sur. El OVNI —dicen quienes lo vieron— se

alejó cuando volaron aviones cerca de él. El Observatorio Meteorológico local informó, a causa de una consulta, que los vecinos de Matienzo podrían haber confundido el "plato volador" con la estrella Campbell.

● En Chile

COQUIMBO, Chile, 25 (Reuter y Associated Press). — Dos habitantes de este puerto denunciaron a las autoridades haber sido testigos de la caída al mar, envuelto en llamas, de un objeto volador no identificado. El pescador Luis Jiménez, uno de ellos, declaró a la policía: "Afirmo que era un platillo volador lo que cayó al mar. Lo vi junto con mi familia". La segunda denuncia fue hecha por el ingeniero agrónomo Gonzalo Tocornal Rogers, quien dijo que el martes pasado, cuando pasaba por una playa próxima vio caer al mar un objeto metálico que dejaba, tras sí una larga estela de vapores. "Cuando se sumergió en las aguas levantó una enorme columna de vapor", agregó.

Expertos de la Administración Nacional del Espacio (NASA) de los Estados Unidos se trasladaron al lugar, por la eventualidad de que pudiera tratarse de un satélite artificial que cumplió su período en órbita y cayó.

En Laguna Paiva, ✓ 15
Santa Fe, habrían
vistos dos OVNI.
*Nacim.
25 Jules 68*

SANTA FE. — En la madrugada del lunes, el vecino del distrito de Laguna Paiva, departamento La Capital, señor Juan Urbano, presenció el paso rasante de dos objetos voladores desconocidos que aparecieron por el lado sur del distrito y se desplazaron al Nordeste, iluminando el campo. Sus formas eran como de un trompo —de acuerdo con la descripción del vecino— y despedían luces de tonalidad anaranjada en su parte superior, en el medio eran de color rojo y atrás la luz era azulina. Los vecinos de Urbano de apellido Dallas también presenciaron el paso de los OVNI.

Repercutió el Extraño Suceso de Olavarría

Son tantos los testimonios recogidos en torno a la aparición de platillos voladores en la zona de Olavarría que pronto llegarán allí, procedentes de Estados Unidos, los señores Larry Cohen y Roy Thinnnes. El señor Cohen es el autor del guión "Los invasores", la conocida serie de televisión sobre el apasionante tema, y el señor Thinnnes es nada menos que

MAR DEL PLATA (De nuestra agencia) — Nuevos sucesos ocurridos en la zona cercana a Olavarría se suman ya a los muchos testimonios existentes sobre la presencia de objetos voladores no identificados. Tanta es la trascendencia de estas apariciones en esa zona de la provincia de Buenos Aires, que ahora también, no con finalidad científica, sino más bien para recoger elementos útiles para una serie de televisión, viajará hacia allí un grupo empresario filmico de Estados Unidos. Se trata del equipo que realiza la serie televisiva "Los invasores", de gran suceso en Norteamérica y que en Mar del Plata se ofrece por las pantallas de canal 8. Se narran en dicha serie los pormenores de una supuesta invasión de seres extraterrestres cobrando, para ello, apariencia humana. El guionista de esa serie, Larry Cohen, declaró: "La aparición de OVNI en la Argentina en forma tan continuada nos interesa mucho. Nuestra serie está fundamentada en una posibilidad real aunque se trate de una ficción. Esto nos ha decidido a viajar a ese país para estudiar los hechos sobre el mismo terreno y, de ser posible, tener conversaciones con aquellas personas que han tenido contacto con esos seres o, por lo menos, alguna experiencia visual con respecto a estas apariciones tan apasionantes". Y agregó Cohen: "Parece que nosotros seríamos estupendo com-

probar que las apariciones ocurridas en la Argentina no son alucinaciones o casos de psicosis colectiva". También se incluye en el grupo norteamericano que viajará a Olavarría a Roy Thinnnes, el rubio actor que se hizo famoso como David Vincent, el protagonista de "Los invasores".

Un OVNI en La Pastora

En la ruta 226, a la altura del paraje La Pastora, un matrimonio avistó a un plato volador a sólo 35 metros de distancia, según declararon en un hotel de Tandil. Se trata de Juan Sívori, su esposa, y una hija de 15 años. Sívori, que se hospedó en un hotel de la ciudad serrana, narró al gerente Manuel García Fuerte, presa de un visible estado nervioso, lo siguiente: "Acabo de vivir la experiencia más sensacional de mi vida. A unos 30 ó 40 metros he visto claramente y sin inconvenientes a un plato volador con la forma de un trompo, grande como un camión, y color plateado". La visión del matrimonio Sívori y la hija sucedió poco después de las dos de la mañana. "Avanzaba en la pick-up por la ruta 226" —narró Sívori—, cuando cerca de La Pastora noté que el motor comenzaba a fallar, como si se ahogara. Al mismo tiempo quedamos envueltos en una gran luminosidad y el motor se paró del todo. Entonces mi hija

David Vincent, el joven protagonista de "Los invasores"

que estaba como colgado a unos 10 metros de altura y no más de 40 de distancia de donde estábamos. Pudimos verlo bien pues la luz blanca no dañaba la vista. Iba decidido a acercarme cuando los ruedos de mi familia me contuvieron. Juro que la presencia del extraño objeto luminoso no me produjo ningún temor. Por el contrario, tuve una gran alegría por la experiencia que en suerte me tocaba vivir". Luego de estar allí detenido unos cinco minutos, el

• **David Vincent, el rubio protagonista.** Viajarán para filmar varios capítulos. Entretanto, en Olavarría se tejen los más encendidos comentarios en torno al suceso ocurrido casi sobre el arroyo Tapalqué, y del cual fueron protagonistas un cabo del Ejército y algunos soldados. Aparte del aparato, la patrulla del regimiento habría advertido seres extraños.

• **OVNI** cobró altura y desapareció. Entonces el motor del automóvil se puso de nuevo en marcha y Sívori se dirigió a Tandil, donde hizo la singular narración.

Otro caso increíble

También Oscar Agustín D'Onofrio, en la zona de General Alvarado, declaró haber presenciado las evoluciones de un aparato desconocido. Según manifestó a un periodista de Olavarría, viajaba por la ruta 3 a la altura del kilómetro 37, cuando a unos 100 metros de distancia, sobre el camino, brilló algo que poco a poco fue mermando sus reflejos mentales. Eran las 5.30 de la mañana y en principio, como no se veía bien, creyó que se trataba de una máquina de Vialidad haciendo reparaciones. Pero luego el motor del automóvil dejó de funcionar, la luminosidad fue creciendo y él quedó rígido y estático, sin voluntad para moverse o actuar. Momentos después emergió una nave espacial. Según D'Onofrio, a medida que ascendía, el aparato arrojaba destellos. Vio dos figuras, pero por la distancia no pudo precisar sus características. El supuesto OVNI cobró altura y luego, en las sombras, desapareció.

El caso del arroyo Tapalqué

Al no existir hasta ahora una información oficial que aclare las cosas, son numerosas las versio-

nnes que se propagan en torno al espectacular suceso ocurrido en Olavarría, casi sobre el arroyo Tapalqué, y del cual fueron protagonistas un cabo del Ejército y algunos soldados, y no un policía, como se dijera en los primeros momentos. Aparte del aparato —que cambiaba de lugar en pocos segundos— la patrulla del regimiento con sede en Olavarría habría advertido a dos o tres seres extraños. La conformación física de éstos difiere en las narraciones. Para unos eran altos y rubios. Para otros se trataba de seres casi deformes, de gran torax, que caminaban balanceándose como los monos. El caso es que el cabo principal Menéndez hizo una ráfaga con su ametralladora y a pesar de estar a poco más de 10 metros del extraño grupo no acertó con sus proyectiles. O éstos no hicieron daño a los desconocidos. También la versión dice que los soldados trataron de gatillar sus armas, pero éstas se trabaron misteriosamente. Los seres supuestamente extraterrestres desaparecieron en su nave espacial y los azorados militares regresaron a la guaranición para narrar a sus superiores el extraño suceso. Todo esto es comentado con infinitud de detalles y en distintos tonos en los diarios de Olavarría. En los medios vinculados al regimiento con sede en esa ciudad no fue posible desmentir o confirmar el hecho narrado.

