COMMENT:1 Conversations with Argentine Army Intelligence officers indicate in general that the level of terrorist incidents in July decreased. It appears that subversive groups are concentrating on the distribution of pamphlets, acts of intimidation against security forces and hit and run bombing attacks against government installations.

2. ~~(C)~~ The Montonero campaign to discredit the Argentine government during the World Soccer Championships did not according to Argentine security forces meet anticipated results. However, the theft of the 100 Motorola radio transmitters as reported by the Embassy RSO would seem to indicate that subversive elements in Argentina are still making plans for bigger and better things in the future, rather than just fighting for their very existence which would be an oversimplification of the problem. Subversive elements still maintain sufficient freedom of action to conduct sophisticated acts of terrorism at the time and place of their choosing.
