Overall Briefing: UNCLASSIFIED//~~FOUO~~

ABOUT THE SURVEY

Survey Details and Logistics

The 2020 WES saw a **19 percentage point (pp) decrease** in response rate compared to 2019.

Over half (57%) of respondents took the survey on NIPR.

Multiple factors contributed to a low response rate in 2020 including a new distribution process, the requirement for CAC authentication on NIPR, and limited communication avenues during the COVID-19 pandemic.

IC Collaboration

91% of respondents believe that their mission depends on IC agencies and components sharing knowledge and collaborating, up from 89% in 2019. However, it has become increasingly difficult to engage with other IC agencies during the COVID-19 pandemic most likely due to work schedule conflicts.

3 out of 5 IC integration metrics remained the same or decreased in 2020

Employees were asked, how easy or difficult is it to share knowledge and collaborate on work-related matters with members of the IC who are outside of your own agency or IC component?