BARILLOCHE: INDAGAN RARO SOBREVUELO

“Los OVNI Nos Vigilan” Dicen Sabios de EE.UU.

WASHINGTON, 29 (ANSA y Reuter). — Científicos norteamericanos reunidos en una conferencia sobre los llamados "platos voladores", invitaron al Congreso estadounidense para que financie una cuidadosa investigación sobre el origen y comportamiento de los misteriosos objetos. La conferencia fue organizada por la Comisión para la Ciencia, de la Cámara de Representantes.

El profesor de Física Atmosférica de la Universidad de Arizona, doctor James McDonald, dijo que existe una probabilidad "muy seria" de que la Tierra esté siendo observada por seres de otro planeta. "Aunque exista una mínima probabilidad que ello sea así —agregó—, debemos aceptarla". El científico recordó que muchos OVNI (objeto volador no identificado) fueron avistados en el cielo de la costa oriental del país en 1965, cuando esa zona quedó a oscuras por inesperada falta de energía eléctrica.

Por su parte, el doctor Carl Sagan, titular de Astronomía de la Universidad de Cornell, afirmó que "si la Tierra está siendo observada por seres extraños, sería una locura ignorarlo".

• OVNI en Punta del Este

PUNTA DEL ESTE, Uruguay, 29 (EFE). — A las denuncias de varios vecinos de este balneario que en los pasados días fueron testigos de objetos voladores no identificados, posados en las copas de los árboles, se agrega ahora la de una funcionaria del Servicio de Sanidad Departamental, que asegura que en horas de la madrugada del pa-

sado martes fue también protagonista de un curioso suceso.

• Luz Movediza

De acuerdo con sus manifestaciones, la mujer, cuyas iniciales son M. L., viajaba en su automóvil por la carretera costanera en dirección a su lugar de trabajo —el hospital marítimo—, cuando su paso se vio obetaculizado por una luz plateada muy intensa que se movía en acompañado vaivén a pocos centímetros del suelo. Como reinaba una espesa niebla, M. L. pensó que se trataba de una señal, por lo que optó por dar marcha atrás. Al invertir el sentido de la marcha del automóvil, comenzó a sentir unos extraños ruidos que provenían del motor del mismo. Por unos minutos permaneció expectante, con-

templando la potente luz que cambiaba de posición en escaso margen de segundos, hasta que finalmente decidió alejarse del lugar por un camino lateral.

• Otro Plato en “La Nariz”

CAUQUENES, Chile, 29 (EFE). — Un disco volador fue visto anoche por varias personas cuando se dirigían en una camioneta desde esta ciudad a Constitución. La ubicación exacta del lugar es la cuesta "La Nariz", que está ubicada en el señalado tramo.

El testigo más importante de este hecho es el regidor de Cauquenes, Mario Luna, que viajaba en la camioneta con algunos de sus familiares. En la llamada cuesta "La Nariz" divisaron un aparato que se dirigía a gran velocidad hacia la costa. Lo que ellos aseguran que se trataba de un disco volador, volvió a salirles al encuentro a la altura de Unatránque, lo que les dio tiempo para cerciorarse de que era un OVNI, varios de ellos han sido vistos en las últimas semanas en diferentes puntos del país.

El regidor Mario Luna dio cuenta del caso a la policía.

(19) Curiosa teoría sobre los OVNI

MADRID, 31 (AFP). — "Los tripulantes de los OVNI han elegido Tierra del Fuego como lugar para iniciar la conquista de la Tierra. La invasión que ha comenzado hace unas semanas concluirá en 1970", declaró hoy aquí Fernando Sesma, presidente de la Asociación de Amigos de los Visitantes del Espacio.

Sesma había predicho, hace cuatro años, en un libro titulado "Hablan los extraterrestres" que "la Argentina sería el país elegido para iniciar la conquista de la Tierra" y que "los primeros desembarcos se llevarían a cabo en 1968, en invierno".

El presidente de la Asociación de Amigos de los Visitantes del Espacio, entidad que funciona en Madrid desde hace diez años, afirma tener "contacto regular con los seres extraterrestres" para explicar los datos publicados en su libro. El Prof. Sesma tranquiliza a sus oyentes y discípulos madrileños diciendo que "los seres extraterrestres traen buenos propósitos. Si sus manifestaciones son lentes es precisamente porque no quiere alarmarlos. No eman la guerra ni la violencia".

*La Nación
1 Aug 68*

(20) Viose un OVNI sobre Rosario

ROSARIO. — Poco antes de la medianoche del miércoles vecinos del barrio Roque Sáenz Peña vieron maniobrar en el espacio un objeto luminoso que calificaron como un OVNI. Sus características —dadas por las personas que en el momento de la aparición se hallaban en la esquina de las calles Larrea y Necochea— no difieren mayormente de las ya conocidas. Según sus declaraciones, un objeto luminoso de raras características permaneció en el espacio, sin moverse, durante siete minutos. Luego, entre destellos de gran fulgor, desapareció a gran velocidad y se perdió en el infinito.

CLARIN 31 July 68
PAGINA 30 INFORMACION Buenos Aires, Miércoles

Sorpresa de una Fotografía Nocturna

Una fotografía tomada el 4 de julio, a las 19, en la ciudad de Lanús, presentó luego de su revelado una serie de objetos luminosos sobre el firmamento. Así señaló a Clarín el señor Luis Mario Arregui, fotógrafo profesional, durante una visita en la que documentó su exposición con la placa mencionada.

Dijo que la fotografía fue tomada en la Avenida 9 de Julio de esa ciudad, con una máquina Nikon F., óptica 50 milímetros, diafragma 16, velocidad 40°, con película Ilford de 50 Asa.

Agregó que la finalidad era imprimir la avenida con su aspecto nocturno y destacó que, en esa circunstancia, no apreció nada anormal en el cielo. Posteriormente efectuó una copia chica, sin prestarle atención, y viajó al interior. A su regreso, su ayudante, señor Eduardo Víctor Hernández, le hizo notar que se veían, sobre el cielo, unos objetos luminosos. Por tal causa hizo una ampliación en la que se puede observar, con claridad, una serie de objetos circulares.

Dijo también el señor Arregui que dejó copias en un centro de investigación de una institución armada y en un organismo especializado, además de otra copia

que le fue requerida para su remisión a Estados Unidos.

Clarín consultó sobre la copia fotográfica a un instituto especializado de las Fuerzas Armadas. Un técnico señaló que, por el momento, sólo había analizado la copia y que podría tratarse de reflejos producidos por los focos de luz en la lente

de la máquina, hecho común —acotó—, y que la placa toma. De allí, añadió, que el fotógrafo no viera el fenómeno.

Por otra parte, continuó, esas luces tienen en su interior un filamento que adopta la forma que aparece en los objetos, los que repiten la inclinación de los focos.

