printing plant. The second shop which was 32 feet below ground, 45 feet long and 16 feet wide, was equipped with offset printers, rotaprinters and extensive photographic equipment. It was used to print books, leaflets and training manuals and reportedly the largest of its type to be discovered.

2. ~~(C//NFINTTEL/NOFORN)~~ COMMENT: The discovery last week of the two printing plants and library will undoubtedly have a tremendous impact on the propaganda arm of the guerrillas. It is unknown, however, to what extent or how these facilities were used in the planning and preparation of terrorist activities. If they serve a role in the intelligence apparatus of the guerrillas as some reports have suggested, the capability of the terrorists may have been effected. It remains to be seen just what impact these government victories will have.
