FOIA-00064-2023	Laws, Reginald	1/24/2023	Recently Milgrom and Robert Wilson received the 2020 Noble Prize as economics for creating a nontraditional, transparent, and fundamental way to auction off electromagnetic spectrum. Their contribution also gave insight to how the government configured and or structured their original theory. Due to the complexity of the policy but urgency, the policy foundation was built on other approved policies, creating a gap in the approbation and imbursement process. Over 100 billion dollars sits with the Department of Treasury allocated by the Department of Defense until the requirements are demonstrated. I have included supporting evidence that is a part of my personal intellectual property which is the missing element for which collection of electromagnetic spectrum or emissions is required.