UN OBJETO luminoso sobre el firmamento fue el resultado del revelado de una fotografía. A la derecha, está señalado por una flecha; arriba, la ampliación de dicho objeto

UN OVNI SOBRE RAWSON

El objeto volador no identificado fue captado cuando se desplazaba de izquierda a derecha, tomando como referencia la ruta Rawson. La visión se prolongó varios segundos, hasta que el "platillo" desapareció a increíble velocidad. Las placas fueron tomadas por el reportero gráfico J. Sleiman San Martín el 13 de julio pasado.

"A51" 3 Aug. 68

TRELEW, provincia de Chubut (Colaboración de J. Sleiman San Martín). — Tres personas lograron observar un OVNI (objeto volador no identificado), seguir su desplazamiento y además fotografiarlo en la noche del 13 de julio pasado, en las proximidades de esta ciudad capital.

El abogado y oficial de Gendarmería Nacional, doctor Juan Francisco Arca Barbous; el empleado provincial, señor Neris Bianchi, y el fotógrafo profesional y reportero gráfico del diario "El Patagónico", de Comodoro Rivadavia, señor J. Sleiman San Martín, viajaban en un automóvil por la ruta que une Trelew con Rawson cuando a pocos kilómetros de esta ciudad, aproximadamente a las 21.30, descubrieron, con la sorpresa que es de imaginar, un

objeto en el cielo que irradiaba intensa luz, que alcanzaba por momentos tonos verdosos y celestes.

El OVNI se desplazaba de izquierda a derecha, tomando como referencia la ruta, y su visión se prolongó por espacio de algunos segundos, los suficientes como para detener la marcha del automóvil, observarlo nítidamente y obtener impecables fotografías, tarea que cumplió con éxito el fotógrafo, señor J. Sleiman San Martín, que usó una máquina "Exakta Varex", equipada con un rollo de película de 400 "ASA", logrando tres placas con velocidad 60 y diafragma 4.

Las personas nombradas quedaron asombradas por la aparición del OVNI, y calcularon que su vuelo se estaba realizando sobre la ciudad de Rawson. Tras

recorrer el platillo volador a notable velocidad un buen sector del cielo se elevó repentinamente y desapareció del lugar hacia el Sur.

Luego de la experiencia los observadores analizaron detenidamente la aparición del OVNI, su desplazamiento y finalmente su fuga del sector visible y coincidieron ampliamente, por lo que debe descartarse lo que se ha dado en llamar psicosis colectiva. Con todo, el doctor Juan Francisco Arca Barbous y los señores Neris Bianchi y J. Sleiman San Martín guardaron secretamente lo que habían visto por temor a las bromas. Esperaron con tranquilidad el revelado de las placas y cuando ello ocurrió, entonces lo difundieron, ofreciendo los detalles y explicaciones consiguientes.

★ Ante el Misterio Apasionante

¡CREE usted en los platos voladores? Esta es la pregunta que corre de boca en boca por todo el país en las últimas semanas, comenzó diciendo el profesor Alejandro Erú en su conferencia sobre "El enigma de los OVNI a la luz de la ciencia y de la parapsicología". Y no sin cierto dejo de temor inquietaron otros: "Serán de otros planetas? No vendrán a agredirnos o sojuzgarnos?". Trataremos de aclarar todos estos interrogantes. En primer lugar echemos una ojeada al Universo. Nuestra galaxia consta de unos 100.000 millones de soles, muchos considerablemente más grandes y luminosos que el nuestro. Los astrónomos suponen que alrededor de la mitad poseen sistemas planetarios en que por sus condiciones ambientales podría haberse desarrollado la vida. Evidentemente en algunos, por simple cálculo de probabilidades esa vida podría haber comenzado su desenvolvimiento cientos, miles o millones de años antes que en la Tierra. En consecuencia sus habitantes nos han de llevar una enorme ventaja en la ciencia y tecnología. Si estamos proyectando "poner un hombre en la Luna" para el 70 y en la década del 80 en Marte, ¿tiene algo de extraño que quienes nos llevan una delantera de siglos o milenios dispongan de las adecuadas máquinas espaciales como para visitarnos y estudiarnos? Algunos suponen que se trata de armas secretas de alguna potencia de la Tierra. Esto a mi juicio —prosiguió diciendo el profesor Erú— es totalmente ilógico. En primer término porque si es "secreta", dú-

do que existan comandos militares tan ingenuos como para andar exhibiendo por años y por todos los países un elemento de guerra de características tan extraordinarias, y que además puede ser fotografiado, estudiado, analizado, poniendo así al adversario en la pista de su descubrimiento, con lo cual automáticamente quedaría anulada su ventaja. En segundo lugar se ha medido por medio de radares y otros dispositivos la velocidad de desplazamiento de los OVNI, que oscila entre los 20 mil y los 120 mil kilómetros por hora. En tales circunstancias es corriente observar un giro de 90 grados o un frenaje en seco y un retroceso en sentido contrario. ¿Qué tripulante de la Tierra con los elementos conocidos podría aguantar la tremenda fuerza de la aceleración que ello implica? Ni remotamente podría resistirla ningún organismo conocido. El argumento de que los OVNI se deben a psicosis o alucinaciones colectivas hace tiempo que carece de validez, pues además de las aproximadamente 120 mil observaciones bien documentadas que poseen organismos internacionales, con fotografías y hasta films, está el testimonio de las perturbaciones del campo magnético registradas en los variómetros de numerosos científicos, y aun de las fuerzas armadas de distintos países. Y por cierto que las brújulas y otros precisos mecanismos para medir el geomagnetismo no son susceptibles de sugerencias... A este respecto, las comprobaciones más valiosas del mundo

fueron las realizadas por nuestra Marina de Guerra, cuyo personal, destacado en la Antártida (Isla Decepción), constató el pasaje de Objeto Voladío No Identificado y su influencia perturbadora a una distancia de no menos de 9 kilómetros sobre la cinta registradora de los variómetros, es decir, produciendo grandes alteraciones del campo magnético. Ello incrementa el enigma sobre sus sistemas de propulsión y la fuerza empleada, ya que para tener una idea de la tremenda fuerza empleada, debemos tener presente que con nuestros medios actuales sólo podemos producir campos magnéticos intensos que no sobrepasan unos pocos metros. Finalmente, no olvidemos dentro del marco de estas consideraciones los testimonios de avezados pilotos con muchos miles de horas de vuelo en sus fajas de servicio, no sólo habituados a ver y distinguir por su profesión, sino que de ello depende su vida y la de los tripulantes y pasajeros. Frente a todo ello, ¿qué valor puede tener el escepticismo, el dogmatismo de algunos aferrados a teorías, y no a los hechos, que son los que siempre abren caminos en la ciencia? En estos días en que la memoria del insigne Galileo Galilei está siendo reivindicada, como uno de los más grandes genios de la humanidad, símbolo además de mente avanzada y sin prejuicios, meditemos en su espíritu si nuevo aplicado a los OVNI. ¿Cuál es la vinculación de la parapsicología con las naves extraterrestres? Esta moderna ciencia, que ya tiene jerarquía como tal pues se dicta como materia oficial en numerosas universidades del mun-

