Would appreciate it if you could advise me on where things stand with respect to the review of the Dan Stillman manuscript. Hope that all but the "final touches" are done. Have been looking forward to your inputs and comments. If it makes it any easier, I will be glad to get together with you to discuss/go through your review.

I talked with Dan about a week and a half ago and told him that I thought he should expect the DIA response by early May. Would like to meet that, if at all possible.

Appreciate your work on this.
Thank you.