nte de los Platos Voladores *

do, fue creada por el doctor José B. Rhine, actual director del laboratorio de Parapsicología de la Duke University de EE. UU. hacia 1930, con el propósito de investigar con el máximo de rigor y seriedad, extrañas y poco frecuentes facultades del ser humano, como son la telepatía (transmisión de pensamiento directo de mente a mente) y la clarividencia (conocimiento obtenido sin utilización de los sentidos comunes como vista, oído, etc.), además de otras como la psicokinesia o acción de la mente sobre la materia, la parabiología o curaciones milagrosas, de la cual es exponente máximo en los tiempos modernos el tan popular dotado brasileño José Arigó. Y bien, cada vez con mayor frecuencia diversas personas y sensitivos están empezando a recibir mensajes telepáticos, que según aseguran son de tripulantes de OVNI o de seres extraplanetarios. Podrá haber fantasía, pero pue de también haber realidad, y por ello, dado lo trascendental del tema, la parapsicología debe investigarlo. No obviemos, que de acuerdo a las experiencias realizadas con telépatas por el doctor Rhine, y también por el profesor Vassiliev de la Unión Soviética, ni la distancia, ni ningún tipo de obstáculo físico conocido, parece afectar la propagación de las "ondas PSI", o sea lo que emite una mente y capta otra. Así pues, no puede descartarse en manera alguna que desde un plato volador a cientos o miles, de kilómetros de distancia, se establezca contacto telepático con alguien en nuestro planeta suficientemente sensible o que esté en "sintonía" con la mente emisora. Uno

de los casos que estamos estudiando es el de Solari Parravicini, conocido artista y pintor, quien desde hace años recibe ideas, sensaciones y hasta voces con informaciones sobre diversos aspectos de los OVNI. Luego las traduce en forma de dibujos, de los cuales poseo y estoy analizando —dijo el profesor Erú— algunos cientos. En ellos asevera que muchos de los platos voladores provienen del planeta Ganímedes, satélite de Júpiter, que hacen el viaje a la Tierra en búsqueda de algas y otros elementos del mar que allí les hace falta para su subsistencia. Recordemos que muchos OVNI fueron vistos entrando o saliendo del mar. Una información premonitoria, que puede ser sensacional si se cumple —y falta muy poco—, es que en 1969, o sea el año próximo, descienderán en grandes cantidades, estableciendo contacto directo e indubitable con hombres de diversos países, en su intento de evitar una posible guerra nuclear. Su tarea en este momento es preliminar y preparatoria, a fin de evitar el pánico e histeria colectiva que podría derivar de tan magno acontecimiento. Otro dotado parapsicológico es un industrial cuyo nombre no puedo revelar, que empezó a hablar en un idioma extraño y con gran fluidez, de sonoridad parecida al arameo antiguo. Traducido su mensaje después de diversas y largas gestiones y trabajos, parece ser que indica que de ninguna manera alienta a los OVNI propósito agresivo alguno, sino que únicamente nos observan y vigilan, pero sin intervenir en nuestros

asuntos dado que respetan nuestro libre albedrio. Ellos han alcanzado un elevado grado de progreso ético y tratan de ayudarnos inspirándonos sentimientos de paz y fraternidad. Inclusive en ciertos momentos, con su avanzada tecnología, proceden a limpiar nuestra atmósfera cuando se halla excesivamente sobrecargada por residuos ponzoñosos provenientes de nuestros irresponsables ensayos nucleares, que se localizan en las altas capas de la atmósfera con peligro de precipitarse en cualquier momento. Para finalizar, dentro de los dotados parapsicológicos que reciben aparentemente mensajes de OVNI, dijo al concluir su disertación el profesor Alejandro Erú, me merece especial consideración un distinguido abogado de Curitiba, Brasil, el doctor Hercilio Maes, a quien visité en diversas oportunidades. Es un hombre muy equilibrado, con un importante estudio jurídico en la mencionada ciudad brasileña. Ha obtenido diversos datos sobre la forma de propulsión mediante el control y dominio de la gravedad. Observemos que hace unos días, en Chile, diversos vehículos fueron detenidos en plena cordillera y un pesado camión de 12 toneladas se desplazó silenciosamente y con el motor apagado, cuesta arriba en la montaña, teniendo la región en que fueron avistados numerosos OVNI. No estarán confirmados estos otros hechos la realidad de la información recibida por sensitivos y telépatas. Creo que en un futuro más próximo de lo que muchos se imaginan lo sabremos completamente.

UFO's in space link-up claim

A couple driving on the route between Indio Rico and Tres Arroyos, Buenos Aires, reported yesterday they saw two UFOs (Unidentified Flying Objects) as they joined in mid-air.

The couple, Juan Isidro Gasaneo and his wife Elsa, who were accompanied by two youths, said the "two

shining objects joined in the sky until they formed a sort of soup plate."

The couple said a "tower came out of one of the objects" then was withdrawn and they disappeared in different ways. (UP)

1. [REDACTED] Quote: Subject: Unidentified Flying Objects (U). Part I. A. On 280156Z November 1968, Nakhon Phanom (NKP), RTAFB GCA reported two low/slow moving objects approximately 13NM south of NKP. Contact was lost when objects were 9NM west of base. NKP Command Post was informed they "definitely were not ghosts." Sightings were confirmed by Invert radar. At approximately 0215L, Knife 27, night Recce chopper, was asked to investigate slow movers 4NM northeast of base. As Knife 27 was not in immediate area 5-10 minute delay ensued. Knife 27 reported no sightings. Knife 27 also investigated similar phenomena 10-13NM south of NKP and another return two and one-half NM northwest of base. No visual sightings were reported. Final return at 12NM south of NKP was also investigated with Invert direction Knife 27 to position directly overhead of unidentified return. Searchlight was employed but revealed nothing. No objects,

aircraft lights or other sightings were seen. Crew of Knife 27 suspected objects escaped by descending below radar capability. B. On 020326L Dec, GCA and MTI radar reported Bogie 8NM southwest of NKP moving at same speed as knife 28, night Recce chopper, at 120 knots. Knife 28 dispatched to area, but GCA lost Bogie when Knife 28 approached to within 2-3NM. GCA later lost Knife 28 at same spot when Knife descended below 1100 feet altitude. Knife 28 approached target without lights, then employed searchlight, but observed nothing. Moon reportedly had gone down and conditions were too dark to see well. A Knife 28 returned to base, GCA picked up Bogie again 1NM southeast of where it had disappeared, heading southeast. GCA lost it after 4-5NM, still heading southeast in vicinity of VD 5891. Part II. On 6 December, 606 SOS advisor to Thai Border Patrol Police (EPP), Region IV, reported that EPP had begun operation on 28 November between NKP and Sakhon Nakhon towns in same proximity as above sighting northwest of NKP. Four to six EPP and Royal Thai Army (RTA) helicopters were involved in this operation. In addition, EPP Region IV possesses one white heuy helicopter, which is used to monitor EPP operations. Historically, Thai pilots have been reluctant to fly at night, but the moon in recent days has made night flying almost as easy as daytime operations, and Thai pilots have been known to accomplish night flights in areas where terrain is well-known to them. As in the past, chopper operations by RTA and EPP are mostly local in nature and no flight plans are filed for resupply, placement of units, or monitoring activities unless proper pressure is brought to bear. Many EPP/RTA operations against communist terrorist are autonomous in nature, and thus centralized control is weak. As result, air defense surveillance system is often not informed of flights until later—if at all. EPP advisor is attempting to secure time so flights in support of above operation, including dates, and landing areas. Part III. Historically, November and early December have produced large numbers of radar returns, particularly on GCA scopes, from natural or cultural phenomena in THAILAND. These include temperature inversions, balloons from fairs and religious celebrations, migratory birds, and kites. In November 1967, HQ 7/13AF DI and DO ran experiment at Udorn when GCA scopes were reporting more than 15 low/slow returns in vicinity of Udorn RTAFB. Group observers physically sighted scores of balloons, three flocks of migratory birds, several kites, plus at least four local choppers in a span of ten minutes. At same time these sightings, even of legitimate friendly flights, failed to correlate with Brigham (Udorn RTAFB-based GCI radar) and GCA returns. On numerous occasions it was established that phenomena, which U.S. personnel in GCI site would not report as authentic traffic, was reported into AOC and air defense system by Thai operators. U.S. personnel attributed these to propagation anomalies. Further investigation attributed a number of sporadic returns to over-the-horizon signals distorted by weather conditions.

To date, there is no confirmed evidence that hostile aircraft or helicopters have penetrated Thai air space in support of insurgent or communist activities. Though it is possible that illicit friendly flights for purposes of private gain, pleasure, smuggling are being conducted, there is no evidence to substantiate this possibility at present time. It is suspected that Lao and Thai Air Force officers can and do employ RLAF and RTAF aircraft in private ventures or travel without filing proper flight plans for informing components of the air defense surveillance system. Part IV. Nature of recent reported sightings follows same pattern as "unknown returns" reported last year by Ubon and Udorn. In analysis of possible hostile penetration of THAILAND and in support of insurgent forces, preliminary study was conducted of technical aspects of such flights. It was found that to land in remote jungle clearings at night to airlift personnel or provide resupply was highly dangerous and improbable, especially in absence of sophisticated navigation and landing aids, and was beyond technical capability of U.S. air crews. Further, study of Air Order of Battle of nearby communist or neutral countries indicates that available helicopter strength is such that hostile or unfriendly forces do not possess adequate numbers of low/slow aircraft to undertake such missions with accompanying risk factor, when they are unable to support their own field

Forces, officials, or units by air. It is not likely, therefore, that they would risk valuable aircraft and crews to support Thai insurgent, when resupply, infiltration, and movement by other means is cheaper, safer, and less obvious. It is interesting to note that such unknown returns have been reported since 1965 and yet no unidentified aircraft has ever crashed or been physically observed so it could be identified. Friendly suppression forces have never shot down or hit these unknown intruders, whereas U.S. helicopters and aircraft in VIETNAM and LAOS have suffered many hits and losses, and as indicated in Part I, friendly aircraft in area could not observe, even with aid of lights, any other aircraft. In past, when Royal Thai Government offered 200,000 Baht reward for shooting down of unknown aircraft and helicopters, only aircraft ever hit were HPP or RTA choppers and USAF aircraft on legitimate missions. As result, Thai Government has since withdrawn reward offer since no hostile aircraft or "unknowns" were ever downed. It is also interesting to note that in 1967 unidentified aircraft activity, purportedly in support of communist insurgents, seemed to preoccupy Thai officials until U.S. resources provided Hawk anti-aircraft missiles. Then in speech of acceptance and thanks, General KRAPHAT, Deputy Prime Minister, said helicopter threat from outside THAILAND had ended or come under control. Part V. This headquarters is highly interested in such sightings and reports, and will continue to monitor such activity for signs of hostile intent. However, there is no evidence at present time to indicate rash of recent "Bogies" reported near NKP RTAFB involves hostile or unfriendly activity. Unquote.

The following is quoted from a COMUSMACTHAI message dated 17 December 1968. The message was to CINCPAC with information to 7/13AF and referenced the message quoted above. Quote. "This headquarters considers the message and excellent assessment of unidentified helicopter reports in THAILAND. This evaluation parallels our own assessments." Unquote.

The most recent reported sightings occurred in South LAOS. On the nights of 14, 16 and 18 December 1968, an unidentified high wing single engine aircraft was observed over Ban Thateng (1526N-10622E), LAOS. On two occasions it was reported circling at low altitude (400 feet). On the third occasion, it was observed at 6000 feet heading west. Estimated speed 100 knots. It has not been determined if the aircraft was an unreported friendly or enemy.

COMMENTS: [REDACTED] ARA concurs with the comments and assessments made and with the conclusion which are drawn. It seems highly unlikely the enemy would take the risks involved to infiltrate personnel or supplies when, as is pointed out, other methods are cheaper, safer and less obvious. Some of the "unknowns" have been reported far enough into THAILAND that large helicopters would have to be used or refuelings made by small helicopters. In order to reach some of these locations, long flights would have to be made over friendly territory, both in LAOS and THAILAND. Again this seems rather unlikely and has not been confirmed by any sightings. There are no known enemy held staging areas or bases in LAOS from which such flights could operate within reasonable range, safety and security and yet remain such a well kept secret for such a long period of time. If any of these flights are, in fact, occurring it appears much more reasonable that they might be unreported friendly activities.

15. SUMMARY:

16. Report provides additional information voluntarily given by source which adds to referenced report (IR 1 869 0015 67). The source stated that his book "Harmonic 33" is now at the printers in England, that he has been in contact with UFO investigation organizations in the United States, and that many additional UFO sightings have been made in New Zealand but not reported.

17. Recent Events: Captain Cathie is still employed as an aircraft (F-27 Friendship) pilot by National Airways Corporation (NAC). His superiors know of his interest and activity in UFO's and his forthcoming book "Harmonic 33". He has been checked for security reasons and no adverse reports are known. He has received considerable publicity in newspapers and on television. He admits that many people consider him "some kind of a nut" but he persists in his theory. On 16 January 1968 he came to my office and reported that four UFO's had been detected on the Auckland Air Traffic Control radar scope on 14 January 1968 at 2335 hours local time (141135Z). Three objects were 15 miles apart in line, with the fourth object in line 30 miles behind the third. Relative speed was extremely high. In addition,

two UFO's - disc shaped - appeared east of Auckland Airport on the same track as first four. Captain Cathie was asked if official reports were submitted on these sightings, and he said no, that Civil Aviation personnel had been warned not to report any more of these observations. Captain Cathie was advised to submit any additional information he might have. He did, under cover of his letter of 18 January 1968 (attachment No. 1).

2. **Pueblo Incident:** On 8 February 1968 a second letter with attachments was received from Cathie (attachment No. 2). This effort by Cathie indicates that he is spending an enormous amount of time and effort trying to prove his theory that an overall master plan exists by an alien race - purpose not defined.

3. **Comments:** Captain Cathie is a lean, wiry New Zealander, with an apparently above average knowledge of mathematics. He has seen several UFO's which he stated could not have been aircraft in the accepted sense. He is intensely sincere in his efforts and has convinced a publisher well enough to invest in his book. He stated that Neville Spearman, Publishers (England) were in the final stages of his book. Several thousand copies are to be released in England, New Zealand and the United States.

Colonel L. H. Walker,
Air Attaché,
American Embassy,
Wellington.

Dear Sir,

It is now Thursday evening and I have just arrived home for the first time since I had the talk with you on Tuesday. I spent last night in Invercargill. This is the first chance I have had to make a quick copy of some of the calculations.

As I explained they are only rough calculations to form the basis of a theory and will probably require refining before any experimental work becomes necessary. I would like to put on record here that I sincerely believe that I have amassed enough information to form the basis for several avenues of research.

Namely

- 1 U. F.O. Power Grid
- 2 U. F. O. Propulsion Principles
- 3 Travel by Space- Time manipulation
- 4 Basis for new form of Astronomical Measurements
- 5 Construction of Aerial Systems to tap Power of Grid
- 6 Formation of Volcanoes
- 7 Reason for Earthquake Phenomena
- 8 Location of Ancient Civilizations
- 9 Geometrical basis of Atomic explosions
- 10 Relationship between Matter and Anti- matter.

This is only a short list and I believe that at the moment I have only scratched the top of the iceberg. The facts I have so far are only a fraction of those awaiting discovery. I have now found that what I started as a hobby has developed into something that would take many lifetimes of pure research.

Although I am still finding new facts to add to the growing list I realize that I have almost reached the limits of my capacity of knowledge. It now requires Specialists in various branches of Scientific knowledge to carry on the work to a logical conclusion.

If the United States Government is interested in any aspect of my research I am only too happy to co-operate in any way possible. The only stipulation I make is that I have complete freedom to publish anything connected with my discoveries. I have a great admiration and respect for America and its people, but I believe that no country has the right to suppress facts relating to U. F. O. Phenomena.

I have no political leanings and sincerely believe that the world has the right to know the true facts. There is absolutely no doubt that an Alien Race is carrying out a construction project on this planet, and

Atch No. 1 to R1869 0008 68

that when the work is completed it is logical to assume that direct contact will take place. The whole world must be made aware of this otherwise there will be chaos when it happens. There is every reason to believe that the contact will be a friendly one.

I Remain,
Yours Sincerely,

Cpt. B. L. Cathie.

THEORETICAL CONSTRUCTION OF AERIAL ARRAY

TO TAP POWER FROM VFO GRID SYSTEM.

AERIAL SYSTEM CONSISTS OF SEVEN VERTICAL AERIANS AT A CENTRAL POINT. SEVEN GROUND RADIALS RADIATE FROM THE CENTRAL VERTICAL COMPONENTS. THE SYSTEM PROBABLY OPERATES AS AN OPEN CIRCUIT BUT POSSIBLY THERE IS A CIRCULAR PATH CONNECTING THE TIPS OF THE HORIZONTAL COMPONENTS - ALSO THAT DIAGONAL RADIALS CONNECT THE TOPS OF THE VERTICAL COMPONENTS TO THE TIPS OF THE GROUND RADIALS

THE ~~DIMENSIONS~~ GIVEN ARE HARMONIC VALUES OF SPEED OF LIGHT, MASS AND GRAVITY ACCELERATION THAT ARE BUILT INTO THE WORDS GRID SYSTEM. THE ACTUAL LENGTHS WOULD VARY SLIGHTLY ACCORDING TO THE MATERIAL USED TO CONSTRUCT THE AERIAL, DUE TO THE VARIOUS CONDUCTANCE VALUES

28 Sherwood Ave;
Te Atatu,
Auckland, Ph. TAT6037
5th Feb. 1968.

Colonel L.H.Walker,
Air Attaché,
American Embassy,
Wellington.
Dear Sir,

I was curious as to why the Koreans would take such a risk in the seizure of the 'Pueblo' in International Waters. I made some checks and I believe the following is the answer.

Lop Nor test site = 42.16° Lat / $90^{\circ} 00'$ Long (Grid)
Harmonic 4216 = Log 2640
'Pueblo' Station = 39.3° Lat / $127^{\circ} 06'$ Long
Harmonic 393 = Reciprocal 2545.56
2545 = Gravity Acceleration Harmonic (Grid)
 $127^{\circ} 06' - 90^{\circ}$ = $37^{\circ} 06' \pm 37.1'$ (reciprocal 37I Harmonic 2695)
Distance from Lop Nor test site to 'Pueblo' station = $31^{\circ} 1860'$
Log of Harmonic 186 = 2695
 $2695 = \text{Grid Co-ordinate (695 reciprocal Speed of Light)}$
The 'Pueblo' was just north of this position when captured.
(Blenheim---Mururoa) ('Pueblo'---Lop Nor)

Yours Faithfully,

B. L Cathie.

Atch No. 2 to IR 1869 0008 68

THE FERRET FLEETS

Blandly classified as an "environmental research" vessel, the U.S.S. *Pueblo* is actually one of more than 80 immensely sophisticated ELINT (for electronic intelligence) ships in the U.S. Navy. That ferret fleet is intended as a counterforce to Russia's 60-vessel ELINT armada, made up mostly of converted trawlers and hydrographic craft, all bristling with antennas and sensitive eavesdropping gear. Just as the *Pueblo* and her kin prowl the international waters off China, North Korea and the Soviet Union, Russian trawlers are stationed off California, South Carolina, Florida's Cape Kennedy, Guam and Alaska. A Soviet spy ship dogs every move of U.S. aircraft carriers on "Yankee Station," the 45,000-sq.-mi. area of the Tonkin Gulf from which American air strikes over North Viet Nam originate, flashing alerts to Hanoi. Other Russian ELINT ships shadow the U.S. Sixth Fleet in the Mediterranean.

A main mission for both ELINT fleets is the systematic collection and classification of submarine "signatures"—the distinctive electronic blend of propeller and engine noises, wake turbulence and magnetic fields generated by each individual sub. Thanks to *Pueblo* & Co., the Navy has nearly completed a computer-taped "library" classifying Russia's 450 or more subs, from diesel-powered *Whiskey*-class boats to the new, nuclear *Juliett* class. In the near future, U.S. naval commanders will be able to draw instant digital readouts that will identify any Soviet sub they can hear.

Pueblo's unprepossessing, 179-ft-long hull is fitted out with the latest in sophisticated ELINT equipment—globe-girding single-side-band radio, hyperaccurate radars, sonars and navigation instruments. Another primary aim of

the "spook ships"—espionage satellites like Samos and spy planes like the U-2—is to be "painted" or "illuminated" by enemy radar, whose beams fall on the ship's sensitive receivers. Those signals are taped and sent back to Washington for detailed analysis. By charting radar pulse repetition rates and frequencies, intelligence officers can identify the electronic signalings of known radar systems and thus roughly determine enemy dispositions, while radio traffic analysis provides information on troop buildups or movements and even the names of enemy commanders. Such data also permit the development of jamming programs.

To locate radar and radio sources, *Pueblo* employed the twin antennas mounted forward of the wheelhouse. Domelike direction finders and "troposcattering" sensors (which can "read" signals bouncing from the troposphere) are mounted on the foremast to an-

alyze those signals and to eavesdrop on radio communications. The ship is equipped to test salinity levels, temperatures and algae growth in various parts of the Sea of Japan—all valuable information for sonar operators. Pentagon photos of *Pueblo* taken after the ship's renovation in Bremerton, Wash., show advanced low-frequency antennas that would permit the ship to communicate with U.S. nuclear subs to a depth of about 100 feet.

Photographs cannot show *Pueblo's* most sensitive gear, which is below the water line. From keel to boot topping, the hull bulges with sonar domes, hydrophones, subsurface antennas, and possibly a "giant ear" like that used on the larger U.S.S. *Liberty*, which was shot up by the Israelis in the Mediterranean last summer. *Pueblo* is also rigged to tow hundreds of yards of hydrophone cable with which to hear submarines as much as 75 miles away.

Source in last three months has called DATT 3 or 4 times by telephone and reported his progress in his UFO investigation. On 30 April he telephoned that his investigation was being hampered by US personnel "tailing" him. He requested relief from such surveillance.

1. General. Cited references describe the source and his theory of Unidentified Flying Object. Source is still employed by NAC as an Aircraft Commander, is well known to his compatriots as something of a "bug" on UFO's. However he is not considered a "nut". On the last three occasions when he called the DATT, he went into considerable detail about new findings which he said further proved his theory. These conversations were ignored.

2. Request for Relief from Surveillance. On 30 April Capt Cathie called the DATT again. He mentioned that his theory was again proving correct in the Auckland area. He specifically mentioned White Island (a volcanic type). He stated that it would soon be apparent that we are actually dealing direct with UFO's. He went on to say that he had thought he was being followed (observed) by some persons,

but was not certain until three weeks ago when he was accosted by three Americans in the Grand Hotel in Invercargill (South Island). He said these persons asked him to accompany them which he refused to do. He could (or would) not identify them other than to say he believed they were from a US Navy vessel in the area. (NOTE: Only US vessel known to be south of Auckland is the USNS Eltanin, assigned to the US Antarctic program, and which was in Antarctic waters at the time. Capt Cathie said that he had been cleared by the NZ Government to pursue his research and that he had a letter to this effect signed by the Prime Minister. He stated that the Member of Parliament from his area Dr. Findley, had interceded for him and obtained government approval for his work. He then asked the DATT to "call your agents off. I have official approval to continue my work. I don't want them "tailing" me."

COMMENT: The DATT made no reply to the request. This man is obsessed with his theory and no amount of argument can convince him that he has not stumbled on a highly complicated system which he says leads directly to the existence of UFO's.

Gordon L. H. WALKER
AIR ATTACHE
AMERICAN EMBASSY
WELLINGTON,

DEAR SIR, I THOUGHT YOU MIGHT BE INTERESTED IN
A FORMULA THAT I HAVE DERIVED FROM THE GRO.
AS I HAVE BEEN WORKING TO FOUR WHOLE NUMBERS
IN HARMONICS I MISSED THIS UNTIL NOW. I HAVE
BEEN USING A VALUE OF 2640, WHICH IN FACT THE
TRUE VALUE IS 263.6 OR (2636). THE SQUARE ROOT
OF 6.95 HARMONIC IS 2.636 HARMONIC

THIS GIVES A HARMONIC FORMULA FOR THE GRO

$$C + \sqrt{\frac{1}{C}} = M$$

IF WE TRANPOSE THIS TO EINSTEIN'S EQUATION

$$E = MC^2$$

IN HARMONICS THIS EQUALS

$$E = \left(C + \sqrt{\frac{1}{C}}\right) C^2$$

THIS MAKES 'M', OR 'MATTER', NOTHING MORE THAN A
REGION OF HIGH FIELD INTENSITY AS EINSTEIN
POSTULATED.

Atch No.....1.....to IR/188900 1668

FURTHER IF WE SQUARE BOTH SIDES OF
THE EQUATION

THEN HARMONIC E^2 = HARMONIC C ONCE MORE.

$$\text{AS IN } - E^2 = \left[\left(C + \sqrt{\frac{1}{C}} \right) C^2 \right]^2$$

I'M STILL WORKING ON IT, BUT THE BOFFINS
AT BLENHEIM MIGHT BE INTERESTED.

HAVE ALSO WORKED OUT SEVEN DATES FOR BOMB
TESTS 'MURUROA'. HAVE NOW FOUND THAT A SHENKEL
TRIANGLE IS FORMED, AND THAT THE LATITUDE VALUE
IS THEREFORE SQUARED. MY EPHEMERIS IS NOW OUT OF
DATE. SO I WILL SHOW MINUTES OF ARC NORTH OF
MURUROA (FOR LATITUDE SUN). BOMB SITE ON MURUROA
EQUALS 2636 MINUTES LATITUDE SOUTH.

$$8^{\text{th}} \text{ July} = 2680' \text{ NORTH} (2680^2 = 7180) 7180 = \text{Recip} 1393$$

$$13^{\text{th}} / 14^{\text{th}} \text{ July} = 2636 \text{ NORTH} (2636^2 = 695) 695 = \text{Signific Recip}$$

PLUS FIVE MORE DATES AND COORDINATES WHICH I
WILL SUPPLY ON WRITTEN REQUEST

I AM WORKING NOW WITH THE HELP OF
JOURNALISTS AND OTHERS, FOR SAFETY SAKE, AND
AM STILL FINDING NEW DATA.

REGARDS

B.C. Bach

(U). In early November 1967 (exact date believed to be 10 Nov) Moscow TV presented a program on Unidentified Flying Objects. On 12 Nov 67 a Reuters lease in the U.K. press (believe article was in Daily Telegraph) reported the program.

(U). The essence of the TV program, and Reuters report based on the TV program, is that the Russians had recently set up a commission to study UFOs. The chairman of the Commission is retired SAF Major General A.P. STROLYAROV, a former Technical Services Officer. The group consisted of 18 astronomers and SAF officers plus 200 observers.

(Leave Blank)

2. [REDACTED] A day or two after the TV program, the Reuters correspondent went to see General STROLYAROV. The General was very polite, confirmed the information about the commission, the 18 astronomers and SAF officers and the 200 observers. In addition, he said five (5) positive sightings had been made.

4. [REDACTED] Approximately a week later the Reuters correspondent went back to see General STROLYAROV. However, this time the correspondent could not get past the General's secretary; was politely but firmly told the General was no longer available for interview.

5. [REDACTED] On 12 December 1967, the British Embassy was directed by London to further investigate the subject with a view to cooperating with the Russians in observation teams for UFOs.

6. [REDACTED] The Scientific Counselor of the British Embassy went to the State Committee for Science and Technology and inquired about the UFO Commission and the possibility of British-Russian cooperation in observation of UFOs. The British Counselor was politely received and the commission was freely discussed. The British were told they would receive a reply to their request about cooperation.

7. [REDACTED] The British did not receive an answer and did not pursue the subject. However, on 8 January 1968 while on a routine visit to the Soviet State Committee for Science and Technology, the British Scientific Counselor was told the following: The commission for investigating UFOs had been set up in response to a popular demand. The commission had met twice, but since there was insufficient information to sustain it the commission would be disbanded after the next meeting.

8. [REDACTED] The British Scientific Counselor believes the original announcement of the work of the commission on TV was an oversight on the part of the censors because the commission has not been reported or referred to anywhere else. He believes the commission has not been disbanded, but will continue under cover. This information was sent to London.

COMMENT: [REDACTED]

1. [REDACTED] The preceding information was given to RO by source. RO also read confidential British files on this subject. RO did not approach Reuters correspondent because of delicate position of source. RO was unable to find anyone in Moscow who saw TV program or read article in UK press.

2. [REDACTED] On 10 or 11 November 1967 the U.S. Science Attaché received a telephone call from the Reuters correspondent and was asked if he had seen the TV program. When the Science Attaché replied that he had not seen the program, the correspondent described it and asked the Science Attaché if he thought the information was worth reporting. The Science Attaché said yes. The Science Attaché, like the RO, has not seen the UK press report. The U.S. Science Attaché will receive two copies of this report and will forward one copy to the appropriate S & T Agency in Washington.

NOTE: This document contains information affecting the national defense of the United States within the meaning of the espionage laws, Title 18, U.S.C., Sec. 793 and 794. The transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.

GEORGE W. BLANK, Lt Col, USAF
Commander
SUMMARY:

Early on the morning of 24 August 1969, the pilot of a base aircraft observed what he thought to be a helicopter, with folded rotor blades, on the ground approximately five miles north-northeast of Nakhon Phanom Royal Thai Air Force Base. He also reported seeing a large, omni-directional light. A Royal Thai Army sweep of the area met with negative results. Subsequent checks, however, disclosed that a religious procession passed through the general area during the same time period and that the pilgrims carried with them two large ceremonial drums suspended between two long poles. One of the participants also carried a powerful electric lantern which, when an aircraft was noted circling overhead, he pointed skyward.

REPORT NO. 1 656 0111 69
PAGE 2 OF 4 PAGES
ORIGINATOR OSI District 51,
Bangkok, Thailand

2. [REDACTED] At approximately 0033 hours, 24 August 1969, the pilot of a fixed-wing, light observation aircraft (OV-10) observed an unidentified object on the ground approximately five miles north-northeast of Nakhon Phanom RTAFB. At the time, the pilot was searching for unidentified flying objects pursuant to an earlier Base Command Post request made while the OV-10 was on final approach for landing. The aircraft orbited the sighting area, and the pilot observed that he thought to be a large, omni-directional light on a stretch of road. On his next pass, the pilot sighted 15-25 individuals gathered around a "lattice structure", which he said could have been a helicopter with its rotor blades folded. He next observed the object being moved into trees adjacent to the road. The pilot vectored the area and pin-pointed the location as VE 652280. USAF Security Police representatives subsequently advised that a sweep of the sighting area, from Ban Na Mun Hin (VE 668235) to the vicinity of Ban Ram Rat (VE 641280), by Royal Thai Army (RTA) personnel between 0100 and 0400 hours, 24 August 1969 produced no results, nor did a joint RTA-USAF Security Police search at 1100 hours the same day. (OSI evaluation re helicopter sighting: F-5).

3. [REDACTED] 5106-ASP-6J reported that on the night of 23-24 August 1969, some twenty Thai National residents of Ban Sang Hin (VE 682249) reportedly travelled to and from the Wat Si Sa-at, located in Ban Ram Rat (VE 641280), to make an offering. This religious procession followed the country road to Ban Ram Rat, passing through Ban Nong Bua (VE 668265) and Ban Khok Sawang (VE 57278). On their return trip, between Ban Nong Bua and Ban Sang Hin, members of the group noticed an aircraft circling overhead. One of the villagers, who was carrying a portable electric lantern to light their path, shined his light upward at the plane. Source (5106-ASP-6J) stated that this incident occurred sometime between 2400 hours 23 August and 0100 hours 24 August 1969. (F-3).

4. [REDACTED] In an effort to obtain further details, 5106-ASP-6, supra, travelled to Ban Sang Hin, where he questioned a villager (NFI) who allegedly took part in the pilgrimage to Wat Si Sa-at. This villager confirmed the information received from 5106-ASP-6J, and provided the following additional details:

a. The religious procession left Ban Sang Hin at approximately 2000 hours, 23 August 1969, arrived at the wat two hours later, and departed for home again at 2330 hours. Enroute, the villagers travelled along the country road more or less in a single file. Some carried flashlights to light the way, and at least one villager carried a powerful electric lantern. On the return trip, the pilgrims carried with them two large ceremonial drums. Due to the weight of the drums, they were suspended between two long poles, with several persons supporting each pole. (F-3).

b. When the procession was nearing home, between Ban Nong Bua and Ban Sang Hin, members of the group observed an aircraft circling overhead, and the villager with the electric lantern directed its beam at the plane. When the plane continued to circle, and began to come lower, some members of the group became frightened and ran into the woods along the road. After the aircraft left the area, the group continued on its way, arriving at Ban Sang Hin between 0100 and 0130 hours, 24 August 1969. (F-3). (See attached sketch).

COMMENTS OF THE APPROVING OFFICER: [REDACTED] The information in paragraphs 3 and 4 above, was furnished the Commander and Director of Intelligence, 56th Special Operations Wing and 56th Security Police Squadron, Nakhon Phanom RTAFB, upon receipt.

[REDACTED] While the location of the pilot's sighting and the route ascribed to the religious procession do not coincide precisely, their proximity and the coincidence of timing makes it apparent that the "helicopter with folded

JD FORM 1306

SUBPLACED DA FORM 1306-1, 1 AUG 60
AND DA FORM 1306-2, 1 AUG 60 WHICH

"rotor blades" was probably no more than the poles supporting large ceremonial drums. The location pinpointed by the OV-10 pilot is little more than a mile from a line between Ban Nong Bua and Ban Saeng Hin, and such an error would not be unreasonable considering the sighting was made from a moving observation point at night. Further, the possibility exists that RTA personnel, searching for the ground object originally reported, may have come across information pointing to the religious procession, but failed to report it.

Radar and visual sightings of UFOs, such as that being checked out by the OV-10 pilot in this instance, are not a new phenomenon, particularly at night. A January 1969 report lists seven UFO sightings at Nakhon Phanom RTAFB for the period 28 November 1968 to 1 January 1969 alone.¹ Attempts by base reconnaissance aircraft to further identify the objects were unsuccessful. Noting these unresolved reports, the 7/13th Air Force Director of Intelligence offered several comments and possible explanations:

a. On 28 November 1968, the Thai Border Patrol Police (BPP) began an operation involving four to six BPP and Royal Thai Army (RTA) helicopters, in the vicinity of some of the sightings northwest of the base. While Thai pilots had historically been reluctant to fly at night, a recent full moon had made night flying almost as easy as daytime operations, and pilots of both the BPP and RTA had been known to accomplish night flights. Centralized control of these agencies' autonomous counter-insurgency operations is weak, however, and Thai units frequently filed flight plans with the Air Defense Surveillance System only after the fact, if at all.

b. Alternatively, the UFOs sighted might have been aircraft on clandestine flights by US agencies, as such flights are often completed without details being released to traffic control offices. Though it is possible that the illicit flights were friendly, for purposes of private gain, pleasure or smuggling, there was no evidence at the time to substantiate that possibility.

c. During November and early December, radar gear in Thailand, particularly Ground Controlled Approach (GCA) scopes, have historically yielded large numbers of returns from natural or cultural phenomena, e.g., temperature inversions, balloons from fairs and religious celebrations, migratory birds, and kites. In November 1967, Headquarters 7/13th Air Force conducted an experiment at Udorn RTAFB, where GCA scopes were reporting more than fifteen unidentified returns. In a span of ten minutes, human observers physically sighted scores of balloons, three flocks of migratory birds, several kites, plus at least four local helicopters. These sightings, even of friendly flights, could not be correlated with GCA and other electronic returns.

d. In analysing the threat of helicopters penetrating Thailand or supporting insurgent forces, a preliminary study of the technical factors involved determined that landing helicopters in remote jungle clearings at night to airlift personnel or materiel was highly dangerous, particularly without sophisticated navigational and landing aids. Additionally, the nearby Communist or neutral countries from which the helicopters might come do not presently possess adequate numbers of low/slow aircraft to support their own field forces, officials or units by air, without considering any high risk extra-territorial missions.

e. In 1967, unidentified aircraft activity, purportedly in support of Communist insurgents inside Thailand, seemed to preoccupy Thai officials until U.S. resources provided Hawk anti-aircraft missiles. Then, in a speech of acceptance and thanks, General PHRAPHAT, Deputy Prime Minister, said the helicopter threat from outside Thailand had ended or come under control.

SUBMUNATOR OSI District 51,
Bangkok, Thailand.

It would not seem necessary for insurgents to use helicopters for crossing into Thailand. Evidence indicates that much of the Thai-Lao border can be crossed at ground level without a great deal of difficulty, affording a far cheaper, safer and less obvious means of infiltration or exfiltration. Yet Thai military and police agencies continue to report helicopter sightings, or fail to report conflicting information which might derogate claims of helicopter activity. This phenomenon may reflect the fact that the presence of helicopters would be evidence of "externally supported aggression," and provide an explanation of Thailand's insurgent movement which fortuitously omits any possibility of an internal cause. A recent self-analysis by the Thai government Communist-suppression agency in mid-South Thailand provides a notably perceptive insight into a facet of Thai personality which affects additionally the gathering and validity of intelligence information from the field. The report cautions government officials against their prevalent attitude that no report of insurgent activity is sufficiently important to send forward unless it has been bulwarked with references to unidentified support helicopters, transceivers and AK rifles, or the presence of some famous guerilla leader.²
